

MS 149 ff. 81r–83v — SURVEY CENSUS + PRECISION LEDGER (pass-4-grade campaign, opened 2026-07-08)

Precision-pass ledger (uncertainty record · commission brief)

Source	_WORKING_MS149_SURVEY_AND_LEDGER.md
Integrity	sha256 db1060721f21 · rendered 2026-07-09
Status	<i>Derived render for review. The markdown source file governs; the modernized layer is never quotable; all readings are provisional pending the commissioned professional transcription (names above all). Canonical apparatus: _PRECISION_PASS_LEDGER.md; method: TRANSCRIPTION_AND_ANALYSIS_METHODOLOGY.md.</i>

How to read this render (conventions legend)

strikethrough	struck in the manuscript (source: ~~text~~)
superscript	scribal interlineation or raised letters (source: ^text^, m^r)
shaded serif span	diplomatic text quoted inline (source: `text`); conventions inside are rendered too
boxed serif panel	diplomatic transcription block
gray italic [...]	pass-annotation — editorial apparatus, NOT manuscript text
CONFIRM UPGRADE LEAN CONFLICT	delta-log verdict class: green = confirmed/convergent · blue = upgraded/new · amber = lean/open/variant · red = retraction/conflict
[?] / [...] / [] · « » · · △ ✓ eB X ★	sigla printed verbatim per methodology §6/§9

Method: ../TRANSCRIPTION_AND_ANALYSIS_METHODOLOGY.md (runbook §12.1). **Baselines:** (1) READING_COMPANION_ff81r-83v.md (this dir); (2) ../Immunity Notes/HLS_MS149_FLOYD_SECOND_ACCOUNT_TRANSCRIPTION.md (source of record, 19-crop zoom verification 2026-06-11). Both re-read 2026-07-08 before survey. **This file doubles as the campaign ledger + any future professional-commission brief.** Status codes per methodology §9 (□ ● ✓ ✓✓ ✓eB △ △△ X ●).

SURVEY (6/6 sides read full-leaf, 2026-07-08)

Document class: report-collection copy, ONE later-17c round hand throughout (loops, linked forms, long-f in medial positions, big swash majuscule T on paragraph openers "That/The" — a T/ff confusable pair candidate; superscript money forms 20^H/30^H/10^H; abbreviation forms Judg^mt, averem^t, Attorⁿ, Co^{rt}, Chancell^r, examinacon-class, p(ar)don). NO ruling visible; paragraph-per-allegation layout with virgule / terminators — the report is a LIST of the bill's allegations, then the defense's, then Coke's propositions, then the order. Line spacing generous; ~20–26 written lines/side.

Apparatus discovered at survey (not in either baseline as apparatus):

- **Quire-internal ink numerals, top-right of rectos:** 81r = "4" · 82r = "5" · 83r = "6" — the booklet's own leaf numbering (Harvard's f. 81 etc. is the volume foliation; per Williams 2022 the reports begin at fo. 74r). Record both systems in citations.
- **CATCHWORD SYSTEM, foot of every side read so far:** 81v "A" → 82r "A witnes" ✓ · 82r "That" → 82v "That William" ✓ · 82v "that" → 83r "that will charge" ✓ · **83r "Trinitatis" → 83v "Trinitatis 5° Jac." ✓ — meaning baselines' "Finis[?]" at 83r's foot is a DISSOLUTION CANDIDATE: the token in that position is the catchword, not a Finis** (q-83r-d, TOP). · **81r foot word "William" sits in catchword position but MISMATCHES 81v's first written word ("were well knowne...")** — either line-overflow completion of "...names were Lewes || William", or a true catchword exposing the copyist's stumble at the page turn (the ~~were~~ dittograph sits exactly there). = part of the junction crux q-81v-a (TOP).
- Catchwords double as a **completeness proof** (no leaf missing between sides) — log each in the line indexes.

Per-side survey notes + defects:

- **81r** (2400×3541): ~24 lines + 2-line Floyd caption. Preceding-case tail (deed dispute) ends with margin "sentence"; Floyd caption + margin "Anglesey" at the bill-read line. Right edge chipped (text unaffected); moderate show-through; foxing spots. Money form "20^m" superscript. Caption line 2: "Rich: Barker Ju(—) et al defts" — the office token is an abbreviation (Ju: / Just[?]) → q-81r-b.
- **81v** (2400×3537): ~26 lines. **Line 1 = THE JUNCTION CRUX (q-81v-a, TOP):** "were well knowne to (struck token: Lewes?) «hugh ap» William examined the witnesses partially..." — survey suggests STRIKE-AND-REPLACE (yielding "well knowne to ^{Hugh ap} William" = the VICTIM) vs both baselines' parse ("well knowne to Lewes [interlined: Hugh ap] William[?]", Lewes unstruck, companion modernizing "well known to Lewes"). Sense stakes: WHO the two men were well known to (the prosecutor vs the victim). Interline geometry + strike extent = the sweep's first target. Left edge heavily chipped (verso of 81); show-through moderate. "Marshes" (commission clause) vs "Marches" (fine clause) both present ✓ baseline.
- **82r** (2400×3537): ~24 lines; catchword "That". **q-82r-a (upgraded candidate):** the bribe token reads at survey grain like "<c/g>r<o/e/u><w?>n<d/e>s" — "crownes" (crowns, coin) is a **NEW letterform-plausible candidate** beside baseline "g[ui]fts/groats"; sits "...petty Jury had (—) in their pocketts". Also "Admiralty" with abbreviation-class medial △ minor; "impannelled"; the Griffith line ✓ survey. Gutter-side clean; right edge ragged.
- **82v** (2400×3536): ~26 lines; catchword "that". "30^m" superscript money form; "60 lheets" clear at survey; **"Granetts" at survey grain (G-r-a-n-e-t-t-s letterform run; e/u and Gr-/Gar- questions remain for zoom)** (q-82v-a, TOP — the Garnet-hypothesis token, baseline §4.18); "Lo: Chancell^r" superscript form (baselines print "Chauncellor" — form delta candidate q-82v-b); averem̃t abbreviation forms. Left edge ragged; show-through moderate-heavy.
- **83r** (2400×3536): ~22 lines; margin "order" ✓; catchword "Trinitatis" (see above). **q-83r-a (TOP): the fine figure — survey reads "fyned 10^m"-like; baselines "100li [£100]" (and Kesselring/print £100) — the third digit may be merged into the superscript; deployment-critical money figure → zoom mandatory.** **q-83r-b:** "ye ground of all Justice would bee overthrowne" — **"y^e" (thorn-form) at survey** where companion prints "the" (the Notes round-2 already saw "ye ground"); also check "overthrowne/overthrone" tail. **q-83r-c:** line-1 right end carries a long diagonal stroke/slash above "Manner" — pen-flourish vs later mark vs deletion — classify. Also: "sett him in(?) this suite" (in/on crux stands, q-83r-e); "Cancelled" c/t-medial

check; "abetto^{rs}" superscript-rs forms ×2; possible underline-class stroke beneath "Readers hand" (q-83r-f — if real, an emphasis mark on the counsel-signature gate!); "Co^{rt}" superscript.

- **83v** (2400×3543): header "Trinitatis 5° Jac." with long entry-flourish + "Brooke vers Oldfield" + ~9-line paragraph ending "a p(ar)don may not bee pleaded /"; lower two-thirds BLANK with heavy show-through (mirror of 84r) — blank-verification target for the audit pass. **q-83v-a**: the pleading party token — baselines "[defts?][?]" having pleaded not guilty"; survey glyph looks p-initial ("plts"?) which fights sense (the pardon-pleader should be a defendant) — letterforms-first item for the sweep (boundary case, low deployment weight).

Standing-[?] inventory inherited from the baselines (→ MS149-6 re-render targets, on top of the q-items above): "Granetts[?]" (=q-82v-a) · "g[ui]fts/groats[?]" (=q-82r-a) · "Hugh ap" interline role (=q-81v-a) · "Lewes[?]" 81r last line (=q-81v-a complex) · "in[?on]" 83r (=q-83r-e) · "Darnell[?]" + "sealing[?]" (preceding case, immaterial) · "An° [1]60[5?]" digit (external corroboration CLOSED via PRO List of Sheriffs; the DIGIT itself still a reading item, q-81r-c) · 83v tokens (=q-83v-a) · "Finis[?]" (=q-83r-d, dissolution candidate).

Internal baseline inconsistency to resolve in the delta log: the Notes §3 corroboration table prints the caption surname "Loyd" while Notes §2 + companion + round-2 verification print "**Lloyd**" — same-document inconsistency; the sweep arbitrates from the leaf (q-81r-a; survey favors "Lloyd", double-l visible).

Copy-specific hazard profile (methodology §12.1.2): one professional copy hand ⇒ expect FEW scribal revisions (so far: the ~~were~~ dittograph strike + the 81v line-1 event + possible 83r marks) — the hunt is for COPYIST errors: eye-skips vs the exemplar (census against sense-completeness), dropped allegation-lines (each allegation = one virgule-terminated paragraph — count them), mis-expansions, and metathesis (the Granetts/Garnetts hypothesis is exactly this class).

TILE PLAN (per side)

Masters are 2400px IIIF derivatives. Half-columns L x0.10–0.55 / R x0.45–0.98 × 8 bands, y full, CROP_OVERLAP=0.25 CROP_QUALITY=90 CROP_RENDER=nat,eB CROP_SCALE=0 (auto → ~1600px long side), outdir crops/hls_p4/ (+ manifest). = 32 tiles/side. **For any token unresolved at this resolution: IIIF native-region re-fetch** (Harvard Image API; README has the drs IDs) **before declaring X**.

LEDGER — Q-QUEUE (opened at survey; per-side sweeps will extend)

ID	Item	Class	Status
----	------	-------	--------

ID	Item	Class	Status
q-81v-a	THE JUNCTION: 81r foot "William" + were dittograph + struck token before/after "to" + «hugh ap» interline — full parse (who was "well knowne to" whom)	TOP · names · geometry	✓ CLOSED (#21 eB): all three limbs stroke-backed — (1) 81r foot William = CANCELLED CATCHWORD (81v.1 does not begin "William"; system elsewhere orderly, 81v "A" unstruck ✓✓✓ → 82r); (2) zone A = were ✓eB single-token dittography (= both baselines); (3) zone B = Lewes STRUCK ✓eB — FIVE sightings (nat ×3 + eB + native crop_C) — with caret Λ + «hugh ap» interline → "well knowne to hugh ap William(—)" (eye-skip repair from 81r.25 "...names were Lewes"). BOTH baselines print Lewes UNSTRUCK → ARBITRATION LIST #2 rider (names class). "William" terminal: -m lean, no s-bowl ×3 (vs 81r.18 "Williams" → #27)
q-83r-a	The fine figure: 100" vs 10"	TOP · money · deployment-critical	☐
q-82v-a	"Granetts/Grauetts/Garnetts" — letterform run + Garnet hypothesis (never assert; §4.18 protocol)	TOP · names · wish-fulfilment-risk BOTH ways (hypothesis pulls toward Garnett)	☐

ID	Item	Class	Status
q-82r-a	bribe token: crownes (NEW survey candidate) vs gifts vs groats	TOP · substance	✓ CLOSED (#22 eB): gr{oa}t(e)s LEAN ✓eB — initial g-descender FIRM ×4 sightings ("crownes" = MY candidate RETIRED by the guard); NO mid-word descender ×4 (guifts' f requires one → DISFAVOURED); medial {oa}-class + t-ascender terminal → baselines' groats-limb SUPPORTED (period spelling "groates"). Author's-authority quote with disclosure; conform-on-professional-return. Tiles: crop_hls82rR_b2[_eB], crop_hls82rR_b3, native crop_E_82r_top_prejudged
q-83r-d	"Finis[?]" → catchword "Trinitatis" dissolution	delta candidate	● (survey-favored)
q-81r-a	caption surname Lloyd/Loyd (+ Notes §3 internal inconsistency)	names	✓ CLOSED (#20): "Lloyd" double-L FIRM, 4 sightings incl. native crop_K; Notes §3 "Loyd" = internal inconsistency, correct at fold-in
q-81r-b	caption office token "Ju{—}" (Just[ice]?)	names (upgraded from form)	⚠ → ARBITRATION LIST (#20): letterforms read Ch ^r ×4 sightings (open C-bowl + h-ascender + superscript r, no descender) vs BOTH baselines "Just[ice]"; Kesselring's "Sir Richard Barker" corroborates knight-class; recorded not asserted
q-81r-c	"An° 60(5?)" digit	date	✓ CLOSED (#20): token belongs to 81r.20 (sheriff year), reads "An° 605" three-digit elliptical century (no leading 1), eB + native concur; drowning year 81r.19 = "An° 1600" four-digit FIRM

—	catchword census per side (completeness proof)	apparatus	● (6 sighted; 81v "A" ✓✓✓ unstruck (+ native partial, crop_M), A-class allograph matching .20 "A large" → 82r.1 "A witnes" — completion CONFIRMED ✓✓✓ (#22); 82r "That" FIRM UNSTRUCK (nat×2 + native crop_G) → 82v.1 "That William" pending #23)

ARBITRATION LIST (grows; = commission brief section)

- 1. 81r.15 caption office token — Ch^r (MS letterforms, 4 sightings incl. native) vs "Just[ice]" (both baselines).** Expansion candidate Ch[ivale]r (knight); Kesselring 705 styles him "Sir Richard Barker" (corroborates knight-class); the judicial office itself is not in doubt ("Justice Barker" in the report body, 82r). Recorded, not asserted; conform-on-professional-return. Tiles: crop_hls81rR_b5[_eB], native crop_K_81r_caption.jpg.
- 2. 81v.1 zone B — Lewes STRUCK (MS letterforms: five sightings — nat ×3, eB tile, native crop_C; single horizontal strike through the full word body; caret Λ + «hugh ap» interlined above) vs BOTH baselines printing "Lewes" UNSTRUCK.** Sense stakes: corrected reading "well knowne to hugh ap William(—)" (the VICTIM) vs baselines' "well knowne to Lewes ... William" (the name dangling). Eye-skip-repair mechanics corroborated by 81r.25 line-end "...names were Lewes" + the struck ~~were~~ dittograph. Recorded, not asserted; conform-on-professional-return. Tiles: crop_hls81vR_b1[_eB], crop_hls81vR_b2, native crop_C_81v_junction_marches.jpg.
- 3. 82r.14 Aprice INSTANCE 3 — A(p)price DOUBLE-P lean (×4 sightings: nat ×2, eB, native crop_F — extra descender stroke in the lead zone) vs BOTH baselines printing "Aprice" uniformly for all three instances.** MS-internal contrast: .1/.13 are one-unit single-p Aprice (pre-e letter c-class RESOLVED ✓eB). Names class per standing rule — surfaced to user 2026-07-09; lean-grade disclosed; conform-on-professional-return. Feeds the #27 collation series (81r.24 William ap Rice · 81v.22 ap rice · 82r Aprice

×2 / A⟨p⟩price). Tiles: crop_hls82rR_b1_eB (.1), crop_hls82rL_b4[_eB] (.13/.14), crop_hls82rL_b5_eB, native crop_F_82r_bulkley_exec.

4. (*low weight, declared*) 81r.6 Da⟨nn|rn⟩ell dual + ⟨p|t⟩ struck-lean · 81r.10 trailing mark (&|line-filler) dual · 81r.25 trailing point △-lean · 81v.25 ⟨who|whoe⟩ native no-e lean vs baselines "whoe" · 81v.1 "William" terminal -m lean · 81v.10 struck W-class false start (interpretation dual) · **82r adds**: .5 comma-form after "in" ✓eB lean + .24 Jury, who comma FIRM-lean (first comma-class marks in the MS body) · .17 paired pause-virgules lean + stray dot dual · .24 who no-e lean vs baselines "whoe" (MS uses both: .9 whoe) · .28 fea long-f lean vs baselines "Sea" · R-margin dash beside the .3/.4 gap (deliberate-vs-accidental dual) — preceding-case / apparatus / form class, professional pass will sweep them up.

SWEEP LOG

- 2026-07-09: **#22 f82r SWEEP COMPLETE (eB pass + close)**. eB 5 tiles (6 queued items, 6/6 closed) + legacy natives E/N/F/G RECONCILED (all four corroborate; crop_F contributes the .17 paired-virgule upgrade + .14 4th sighting; crop_G contributes .28 fea long-f lean + catchword native confirmation; .20 line-end at/beyond crop edges — eB decisive there). **q-82r-a CLOSED: bribe token = gr⟨oa⟩t⟨e⟩s LEAN ✓eB** (see q-row — crownes RETIRED, guifts disfavoured, groats-limb supported). **ARBITRATION #3 opened (names): .14 A⟨p⟩price double-p lean ×4 vs both baselines' uniform "Aprice"**. Census FIRM 28 lines + catchword That FIRM UNSTRUCK; ¶ census FIRM (8 ¶s, 7 virgules + ¶G BARE — **.20 "tryall" virgule-absence CONFIRMED ✓eB = CONFLICT delta vs both baselines**). Other closes: Admiralty FULL FORM (t-bar not macron; eB+native) · Indictm̄t abbreviated ✓eB lean · who .24 no-e lean (vs baselines "whoe"; MS both-forms w/ .9) · paired pause-virgules .17 lean · comma-forms ×2 (.5/.24 — new apparatus class for this scribe) · quire "5" ✓eB · office comparators "Juftice Barker" ×2 now nat+eB+native (ARBITRATION #1 feed). 4-part delta log written in WORKING_MS149_f82r_LINE_INDEX.md (verdict-chip grammar, 17 entries). MB: 9 image reads this window. NEXT: **#23 f82v** — cut v3 tiles FIRST (+ fixity + coverage proof); TOP = q-82v-a "Granetts" (wish-fulfilment BOTH ways — Garnet hypothesis pulls toward, baseline pulls toward printed form; letterforms first); catchword completion "That William" check at 82v.1; q-82v-b Chancell' form; then standard nat sweep L b1–8 → R b1–8.
- 2026-07-09 (superseded by the entry above — nat-phase detail retained): **#22 f82r NAT PHASE COMPLETE**. Tiles cut v3 (32: nat+eB, L 0.02–0.55 / R 0.45–0.98); fixity refreshed (123 tiles, 0 failures); coverage proven (y 0–3537, x 0.020–0.980, no gaps >12px). PRE-eB census 28 lines + catchword in WORKING_MS149_f82r_LINE_INDEX.md. **q-82r-a bribe token nat-adjudicated GEOMETRY-BEFORE-PARSE: initial carries a DESCENDER (g-class, NOT c-class) ×2 sightings — "crownes" (MY survey candidate) DISFAVOURED at nat; the wish-fulfilment guard cut against its own author as designed**. Nat skeleton ⟨g⟩r⟨e|u|o⟩⟨u|w|n⟩n⟨d|e⟩s — but the terminal ALSO fits neither baseline candidate cleanly ("nds/-nes" vs "g[ui]fts"/"groats") → **token OPEN, eB-82r-2 TOP**.
