Leaf apparatus: quire-internal ink numeral "4" top-right (Harvard volume foliation f. 81). Foot word "William" — geometry adjudicated in band 8.

BAND BLOCKS (L b1–8 nat → R b1–8 nat; flush per band-pair)

L b1 (nat) — y≈0–617

Top edge chipped (leaf edge against black backing); top margin BLANK at this window (no running head, no margin word in x0.10–0.55; quire numeral "4" is top-RIGHT → R b1). Foxing spots, show-through light here. First written line enters at band foot = **81r.1** (partial, re-read in b2 overlap).

L b2 (nat) — y≈463–1080 (overlap re-shows 81r.1)

Preceding-case tail (deed dispute; LOW deployment weight but full census kept). Show-through moderate (mirrored strokes visible). Left-half texts:

R b1 (nat) — y≈0–617

Quire-internal ink numeral "4" SIGHTED top-right ✓ (apparatus census firm; small ink numeral below the chipped corner — top edge delaminated/layered here). Top margin otherwise blank. 81r.1 R enters at band foot.

R b2 (nat) — y≈463–1080

Right edge ragged, no right-margin marks. Seam double-sighting joins (overlap x0.45–0.55 shows seam tokens twice):

- **81r.1** = husband vppon fealeing the afsignm^t · — R: "⟨fe⟩aleing the afsignm^t" + terminal point; "afsignm^t" **superscript-t abbreviation** (atlas); deed-dispute sense firm
- **81r.2–3** = faid hee thanked God hee had cleered || his confcience in that matter / — R2 "God hee had cleered" (c-l-e-e-r-e-d clean); R3 "that matter /" — **virgule ¶-terminator (census: .3)**; ¶ (the husband's declaration) closes

- **81r.4** = M^r ffarmer did ⟨pe⟩nne that afsignm^t ⟨→⟩ — R half gives "⟨—⟩nne that afsignm^t" → verb candidate "penne" (sense-strong: penned the deed, then "was a witnes to it") vs L-nat's come-class; stays on eB queue for the initial letterform (p-descender vs c/v) — candidates now penne >> come
- **81r.5** = and was a witnes to it / — R: "to it /" — **virgule (census: .5)**; the "strike-look" over 81r.6's plt gains an alternative source (this virgule's flourish) — eB still owns it

FINAL eB QUEUE (6 tiles → next window): L-b2-eB (.4 verb, .6 cluster) · R-b3-eB (.10 money) · R-b5-eB (.15 office TOP) · R-b6-eB (.20 digit, .21 Lewes) · R-b7-eB (.24 patronymic TOP, foot-William strike TOP) · L-b6-eB (.21 "John Lewes" L-half check). Then: census FIRM + 4-part delta log vs BOTH baselines + survey-ledger update + #20 complete.

eB DISPOSITIONS (2026-07-08)

Pair 1 — L-b2-eB + R-b3-eB (flush 2026-07-08 — eB pair 1)

- **81r.4 verb → "penne" -lean ✓eB-lean.** Initial letterform at eB: descender-lean stem + bowl (p-class, not c/v); joins seam-half "⟨—⟩nne that alsignm^{ti}" + sense (penned the deed, then "was a witnes to it"). Candidates close: **penne** >> **come**; recorded with disclosure, LOW deployment weight (preceding case). Census: did penne .
- **81r.6 opener → "The" ✓eB.** The big swash majuscule closes a LOOP left of the stem = the atlas swash-T class (matches .16/.20/.23 exemplars); S-candidate dropped.
- **81r.6 "plt" stroke → STRUCK-lean .** At eB the crossing stroke through the token is flatter and separable from the .5 "it /" flourish tail (which sweeps steeply nearby). Sense cannot decide (line grammatical either way). Census:  struck-lean , LOW weight, revision-stratum log.
- **81r.6 name cluster → "Da(nn)ell"-lean , dual-candidate kept.** eB shows an arch-pair after "Da" (nn-lean); rn not excluded at this grain (names-rule: no assertion). Census: Da<nn|rn>ell  — baselines' "Darnell[?]" noted as rn-reading of the same cluster. LOW weight (preceding case).

- **81r.10 money** → "fyned 20." ✓eB FIRM. Digits 2-0 + point + superscript ^{li} clear at eB (survey "20" concurs; ^{li} = the li-form). **Trailing line-end mark = line-filler/paraph-class flourish** (looped diagonal + cross-stroke, not letters) → de-queued as apparatus, no reading.
- Bonus second/third sightings this pair: margin "Sentence" (3rd, ✓✓ stands) · "ffarmers name into" ✓✓ · "difmiffed with" ✓✓.

Pair 2 — R-b5-eB + R-b6-eB (flush 2026-07-08 — eB pair 2)

- **81r.15 office token** → "Ch^r" ✓eB (letterforms) —   **ARBITRATION-GRADE, recorded not asserted.** At eB: open-bowl majuscule C + full h-ascender + superscript r + point; **NO descender** (the hand's J descends — "John" 81r.21 exemplar). The baselines' "Ju(—)" is **not supported by the strokes** (u would show minims, not an h-ascender; J would descend). Expansion candidate: **Ch[ivale]r (knight)** — standard caption abbreviation. Census: Ch^r   *baselines: Ju(—) — contested, surface to user; conform-on-professional-return*. eB decided letterforms cleanly → no IIIF re-fetch needed (not scan-limited).
- **81r.20 date** → "in An° 605" ✓eB — **q-81r-c RESOLVED.** THREE digits (6-0-5, the 5 flagged), **leading-1 EXCLUDED** (no stroke between the An° superscript and the 6). The copyist wrote the elliptical century: full "1600" at .19, then "605" at .20. Survey's "60(5?)" was this token. External corroboration (PRO List of Sheriffs, Lewes sheriff 1605) unchanged.
- **81r.21 R-half** → "Efq to bee made" ✓eB (E + long-f + q-descender clear); "(Lew)es" tail holds — L-half of the name checked at L-b6-eB (pair 3).
- Bonus sightings: caption "<E>van Lloyd plt" **3rd sighting — double-L FIRM**; margin "Anglefey" ✓✓ holds; "That hugh" 3rd + 4th sightings; "<d>rownded and his Horfe" ✓✓; ".22 County /" ✓✓; ".23 confpir^z hyphen ^z second-sighted ✓✓.

Pair 3 — R-b7-eB + L-b6-eB (flush 2026-07-08 — eB pair 3)

- **Foot word** → **William STRUCK** ✓eB FIRM (3rd sighting). Real-ink horizontal stroke through the ENTIRE word, level with it (not show-through, not a flourish tail from .25 — .25 ends well left of the foot word). Catchword position (below last line, right-of-center) confirmed. **NEW vs both baselines + survey stands.** Feeds q-81v-a.
- **81r.24 middle element** — **NOT decidable from R-b7-eB:** the tile's window starts at the tail (<—>n ap Rice /); the element head lives in the L window → **supplementary L-b7-eB queued** (read this pass). "ap Rice /" ✓✓ + virgule second-sighted.
- **81r.25 R:** "<whofe na>mes were Lewes" ✓✓ — small mark after "Lewes" (point-like, high) -lean punctus OR foxing spot (leaf edge heavily spotted here) — noted, not asserted; blank right margin re-confirmed (no overflow motive).
- **81r.21** → "John Lewes" ✓eB FIRM (names-rule satisfied). L-b6-eB: "procured John Lewes E{fq}" — J-descender on "John" (re-confirms the J-exemplar the .15 Ch^r adjudication rests on); "Lewes" L-majuscule + open e-bowls (not o). Cross-witness name-form vs STAC "Lewys" → delta log part C.
- Bonus sightings: .19 "alfoe in An° 1600 /" **4th sighting — four digits countable (1-6-0-0), FIRM-FIRM**; .18 "ap Williams was <D/d>rownded" (verb initial large round d — D-lean form note, diplomatic layer only); .20 "That the deft Barker" ✓✓; .22 "Sheriffe" ✓✓; .23 "That they and the other" ✓✓; .17 "effect" ff-bar classification stands.

Pair 4 — supplementary L-b7-eB + IIIF attempt + legacy native crops K/B (flush 2026-07-09 — eB pair 4, closes the queue)

- **L-b7-eB (.24 head):** after "William ap" the element head shows an **ascender-loop** at the window edge — not decidable alone → IIIF re-fetch attempted per standing rule.

- **81r.24 → "ed againft William ap Rice /" ✓✓ — RETRACTION of the three-element hypothesis.** crop_B (native res) shows the full line: TWO-element patronymic, no middle element. The nat-pass "<—>n" fragment = the **m-tail of "William"** at the R-window edge; the L-edge "ascender" = the **R-majuscule of "Rice"** (same allograph as caption "Rice"/"Rich:"). Seam-parsing artifact, twice-misread across the b7 window edges — logged to the RETRACTION LOG (methodology §12; error class: seam-fragment misparse). ¶C victim = "William ap Rice" — **consistent with the baselines' "Aprice"-class reading; NO name delta at .24.** (*The STAC vr9 "J[oh]n ap E[va]n" family echo is moot here — was never asserted.*)
- **81r.15 office token — native-res 4th sighting (crop_K): "Ch"-class HOLDS.** Open C-bowl matches the hand's majuscule C ("Court" .16, "County" .22); h-ascender; superscript + point; no descender. Recorded Ch^r △△, baselines' "Ju(—)" contested — arbitration/professional-return item; surfaced to user in delta log.
- **81r.20 "in An° 605" ✓✓ FIRM** (native crop_B concurs with eB: three digits, no leading 1) · **81r.21 "John Lewes Efq" ✓✓ FIRM** (native) · **foot William STRUCK ✓✓ FIRM (4th sighting, native — strike is real ink through the whole word)** · .25 "names were Lewes" ✓✓ + trailing point-like mark △-lean (punctus vs foxing — unresolved, low weight) · .19 "An° 1600 /" 5th sighting · .10 money line-filler mark class confirmed at native (crop_K) · .12 "Lady Edmonds" FIRM (native) · .13 "Affyzes /" ✓✓ · .18 "ap Williams" terminal-s present-lean at native ✓.

eB QUEUE: CLOSED (all items dispositioned 2026-07-09). Remaining open △ (declared, low weight): .4 "penne" △-lean · .6 opener "The" ✓eB, <pt> struck-lean △, Da<nn|rn>ell dual-candidate △ (preceding case) · .10 trailing mark (&|◆) dual · .15 Ch^r △△ vs baselines' "Ju(—)" (ARBITRATION) · .25 trailing mark △-lean.

f81r DELTA LOG — 4-part, vs BOTH baselines (2026-07-09)

Baselines: (1) companion *READING_COMPANION_ff81r-83v.md §f.81r*; (2) Notes *.../Immunity Notes/HLS_MS149_FLOYD_SECOND_ACCOUNT_TRANSCRIPTION.md §2 + §3 table*. Both re-read this pass; quotes below verbatim from each.

A. FORM (spelling/letterform; no substance change)

1. **UPGRADE** — **fealeing FIRM** (f-allograph adjudicated, atlas #1) — baselines "sealing[?]": resolves their [?], adds medial e.
2. **VARIANT** — **ffarmers** (e, native-confirmed) — baselines "ffarmors" (o).
3. **VARIANT** — **drownded** (double-d form, 3 sightings) — baselines "drowned."
4. **VARIANT** — **hugh minuscule** (diplomatic layer) — baselines "Hugh."
5. **VARIANT** — **Affyzes** (3-form) — baselines "Assizes" (modernized in baseline).
6. **VARIANT** — **witnes** — baselines "witness."
7. **STRUCTURE** — **confpir=ed with line-break hyphen** — baselines print joined "conspired."
8. **CONFIRM** — **"penne"** — baselines already read "penne"; the nat-pass come-class doubt resolved **toward** the baselines independently (anchoring-check note: doubted first, then letterform-confirmed).

B. SUBSTANCE

1. **NEW** — **foot William STRUCK**. Both baselines record only "(bottom-margin word: 'William')," no strike. MS: real-ink stroke through the whole word, 4 sightings incl. native (crop_B). Evidence-backs the cancelled-catchword limb of the q-81v-a junction parse (adjudication stays with #21).
2. **LEAN** — **<pl̄t> struck-lean at .6, NEW revision-stratum item** (baselines print unstruck "The pl̄t Darnell[?]"). $\triangle$ lean only; LOW weight (preceding case).
3. **UPGRADE** — **.20 "in An° 605" FIRM** — baselines "[1]60[5?]" : resolves the [5?] and **excludes the editorially supplied [1]** (elliptical century after .19's full "1600"). Substantive only as apparatus-precision; year unchanged (PRO List of Sheriffs corroboration stands).
4. **UPGRADE** — **.25 "names were Lewes" FIRM** — baselines "Lewes[?]" : [?] resolved; line-end geometry (blank right margin, no overflow motive) recorded for the junction.

C. NAMES (names-above-all items — user arbitration where marked)

1. **CONFLICT** — $\triangle\triangle$ **ARBITRATION**, caption office token .15: MS letterforms read **Ch^r** (4 sightings incl. native crop_K: open C-bowl matching the hand's "Court"/"County" C; h-ascender; superscript r + point; **NO** descender, vs the hand's descending J in "John") — **AGAINST** both baselines' "Just[ice]". Expansion candidate: Ch[ivale]r (knight). **External corroboration for knight-class: Kesselring 705 styles him "Sir Richard Barker"** (per Notes §3 table, Kesselring column). The judicial office itself is NOT in doubt ("Justice Barker" in the report body, 82r). Recorded, not asserted; conform-on-professional-return; **task #26 must audit whether the caption line is quoted anywhere downstream**.

2. **CONFIRM** — **q-81r-a CLOSED: Lloyd double-L FIRM** (4 sightings incl. native). Companion "Lloyd" ✓; Notes §2 "Lloyd" ✓; **Notes §3 table "Loyd" = the Notes file's internal inconsistency** (flag for Notes correction at fold-in, task #26).
3. **CONFIRM** — **John Lewes Efq FIRM** — baselines agree; cross-witness form: STAC 8/203/38 "John Lewys, esq, late sheriff" (e/y between witnesses; both firm in their own records — collation item for #27).
4. **OPEN** — **Da<nn|rn>ell dual** **nn-lean** — baselines "Darnell[?]" = rn-reading of the same cluster; LOW weight.
5. **CONFIRM** — **Lady Edmonds FIRM at native** — baselines agree.
6. **RETRACTION** — **.24 William ap Rice** — baselines agree; my transient three-element hypothesis RETRACTED same-pass (seam artifact; never left this working file).
7. **CONFIRM** — **.18 ap Williams terminal-s** ✓ — baselines agree; **cross-witness: Coke prints victim "Hugh ap William"** (no s; 12 Co. Rep. 23 per Notes §3) — collation item for #27.

D. APPARATUS

1. **OPEN** — **.10 mark after 20.^{li}: DUAL <&|line-filler>** **lean** — both baselines print "&" ("fyned 20li & false clamore"); the looped-cross form permits it; eB/native cannot exclude either. Money figure 20.^{li} itself FIRM (survey concurs).
2. **STRUCTURE** — **margin words seated RIGHT/outer margin** (survey question closed): "Sentence" opposite the dismissal/fine ¶ (.9–.10); "Anglefey" opposite .16 (bill-read line) — companion seats it at the caption; placement refinement, not a conflict (marginalia float).
3. **NEW** — **virgule-¶ census layer**: 8 virgules (.3 · .5 · .8 · .13 · .17-mid · .19 · .22 · .24); allegation ¶s A (drowning) · B (sheriff) · C (conspiracy) · D (open → 81v) — the 81v eye-skip check runs against this chain.
4. **STRUCTURE** — **.17 "effect" extended ff-crossbar classified** (STAC ff-bar class); NOT a strike, NOT "&" — dissolved by seam join.
5. **OPEN** — **trailing point-like marks**: .1 terminal point ✓; .25 after "Lewes" **lean** (punctus vs foxing) — new, low weight.
6. **CONFLICT** — **AUDIT FLAG, Notes §3 table internally misquotes its own §2: "drowned ... in Aug. 1600" (table) vs "An° 1600" (§2 text + MS FIRM, 5 sightings)**. Check nothing downstream (THE_TWO_LOCKS, filings) inherited "Aug. 1600" — assign to #26.
7. **STRUCTURE** — **quire-internal ink numeral "4" top-right** ✓ (apparatus census); catchword system: foot word struck (see B.1).
8. **IIIF native re-fetch INFRA note**: Harvard endpoints 403 at WAF this session (fetch log at crops/_failed_iiif_fetch_*.403.html); legacy native crops K/B served as the native layer. Retry IIIF next session if a re-fetch is ever needed for f81v+ sides.
