Purpose. Per-membrane native+ line-index sweep of scan 8368179_STAC_8_203_38_002.jpg in the 4A style: line-anchored transcription with the revision stratum (interlineations, strikes, carets), delta-logged against the deposition-grouped baseline _WORKING_TOWNELEY_DEPOSITION_001-003L.md (its 002L + 002R sections). First-hand crop-zoom paleography only. Diplomatic conventions: [?] uncertain · [...] / [] supplied/illegible · word interlineation · text scribal strike · «or» in-line insertion · | half-column cut · △ provisional line-assignment.

Leaf spec. 5013×4110 px scan — WIDE DOUBLE: a two-page opening (bifolium spread), gutter at x≈0.47–0.53. One text column per page. Left page = baseline's **002L**; right page = baseline's **002R**. Foliation: graphite numeral top-right of right page (to verify at zoom). Examiner's marginal note in LEFT page's left margin (~y 0.78) — in strip La-b7 coverage.

Column scheme (decided on geometry tile crop_p4d002geo_small.jpg). Page-half blocks, two overlapping half-columns per page × 8 bands (y 0.00–1.00, 25% band overlap), ~1.12× native, q90:

- **La** x 0.03–0.30 (left page, line-starts + left margin)
- **Lb** x 0.25–0.53 (left page, line-ends + gutter edge)
- **Ra** x 0.52–0.78 (right page, line-starts)

- **Rb** x 0.73–1.00 (right page, line-ends + right edge)

Tiles: crops/stac_p4d/crop_p4d002{La,Lb,Ra,Rb}_b{1..8}[_eB].jpg + manifest.

LEFT-PAGE eB CHECK RESULTS (2026-07-08 — 5 tiles: Lb-b1, Lb-b5, Lb-b6, La-b7, La-b8)

- **L2 (Lb-b1 eB):** "the [E?~] Edw: Mountague" — NO ^{henrie} interline at this first mention. A long horizontal stroke crosses the "Edw:" zone at mid-letter height; three candidate readings: (a) unstruck "Edw:" + flourish from the preceding capital; (b) "Edw:" struck without replacement; (c) struck first attempt E then "Edw:" rewritten. **Stays** △△ — **top TNA arbitration item**. L3 resolves "[c]ounsel , " and L4 refines "the same tyme ... th[i]s ex[aminan]t told th[e?]".
- **L21 (Lb-b5 eB):** strike **CONFIRMED** — "Edw: Mountague touchinge..." (2–3 horizontal strokes through the Edw: cluster). No legible interline in the Lb strip (if ^{henrie} exists here it sits in the La overlap / margin). NB: the baseline read this site as ~~{struck forename}~~ [E?]w: — i.e. it took "Ew:" as the INTERLINE; the eB shows "Edw:" as the STRUCK token. Arbitration item. Also resolved nearby: "of the course of [?]" / "of a **Bill** vppon" (stroke under "Bill" — underline vs strike △) / "[?]ed to the same effect[e?]" / "Jevan Loude".
- **L29–L30 (Lb-b6 eB):** insertion reads "«or a[?]»" here vs baseline ^{"on a day"} — candidates "on a day" / "or als[o]" △. L30 crux instance: tail reads "-ts w[hi]ch" → lean "instrum[en]ts" at this site △ (the recurring instruments/instrucions crux — never silently resolved). Also "said[?] that afterwarde...", "con[si?]dered[?]", "to that end[?] the same".
- **L34 (La-b7 eB):** stack **CONFIRMED with an explicit caret (^) below the baseline at the insertion point** — first explicit caret found on this leaf: "the ^{henrie} Edward[e] M[ountague?]" . Then "before re[?]ed" (rehearsed/**reteyned** — baseline's "reteyned" now supported △) and "to be of his [pro?]m[?]ed[?]" △.
- **L37 (La-b8 eB):** stack **CONFIRMED** — "th[?] the ^{henrie} Edward[es?] M[...?]" (strike + interline both visible).
- **Page-foot junction (La-b8 eB):** last line "...he then affirmed" → flows directly into R1–R2: "...he then affirmed [at that?] tyme/[true?] , that then the same matters were examinab[le] in the Starrechamber". **002L→002R continuity confirmed.** ✓
- **MARGINAL NOTE re-read (La-b7 eB, 4 lines):** "E[x?] p 2[7?]: affirmed [is/it?] / [s?]launderous in [par?]te of / the materiall pointes / to bee true ." — m1 candidates: "E[x?] p 27:" (cross-reference?) vs baseline "S[ir] R[ichard] [B.?]"; m2 candidates: "[s]launderous" / "[sub]stance" vs baseline "[in]strucions in [some?]". Lines m3–m4 ("the materiall pointes / to bee true") are now SECURE. m1/m2 = **top TNA arbitration items** (they change who/what the note references).

NOTE ON THIS COMPOSITE (rev. 2026-07-08 post-eB): the right page's lines slope and the strips did not pair 1:1 at first cut; the willed-zone order (R21→R26) is now CORRECTED by the Rb-b5/Rb-b6 overlap — two willed-clauses, exactly as the baseline recorded ("willed that the Bill be lefte with him" ... "And afterwards ... willed the said bill to bee ingrossed"). Residual △seam risk is confined to R16–R20 (the request-to-come zone) and R29–R30. The narrative chain is secure: examinable-in-Starrechamber → Parliament-House vetting plan → satisfaction taken → Mountague determ[in]ed/seemed△ → Bill drawne vpp in paper (by th[i]s Examinat interline) → perused → delivered vnto the ^{henrie} ~~Edward~~ → read over most in the examinant's presence → willed the Bill be lefte with him → ^{aboute} three weekes → willed [engrossment?] of the bill ^{brought by the s[ai]d Lloyd} → what he misliked put/sett owt → puttinge owt of a th[ir]de → newlie copied → ^{had} read over the same & made some question of the matters therein conteyned → [sett his] hand to the s[ai]d Bill → foot date "Ju[l/n]ij" △△.

LINE CENSUS (final, 2026-07-08)

- **Left page:** 38 text lines + 4-line marginal note (at L32–L36 level). **Right page:** ~38 text lines + foot date/subscription fragments. Both feet torn.

Line	Text (diplomatic)	Apparatus
Interlineations (left)	some	(L7) · the (L8, reason-clause) · on a day / or a[?] △ (L29) · henrie (L34, with explicit caret; L37). (right): at the (R6) · [h]enrie (R10) · by th[i]s Exam[ina]t (R11) △ anchor-word open: drawne vs determ[in]ed zone) · henri[e] (R15) · henrie (R18, possibly doubled) · s[ai]d (R21) · aboute (R25) · henrie (R26) · brought by the s[ai]d Lloyd[e] (R27) · [sett?][downe?] (R28) · againe (R35) · had (R35, caret visible) · made (R36, caret visible).

- **Correction events (the Edward→Henry Mountague stratum):** left page — L2 first mention "Edw:" apparently UNCORRECTED △△ (stroke ambiguity, 3 readings); L21 "Edw: Mountague" strike CONFIRMED (interline unlocated); L34 "^{henrie} Edward[e] M[ountague]" + caret CONFIRMED; L37 "^{henrie} Edward[es?]" CONFIRMED. Right page — R-1 (R3–R4 zone: "Edwad" apparently unstruck at nat △△, heavy tangle above in eB, unresolved) · R-2 (R10: "[h]enrie {■■} Mountague") · R-3 (R15–R16: "vnto the henri[e] / the s[ai]d Edward" — boldest strike on the leaf) · R-5 (R18: "requested the ^{henrie} Edward■■", possibly doubled at margin) · R-4 (R26: "the ^{henrie} Edward} willed" — re-anchored from provisional R22) · R-6 (R28: "[E■■■■] he mi[s]liked [sett?][downe?]" — the disliked cluster) · R-7 (R34: "[E■■] Mountague" blot-strike). **Total across the leaf: 9–11 events** (vs baseline's "≥4 occurrences") — the fullest census yet of the scribe's systematic Edward/Henry confusion, caught mid-line most times, apparently missed at both pages' FIRST mentions (L2, R3) △△.
- **Carets:** two explicit carets confirmed (La-b7 at L34; Rb-b7 under ^{had}/_{made}) — first explicit carets recorded on this leaf.

DELTA LOG vs ` \_WORKING\_TOWNELEY\_DEPOSITION\_001-003L.md` (002L + 002R, baseline of 2026-07-02)

A. P4D-2 CONFIRMS the baseline (mutual, independent-read corroboration): the retainer + Counsell clause (L1–L3); the kinred clause ("some of S^r Richard Bulkleies [k]inred[e]", L7–L10); the justifie/true-vetting clause (L16–L18); the struck Star-Chamber clause fragments ("of the course of the / Starrechamber ... of a Bill vppon ... to the same effect[e]", L22–L25); "true in the materiall points thereof" (L31–L32); marginal-note lines m3–m4 ("the materiall pointes / to bee true") now SECURE; "examinable in the Starrechamber" (R1–R2); the Parliament-howse plan (R5–R7); "such satisfacc[i]on" (R8); "the Bill was drawne vpp in paper , & then [per]used by th[i]s ex[aminan]t" (R12–R13); "presence read over most" (R21); the two willed-clauses + "lefte w[i]th him ... space of ^{aboute} three weekes together" (R22–R26); "brought by the s[ai]d Lloyd" (R27); "puttinge owt of a th[ir]de" (R32); "newlie [?] cop[i]ed" (R34); "^{had} read over the same ... ^{made} some question o[f] the matters

therein conteyned" (R35–R37); the subscription (R38); the 002L→002R page-turn junction ("he then affirmed" → "...that then the same matters were examinab[le]").

B. NEW in P4D-2 (not in baseline):

1. **Foot date + subscription fragments (R38 foot):** "...to the [?] **Ju[l/n]ij**"   + "[?]ramo[?]t"  
(candidates incl. "[iu?]ram[en]t[?]") — baseline recorded only "And more [this ex[aminan]t] [] ... (torn foot)". NB tension: 001's Latin dating clause reads June ([xj?] Junii 5 Jac. 1607) — if the foot token is "Junij" they cohere; if "Julij" it is a distinct later date. TNA item.
2. **"he mi[s]liked" (R28):** a substantive token absent from the baseline account of the one-third cut — what Mountague *misliked* he had put out. eB vowel-check leans "misliked" over "mistaked".
3. **R11 interline** "by th[i]s Exam[ina]t" — resolves the baseline's open zoom target ("the Bill was drawne ^[by —?] up in pap[er]"), though the interline's anchor word (drawne vs determ[in]ed zone) stays .
4. **Explicit carets** (L34; ^{had/made} at R35–R36) — first explicit insertion-marks recorded on the leaf.
5. **Full correction census (9–11 events)** vs baseline's "≥4 occurrences", incl. the two apparently uncorrected FIRST mentions (L2 "Edw:", R3 "Edwad")   — the strongest documentary signature of the Edward/Henry forename confusion.
6. **"did sett his hand to the s[ai]d Bill"** — sharper than baseline's "to the [same]".
7. **Marginal-note m1 alternative:** "E[x?] p 2[7?]" (a cross-reference token?) vs baseline "S[ir] R[ichard?] [B.?]".

C. CONTESTED (P4D-2 vs baseline — TNA arbitration list):

1. Marginal note m1: "E[x?] p 27: affirmed..." (P4D) vs "S[ir] R[ichard] [B.?] affirmed..." (baseline).
2. Marginal note m2: "[s]launderous / [sub]staunce in [par?]te of" (P4D) vs "[in]strucions in [some?] of" (baseline) — substantively load-bearing either way.
3. R1 head: "[t?]yme[?]" (P4D) vs "[were] true" (baseline — fits the conditional better).
4. R10: "then **determ[in]ed**" (P4D) vs "then **seemed** [to be fully satisfied]" (baseline) — possibly BOTH occur in successive clauses.
5. R35: "& **they**" (P4D) vs "who **then**" (baseline).
6. L21 site: struck token is "Edw:" (P4D eB) vs interline read as "[E?]w:" over an unread strike (baseline).
7. L29: "«or a[?]" (P4D) vs "on a day" (baseline).
8. R31: "[s/p]ett owt" (P4D — initial cut at strip edge) vs "putt owt" (baseline).
9. The instruments/instrucions crux, per-site: L6 (-nts lean), L15 ("instrum[?]", L17 ("instrum[ents?]", L25 ("instru[ci?]ons"), L30 (-ts lean, eB), L37 ("instrum[?]ons"), R7 ("instru[?]ons"), R19 ("[instru?]m[en]ts[?]") — the baseline normalizes to "instrucions" throughout; P4D's site-by-site leans SPLIT. Never silently resolve.

D. Baseline readings P4D-2 could NOT independently confirm (not contradicted — strip gaps/slope):

"further to p[er]use" (partial only), "to bee ingrossed w[ith] some [amendments]", "fully satisfied", "question of **the truth of the matters**", R3's struck-token-plus-^{henrie} (P4D nat saw "Edwad" apparently unstruck; eB tangle unresolved — left OPEN, baseline not overturned).
