

HAND ATLAS — MS 149 ff. 81r–83v (single later-17c round report hand)

Working document

Source	_HAND_ATLAS_ms149.md
Integrity	sha256 ed1d93ddad25 · rendered 2026-07-09
Status	<i>Derived render for review. The markdown source file governs; the modernized layer is never quotable; all readings are provisional pending the commissioned professional transcription (names above all). Canonical apparatus: _PRECISION_PASS_LEDGER.md; method: TRANSCRIPTION_AND_ANALYSIS_METHODODOLOGY.md.</i>

How to read this render (conventions legend)

strikethrough	struck in the manuscript (source: ~~text~~)
superscript	scribal interlineation or raised letters (source: ^text^, m^r)
shaded serif span	diplomatic text quoted inline (source: `text`); conventions inside are rendered too
boxed serif panel	diplomatic transcription block
gray italic [...]	pass-annotation — editorial apparatus, NOT manuscript text
CONFIRM UPGRADE LEAN CONFLICT	delta-log verdict class: green = confirmed/convergent · blue = upgraded/new · amber = lean/open/variant · red = retraction/conflict
[?] / [...] / [...] · « » · · △ ✓ eB X ★	sigla printed verbatim per methodology §6/§9

Purpose (methodology §17.1): allograph census + confusable-pair exemplars for the ONE copy hand, so contested tokens are adjudicated against the same hand's *confirmed* forms, not against generic period exemplars. Built during the f81r sweep (2026-07-08 →), extended each side. Every exemplar cites a tile + line so a reviewer can re-derive it.

Confusable pairs under census (from survey):

Pair	Why it matters	Exemplars (tile · line)
swash-T vs ff (majuscule openers)	"That/The" ¶-openers vs ff-initial names	81r.6 opener (T/S? — eB pending) vs "ffarmer" 81r.4 (hls81rL_b2)
long-f vs h (initial)	"fealeing" vs "husband" class	"faid" 81r.2 = f-exemplar (loop-footed tall stroke); "husband" 81r.1 = h-exemplar (bowl+link); adjudicated "fealeing" 81r.1 (hls81rL_b2)

Pair	Why it matters	Exemplars (tile · line)
rn vs nn vs m (minim cluster)	Darnell/Dannell (81r.6), Granetts (q-82v-a)	81r.6 name — eB pending (hls81rL_b2); nn-exemplar: "kynne" 81v.24 ✓✓ (hls81vL_b6/R_b6-7) — clean double-n for the Granetts comparison
e vs u (minim-adjacent)	Granetts/Grauetts (q-82v-a)	(collecting)
Gr- vs Gar- (metathesis risk)	Granetts/Garnetts (q-82v-a)	(collecting)
c vs t (medial)	"Cancelled", examinacon-class	(collecting)
in vs on (minim runs)	"sett him in/on this suite" (q-83r-e)	(collecting)
p-initial vs d-initial abbrevs	plts/defts (q-83v-a)	"defts" 81r.9 vs "plt" 81r.10 (hls81rL_b3/b4) — same-side exemplar pair: d = looped back-lean ascender + e-bowl; p = descender + tight bowl; superscript-t tail on both
100" vs 10" (digit+superscript merge)	the fine figure (q-83r-a)	"fyned 20. ^{li} " 81r.10 (hls81rR_b3_eB + native crop_K) — digits + point + superscript ^{li} ; THE money exemplar for q-83r-a
Ll- vs L- (caption surname)	Lloyd/Loyd (q-81r-a)	"Lloyd" 81r.14 (4 sightings incl. native crop_K): tall-L + second l-loop = double-L ligature. Single-L contrast: "Lady" 81r.12, "Lewes" 81r.21/.25. CLOSED — leaf reads Lloyd
majuscule C vs J (caption abbrevs)	office token q-81r-b (Ch ^r vs "Ju(—)")	C-exemplars: "Court" 81r.16, "County" 81r.22 (big open bowl + lead-in loop);  SECOND C VARIANT (closed/D-like bowl): "Coñifision" 81v.3 (firm — native crop_C shows the mid-bowl horizontal = the letter's own cross-finish, not a strike), "Councell" 81v.27 (closed-LEAN: nat read open, eB + native crop_M read closed) — the Ch ^r arbitration comparator set must cite BOTH variants. J-exemplars: "John" 81r.21, "Jury" 81v.24, "Jreland" 81v.10 (all DESCENDER). The 81r.15 token matches open-C-class + h-ascender + superscript r → Ch ^r   (arbitration)
& vs line-filler/paraph (line-end marks)	money-line tails; sense of "20li & false clamore"	81r.10 trailing mark (looped diagonal + cross-stroke) — DUAL unresolved; baselines print "&". **Second instance: 81v.23 line-end small curl after "grand" — dual {filler

Pair	Why it matters	Exemplars (tile · line)
welfh vs words (w-token skeletons)	the .7 Welsh-misrecording token; any w-initial short token	DISCRIMINATOR PAIR (same side, 6 lines apart): "welfh" 81v.7/.8 = TWO tall strokes mid-word (l + f) + h-descender tail vs "words" 81v.13 = ONE d-ascender, NO descender (native crop_L shows both). Adjudicated eB-81v-6 (my ⟨wo⟩rd⟨e⟩s lead retired)
Mar⟨fh⟩es vs Mar⟨ch⟩es (both-spellings pair)	Council of the Marches tokens; fh-ligature vs low-c generally	"Marfhes" 81v.4 (fh-ligature: tall crossed stroke — the h lead-in cuts the f stem; comparators "Engliffh" .6, "welfh" .8) vs "Marches" 81v.27 (low c-bowl, no tall stroke) — skeletons categorically distinct; both spellings CONFIRMED in one hand (crop_C + crop_M natives)
struck-form cancellation class	strikes vs flourishes (q-81v-a; .10 false start)	Horizontal single-strike: were + Lewes 81v.1 (runs through the word body). Diagonal-slash cancellation: struck W-class false start 81v.10 (two long diagonals descending below baseline — strokes the William-W exemplars never carry). Contrast: .20's A lead-in flourish (adjudicated NOT a strike, 2 sightings + 2 ambiguous)
open-cc (double-c reads rr-like)	"accufed/accufe" class; medial c generally	"a⟨cc⟩ufed" 81v.14 + "a⟨cc⟩ufe" 81v.21 — two clean instances = the hand's NORMAL cc; also "con ^e " 81v.7 open-c
majuscule W (R-like lead-in loop)	William instances; 81r foot catchword; ¶-openers	"William" 81v.1, 81v.21 (+ 81r instances) — W with big lead-in loop reads "Rw"-like; do not misparse the loop as a separate letter. ¶-OPENER variant: "Words" 82r.19 (hls82rL_b5[_eB]) — the openers vary swash-T/W on 82r
majuscule A (two-stroke, "Cl"-appearance)	¶ openers; CATCHWORDS	"A large" 81v.20 + catchword "A" 81v foot ✓✓✓ (+ native partial, crop_M) → 82r.1 "A witnes" COMPLETION CONFIRMED ✓✓✓ (#22); grand lead-in flourish variant at .20, bare form at the catchword. One-unit "Aprice" A-exemplars: 82r.1/.13 (hls82rR_b1_eB, L_b4_eB)

Pair	Why it matters	Exemplars (tile · line)
c vs g (initial, descender test)	the bribe token q-82r-a; any c/g-initial short token	Same-side discriminator set (82r): g-exemplars "grand" .18 + "Griffith" .19 (descender FIRM) vs c-exemplars "condemned" .14 + "Coroner" .22 (no descender). The .5 bribe-token initial matched the g-class ×4 sightings → "crownes" retired, gr{oa)t(e)s lean (hls82rR_b2[_eB], R_b3, native crop_E)
comma-form , vs descender-tail	first comma-class punctuation in the hand (82r)	"Jury, who" 82r.24 FIRM-lean (nat+eB+native crop_G — low comma-form clear of the y-descender) + "in," 82r.5 line-end ✓eB lean. 81r/81v used virgules only — new apparatus class; check each descender-adjacent low mark against the y/g-tail exemplars before claiming

Confirmed swash-T ¶-opener exemplars: 81r.16 "The bill" (large double-loop form, hls81rL_b5) · 81r.20 + 81r.23 "That" (hls81rL_b6) — compare vs ff-initial "ffarmer" 81r.4/81r.7: the T-swash closes a LOOP left of the stem; ff shows two parallel stems. **82r adds:** .8 + .12 "The" (display-scale) · .21 "The Councill" — **LARGEST instance, heavily-inked/BLOTTED head = ink-load not damage (native crop_G decisive) · foot catchword "That" FIRM (nat×2 + native).** ff-bar extended class (STAC-familiar): 81r.17 "effect" — long horizontal bar off the ff crossbar (eB classification pending) (hls81rL_b5/b6). **Sheriffe ff-medial exemplar:** 81r.22 (hls81rL_b6) — feeds 82r/83r sheriff lines.

Allograph census (grows during sweeps):

- long-f: medial positions (survey ✓) — (*exemplars pending*)
- superscript money N^h: 20^h (81r), 30^h (82v), fine figure (83r) — (*exemplars pending*)
- abbreviation class: Judgr̄mt · averer̄mt · Attorñ · Co^{rt} · Chancell^r · exaṁinacon · p(ar)don — "exaṁinac(o)ns" 81v.17 (hls81vL_b5) + "exaṁined" 81v.2 + "Coñiflsion" 81v.3 + "fuñe" 81v.20 + "Engl" terminal loop-back curl 81v.17 (CONFIRMED an abbreviation mark — native crop_D decisive; baselines' "[ish]" = expansion)
- virgule / ¶-terminator — 7 exemplars on 81v (.4 .8 .12 .15 .22 .25 .28); period-terminator contrast: .19 "pofic(i)ons ." (the side's one non-virgule ¶ close)
- caret ^ + interline placement — «hugh ap» 81v.1 (hls81vR_b1[_eB] + native crop_C): caret at baseline immediately after the struck word, interline directly ABOVE the strike; the short diagonal after "ap" = the caret's LEAD-LINE (eB + native concur)
