L1	⟨swash⟩ "To the 3 . Interr[ogatorie]△«or»Entred△ th[i]s ex[aminan]t saieth△ , that g[?]e[?]△ ..."	<i>the Interr/Entred crux RECURS here (same letterform ambiguity as 003 delta C8; queue for eB). Last word of the line (Lb side) unresolved: "gre[at?]/geo[rge?]"△.</i>
L2	"[p]referred△ a Bill [un/in]to the△ ⟨swash⟩ Starrechamb[er]△ [Court?]△ ..."	<i>the big swash word reads Starrechamber; supports Art-3 = bill's object.</i>
L3	"againste m[r] [R/N]i[gh]tgale△ [J?]u[st]ice△ Barker & oth[ers?]△ ..."	<i>"Barker" CLEAR at native; the word(s) between "m[r]" and "Barker" form an unresolved knot ("Rightgale"-like letterforms; possibly a forename abbreviation + honorific stack); queue for eB.</i>
L4	"Ane△ (STRUCK, Lb left edge) ... & Ju[st/dg]e△ of [...] A[ssi]ze△ ..."	<i>cut by band foot; band 2 re-shows.</i>

- L5 (partial at band foot): "...ye of the Countie of [?]△ ..." — re-shown band 2.

Band 2 (src y396–1188; overlap re-shows L2–L4 — line assignments refined against band 1):

- L2 (re-read): "[p]referred a Bill [un/in]to the△ | ⟨swash⟩ Starrechamb[er]△ ..." — "referred/preferred" still △ (initial p/r knot); queue.
- L3 (refined): "againste m[r] [R/V/N]ithgale△ | [?]△ Barker & oth[ers]△ ..." — the "Rithgale"-like knot sits mid-line directly before Barker; possibly a mangled forename/honorific stack; TOP eB item. "Barker & oth[ers]" clear at native.
- L4 (refined): "Ane△ (STRUCK at line-head) [J]ustice[s]△ of . A[ssiz]e△ | of the Countie of [A?]⟨swash, cut at gutter⟩△ ..." — county name = Anglesey expected (003R located the assizes "with in that Count[ie]"); queue.

L5	"[for &?] touchinge△ wh[?]△ [?]△ ..."	<i>line mostly unresolved at native; queue.</i>

Band 3 (src y924–1717; overlap re-shows L7–L10; La | Lb overlap words used to lock line joins):

- L8 (re-read): "& for other ~~othe~~ | m[is]demeanure(s) and△ Su[ch]△" — the strike is CLEAR at band 3: struck dittography "~~othe~~" before "misdemeanures". STRIKE #1 (004L).
- L9 (re-read): "that the reason why | he did not by the [?]△ ..." — word after "the" still unresolved (bill?/lawe?); queue.

Line	Text (diplomatic)	Apparatus
L10	"[p]referred△ in this ho: Courte complaine [of?]△ [?]"	<i>possible stroke above "referred" (strike vs otiose); queue.</i>
L11	"th[e/at] wronge [d]one to h[i]s/th[i]s△ ex[aminan]t was [?]△"	<i>his/this crux; queue.</i>
L12	"that he had ^{before} (INTERLINEATION #1, caret) th[i]s/his Acc[i]on△ in the [?]"	<i>join to L13 carries "brought".</i>
L13	"brought△ ... Courte of Comon [Pl]eades△ at westm[inst]e[r] , o[f/r?]△"	<i>"Courte of Comon Pleades at westm[inst]e[r]" — the baseline's Common-Pleas action CONFIRMED at native level.</i>
L14	"conspiracie△ touchinge those matters , And [?]△"	<i>"conspiracie" — the prior action was IN CONSPIRACY, the exact Floyd-v-Barker procedural predicate.</i>

- L15 (partial at band foot): "[a]gainste△/[?]ainste wronge[?]△ ... | done to h[i]s [e]xt[s]△ bro[ther?]△ ..." — re-shown band 4.
- Syntactic frame emerging for L9–L14: *the reason why he did not by the [?] [p]referred in this ho: Courte complaine (of) the wronge done ... was that he had ^{before} brought his acc[i]on in the Courte of Comon*

Pleades at westm[inste]r o[ff] conspiracie touchinge those matters... — the "because he was dead" clause expected in band 4.

Band 4 (src y1453–2245; overlap re-shows L13–L15):

- L15 (completed): "[& also?]△ touchinge△ the wronge[s?]△ | done to h[i]s [e]xt[s] bro[ther]△ [?]" — band-3 foot's "[a]gainste wronge" reading superseded by band-4 full view ("touchinge the wronge"); △ retained.

L17	"good , to bringe it in question aswell becaus[e] [?]△"	
L18	"he was deade as also because th[i]s ext[s]△"	<i>"he was deade" — the baseline's Art-3 "because he was dead" CONFIRMED, unstruck, in the re-cast sentence.</i>
L19	"brother did not <i>in his life tyme</i> (INTERLINEATION #2, caret) wish[e]△ th[i]s ext so to doe"	<i>the brother never in his lifetime wished this examinant to pursue it; answer 3 CLOSES here.</i>

- L21 (partial at band foot): "...[?] | [toge]ther△ in one [pri]son△ w[i]th [?]" — **the Beaumaris one-prison clause opens (Art-4)**; re-shown band 5.

Band 5 (src y1981–2773; overlap re-shows L19–L21):

- L19 (re-read): interlineation reads "*in his liffe*[e]tyme"△ (one word vs two unresolved); tail "wish[e] th[i]s ext so to [doe]" ✓.
- L20 (re-read): "To the 4 . Interr[?]△ th[i]s | ex[aminan]t saieth , that at/al the [ty[me]?]△ [?]" — tail near gutter unresolved; queue.
- L21 (completed): "ex[aminan]t was imprisoned△ | together in one [pri]son w[i]th△" — **"imprisoned together in one prison with" — Art-4 one-prison clause at native.**

L25	"And after the s[ai]d[e] willm ap [?]Rees ap willm[?] was condemned"	<i>possible caret around "Rees ap willm" (3rd full-name occurrence); queue.</i>

- L26 (partial at band foot): "for the s[ai]d[e] fa[ct/ult]e he | [did/lay] in the [pri]son at [B?] ..." — "facte/faulte" echoes 003R's *offense* → *facte* interline; "the prison at B[ewmares?]" = the Beaumaris anchor approaching; re-shown band 6. Foot partial beneath (Lb): "[?] the sher[?]inge/Sheriff[?]" — band 6.

Band 6 (src y2509–3302; overlap re-shows L24–L26; note the left page's lines TILT upward toward the gutter — La row N joins the Lb row sitting one visual step higher, same as 003):

- L25 (re-read): "And after the s[ai]d[e] | willm ap ^{Rees ap willm} was condemned" — caret candidate under "willm ap" visible again; INTERLINEATION-CANDIDATE; queue.
- L26 (completed): "for the s[ai]d[e] faulte/facte he | did in the [pri]son at" — "did" = auxiliary (verb follows in L27), not "died"; the faulte/facte crux queued (echo of 003R *offense* → *facte*).

Band 7 (src y3038–3830; overlap re-shows L30–L32) — THE DYING CHARGE:

- L32 (re-read): "<W>m ap Rees del[iuer]ed | to h[i]s <e>xt **writen** w[r]itinge/w[i]th his [?]" — band-6's "weepinge & wailing" guess WITHDRAWN; band-7 letterforms favor "writen w[?]" — **if this reads "deliuered ... a writen writinge/note", the direction was handed over IN WRITING — a physical document in the prison. TOP-TOP eB QUEUE + delta check** (juridically explosive if new).

Line	Text (diplomatic)	Apparatus

Band 8 (src y3566–4227; page foot, torn lower edge; overlap re-shows L36–L38):

eB RESOLUTIONS — LEFT PAGE

[Queue 1] La_b2_eB/Lb_b2_eB (L2–L9):

Line	Text (diplomatic)	Apparatus
L2	"<St>arrechamber" swash ✓eB (Lb head); "[p]referred a Bill [u/i]nto the"	<i>initial p/r knot persists △.</i>

- **L3 PLACEMENT CORRECTION:** the struck word logged at native as "~~An~~e (L4 line-head)" actually sits at **L3's tail, immediately BEFORE "Barker"** (Lb left edge, after the overlap-dup of the name-knot): "againste m[r] <(R/N)ithgale△ A[n/i]e△ (STRIKE #0, 004L — small word struck before Barker) (B)arker✓eB & oth[?]△". The name-knot letterforms sharpen to "<(R/N)ithgale" (R-vs-N capital; -ithgale/-ichgale body) but DO NOT

resolve — **TOP TNA item (names-above-all)**. What A[n/r]e was (a false-start "Ane"? a struck "Ju[?]"?) unresolved.

- L4 (re-cast): "[Justice[s?]]△ o[f] . A[ssi]ze△ | ze(dup) o[f] the (C)ountie o[f] (A)[...]△" — **"of the Countie of (A)" with the county's INITIAL (A) visible, remainder cut at the gutter edge** (Anglesey = candidate only, NOT affirmed). Reading consequence: **Barker (and possibly the Rithgale-person — number of "Justice[s]" △) is described as a JUSTICE OF ASSIZE of the Countie of A[...]** — the judge-defendant predicate at letterform level.
- L5 (revised shape): "[& oth[er]s?]△ fo[r] [&?] touchinge | [the?] wronge[s?]△ [?]" — eB favors "wronge[s?]" (not native's "wh[?]") after "touchinge"; whether "& others" heads L5 or closes L3 unresolved △.

Line	Text (diplomatic)
L6	"conceived it" ✓eB; following word "<d)o[nne?]" △ stands.

- L7 kinsman: Lb row reads "[Will]m [ap?] Rees ap willm & oth[?]" — 3-element form consistent ✓eB (first "ap" squeezed in the seam-overlap; not independently legible).

Line	Text (diplomatic)	Apparatus
L8	STRIKE #1 dittography " othe " ✓eB	<i>clear bar through the word after "other" (La).</i>
L9	"he did not by the [?]"	<i>object still cut at tile edge → falls to Queue 3 (b3 tiles).</i>

[Queue 3] La_b3_eB/Lb_b3_eB (L8–L15):

- **BREVIGRAPH RESOLUTION (kills two cruxes)**: the "stroke" above "referred" (L10) is the standard secretary **"pre-" contraction bar**: <ṑ>ferred = **"preferred"** — neither strike nor otiose. The same brevigraph resolves L2's initial-knot: "<ṑ>ferred a Bill" = "preferred a Bill". Both now ✓eB (expanded per the <x> convention).

Line	Text (diplomatic)	Apparatus
L9	the object after "did not by the" is NOT recoverable	<i>the line ends at the gutter edge with only minimal cut strokes; syntax strongly implies "[bill?]" ("did not by the [bill] preferred in this ho: Courte complaine of the wronge...") but it is SUPPLIED, not read △.</i>

- L12/L13 **word-allocation correction**: "brought" is L12's Lb head (a seam word), not L13's La head: L12 = "that he had ^{before}✓eB(caret confirmed) | brought h[i]s (A)cc[i]on✓(Accōn, -on bar) in the" · L13 = "<C>ourte o[f] (C)omon | [Pl]eades at westm[inste]r ,✓eB o[f]△".

Line	Text (diplomatic)	Apparatus
L14	"conspiracie touchinge those matters , And" ✓✓eB-CLEAR	<i>the prior-action-in-conspiracy predicate (the exact Floyd-v-Barker procedural fact) is now eB-verified.</i>

- L10 "Courte complaine" ✓eB; L11 "to h[i]s ext was" ✓; L8 STRIKE #1 "ethe" re-confirmed; L15 Lb "done to h[i]s ext[s] bro[ther]" ✓ shape.
- Residual from Queue 3: L6 "ministring" object (<in>justice?) NOT resolved by b2/b3 tiles — stays △ (TNA-light).

[Queue 4] La_b4_eB/Lb_b4_eB (L13–L20 head):

- L16 **STRIKE #2 EXTENT RESOLVED: the strike covers "deade"** — the bold rule runs continuously from La ("because he was") across the seam and terminates over the "[d]eade" letterforms at Lb's left edge. STRIKE #2 = "~~because he was deade~~" (complete false-start clause) ✓eB. Unstruck resumption "h[i]s <e>xt though[t] it" ✓.
- L16 tail "[not?]" before "good" — still NOT directly attested (gutter/fold zone); required by sense ("thought it [not] good ... because he was deade") but SUPPLIED △ (TNA-light residual).

Line	Text (diplomatic)	Apparatus
L17	"good to bringe it in question aswell because" ✓✓eB-CLEAR (both halves).	
L18	"he was <d>eade as also because th[i]s ext[s]" ✓eB	<i>the UNSTRUCK "he was deade" confirmed (La r6 clear).</i>
L19	"brother did not in his lif[e]tyme ✓eB (caret confirmed; one-word "lifetyme" vs "life tyme" still △) [wish]e th[i]s ext so to doe" ✓ shape.	

- L15 correction: L15 opens directly at "touchinge" — native's supplied "[& also?]" is UNATTESTED; the preceding "And" closes L14's Lb. Drop "[also]".
- L20 head "To the 4 . Interr[?]«or»Entred" cut at band foot → falls to Queue 2 (b5).

[Queue 2 + Queue 5] La_b5_eB/Lb_b5_eB (L18–L27 head):

- **Interr-vs-Entred (L20; by extension L1, R31): UNRESOLVED at eB — TNA formula-class item.** The letterforms read "<I/E>nter[e]d"-like (initial tall I/J/E + minim cluster + "-ed"-flourish terminal); the deposition formula requires "Inter[rogatorie]". Same hand-pattern as 003 delta C8 — the scribe's answer-head form consistently mimics "Entred". Expansion held as "Interr[ogatorie]" △ with the letterform-variant on record.
- L20 tail: "[tyme?] [that this?]" — still SUPPLIED (fold zone) △.

Line	Text (diplomatic)	Apparatus
L21	"ext was imprisoned together in one <p>[ri]son w[i]th" ✓✓eB-CLEAR	<i>the Art-4 one-prison clause verified.</i>

- **[||] MARKS RESOLVED = scribal VIRGULES (punctuation), not deletion/insertion marks:** L22 "...<R>ees ap <w>illm || before the" + L23 "was executed || by the" — the syntax locks: *imprisoned together with Willm ap Rees ap Willm || before the [ap△] <s>d Rees willm was executed || by the space of a quarter of a yere...*

- L23 head-knot: a short dash + "<s>d" at La line-head — STRIKE #3 "ap" (anticipation false-start before "sd") stays plausible-NOT-affirmed △.

Line	Text (diplomatic)	Apparatus
L24	"space of a q[uar]ter a yere or thereabout[es]" ✓✓eB	<i>the quarter-year cohabitation detail verified.</i>

- L25 caret: a "Λ"-form IS present after "willm ap"; whether "Rees ap willm" is interlined or in-line unresolved at b5 → falls to Queue 6 (b6).

Head state: the right page's head is TORN — Ra_b1 loses its top ~2 lines to the tear (black above a down-sloping parchment edge); Rb_b1 keeps a torn top-right corner carrying one partial fragment (R0) with no surviving Ra half. Same tilt as the left page: lines rise left→right, so Ra row N joins the Rb row sitting one visual step higher (locked via "Bill to be ... drawne" within-row rise).

Historical-plausibility note (kept OUT of the reading): the Beaumaris Bulkeleys of this period include Sir Richard Bulkeley (Kt), and brothers David, William, and Lancelot — the letterform candidates match the known family, which raises confidence but does not substitute for eB/TNA confirmation.

Band 3 (src y924–1717; overlap re-shows R9–R12) — THE WITNESS THEORY ZONE (knotted; heaviest eB load on this page):

- R46 (partial at band foot): "[?] <E>dw[ard] ▲ / [?] eaw ▲ me[?] ▲ | [?] me[?] ▲ theoreo[f]" — a possible "Edward" ▲ fragment (VERY uncertain) + "...thereof"; re-shown band 8. Foot tear cuts into Rb's right edge in this zone.

Band 8 (src y3566–4227; page foot, torn lower edge; overlap re-shows R43–R46):

- R45 (re-read): "[n/d?]ot ▲ onely , [?] give ▲ <d>irecon | <d>irecon(dup) to {?} ▲ <s>[?] ▲" — "not onely ... give direcon" frame persists; the strike-bar zone after "to" re-shows; queue.
- R46 (FINAL LINE, right page): "for h[?] ▲ <d>[r]awinge ▲ <or> <E>dw[?] me[?] ▲ | [fra?]minge ▲ theoreo[f] ." — two live readings of the Ra half: "for the drawinge" vs an "Edw[?]"-name fragment; Rb half ends "...[fra?]minge ▲ theoreo[f]" with a flourished descender. **ANSWER 5 (and the page) ENDS HERE.**
- Below R46: ~2–3 line-heights of BLANK paper before the torn foot edge on BOTH half-columns — **the answer closed above the tear; NO signature visible on 004R** (deposition continues on 005). The foot tear on 004R mirrors 004L's; consistent with one physical tear across the sheet.
- Answer-5 close frame (R40–R46, hypothesis): "...nor [?] ffloude ▲ esq[?] ▲ nor anie other person or persons otherwise then [as is?] before declared , [nor?] gave [?] th[i]s ext [?] for the drawinge o[f] [?] direcon to th[i]s ext [touchinge?] the <s>d Bill , But th[i]s ext himselfe [comp?]osed ▲ [the same?] [& did?] not onely give <d>irecon [?] for the <d>rawinge ▲ / [fra?]minge ▲ theoreo[f] ." — the SELF-AUTHORSHIP close: Lloyd asserts the bill was entirely his own act.

eB RESOLUTIONS — RIGHT PAGE

[Queue 1 + Queue 2 part] Ra_b1_eB/Rb_b1_eB (R0–R6):

- **R0/R3 COGNATE-PAIR RESOLUTION:** the two knots resolve each other. R0 (head fragment, Rb only) = "by fuche <c>olle<c>ons"  as" and R3's verb = "had <c>ollected  too himselfe" — the doubled-l + -cted letterforms exclude native's "[re]ferred to"; the cognate-object idiom locks: "...by *suche collecons*  as ... *th[i]s ext had collected too himselfe*, ✓eB". "collecons" is a **-cions-family word** → stays  **per standing rule** ("tolleracons" not excluded); the verb "collected" ✓eB.
- **R0–R1 = the CONTINUATION of L39's broken sentence** ("And thereupon by the [→]"): reading frame "And thereupon by the [... ~half-line LOST to the head tear ...] by *suche collecons*  as [&?] *instruc[c]ons*  of]

thofe w[?]  w[hi]ch[e]  [?] he [?] o[th]ers  ... — R1 "instruc[c]ons" letterform-firmed (in-st-r-u+cons bar visible) but its -cons suffix  (crux class). **The w-word after "thofe" remains cut/unresolved — "w[ritinges?]" is a live candidate ONLY** (would tie the bill's drafting directly to L32's physical writing) — NOT affirmed; TOP TNA item.

Line	Text (diplomatic)	Apparatus
R2	STRIKE R#1 CONFIRMED as a true strike (clear horizontal bar, Ra r3): "against the ff[?]  [?]ff[?]  arker & o[th]ers"	<i>struck content an ff-initial cluster  (false-started name?); the word before Barker still unresolved .</i>

- R3 tail: "too himselfe ,✓eB(comma clear) [that?] h[i]s ext .

Line	Text (diplomatic)	Apparatus
R4	"caused the saide Bill to be <d>rawne" ✓✓eB-CLEAR (both halves).	
R5	"<p>utt" ✓eB (putt-vs-brought resolved → putt); "[i]nto th[i]s ho:/Ep:  Courte , w[i]thout the✓eB"	<i>ho:-vs-Ep: persists → Queue 3 (b2).</i>

- R6 tail name-zone glimpsed at Rb r6–7 ("<S/E>[?]stra[?]"-forms) — falls to Queue 4 (b2) as planned.

[Queue 3 + Queue 4 + Queue 5] Ra_b2_eB/Rb_b2_eB (R3–R12) — THE ANSWER-4 DENIAL LIST:

- **Queue 3 (R5 "ho:/Ep:"): UNRESOLVED — held "ho:"  by parallel-form.** The eB letterforms show a descender ("Ep:"-like); but the scribe's own left-page parallel (L10 "preferred in this ho: Courte") + sense (honorable Courte; the Star Chamber is not an "Ep[iscopall]" court) favor "ho:". Letterform-variant on record; TNA-light.
- **Queue 4 (R6 tail name, TOP): the "bar after o[f]" DEMOTES to a damage artifact —** at eB the "bar" coincides with a dark paper slit; not a strike. The name-slot between "intreaty o[f]" and R7's "Bulkley K[nigh]t  is ONE slot, possibly Sir-prefixed: "[S[i]r?]  <T/R>[?]stra[m/u] ". Letterforms favor "<T>[r]istram"  (-stra- spine + -m/u tail; too many letterforms for "Rich:"); **"S[i]r Rich[ard]"  kept alive by anaphora** — R11's "told the <f>d Rich[ard]" requires a prior naming of Richard, and this slot is the only candidate antecedent. **UNRESOLVED → TOP TNA (names-above-all).** Either way the answer-4 list has FOUR members (the fifth-member question = whether Tristram ALSO heads this list is thereby closed: one slot only).
- **Queue 5 (list names): the second forename ends "-ell" — native "Dauidd" KILLED.** eB Ra r6: "ulkley <K>t  , <D>a<ni/ui>ell  — doubled-l termination clear (dup "-iell" re-shows at Rb r4). Converges with R32's answer-5 form "Da[ui/ni]el". Forename = "Daniell" /"Dauie"  (ni-vs-ui minims) → TNA (names-above-all). "Lancelott" ✓ shape (n-vs-u minim  light); "or willm"  stands; row-initial "Bulkley" #1–#3 ✓eB.
- **R10: "persuasion" DEMOTED → the standard doublet:** "o[f] [a]nie oth[er] [per]fon or <p>[er]fons  thereof  , But" — parallel-form with R40's "person or persons"; "But before the exhibitinge o[f]" ✓✓eB-CLEAR.

Line	Text (diplomatic)
R9	"ulkley or either o[f] the[m] o[f] them or o[f] <a>nie oth[er]" ✓eB.

- R6 head: "[pro]curement advise or: | intreaty" ✓✓eB re-confirmed (Ra r5 crystal); R4 "caused the saide Bill" re-✓.
- R11 "told the ⟨f⟩d" ✓ shape; R12 Rb "meant to exhibite | [a]gainft [m?] ⟨B⟩arker th[e] other[?]" ✓ shape — both fall to Queue 6 (b3) for the knots.

[Queue 6 + Queue 7 part] Ra_b3_eB/Rb_b3_eB (R10–R19) — THE TOLD-BEFOREHAND ZONE:

- **R11: STRIKE-CANDIDATE R#2 DEMOTED to an INK BLOT** (no clean bar; pooled ink over the exhibiting-zone): "the exhibitinge o[f] the ⟨f⟩d bill, th[i]s ext | told the ⟨f⟩d ⟨R⟩ich[ard]△" — the apparent bar at the Rich-form reads as the **suspension bar of the "Rich:" contraction**, not a strike △ light.
- **R12: STRIKE R#3 CONFIRMED** — bar through a "the ⟨f⟩d" false start: "⟨B⟩ulkley(#4) that h[i]s ⟨e⟩xt the-⟨f⟩d | meant to exhibite ✓✓eB-CLEAR". Native's "«at?»" insertion NOT supported at eB — dropped (reads "that h[i]s ext").

Line	Text (diplomatic)
R13	"a bill againfte [m[r]?]△ ⟨B⟩arker & other[s] ✓eB".

- **R14 KNOT RESOLVED: a TILTED FULL LINE, not an interlineation** — its Rb half "the same to be ⟨d⟩rawne ✓eB" occupies a full row slot between R13's and R15's Rb halves; the Ra half "that th[i]s ⟨e⟩xt had caufed the" is merely written cramped/rising into the interlinear space (the page's strong left→right tilt). **LINE CENSUS UNCHANGED** (R14 stays a line). Unplaced residual △: a "⟨bar⟩meant"-form at the Rb r5 right edge (struck anticipation of R23's "meant"? tilt intrusion?) — TNA-light.
- **R15: STRIKE R#4 CONFIRMED** — bold bar through a "⟨C⟩ourte"-like form after "ho:": "[i]nto th[i]s ho: Courte△ [?] the ⟨f⟩d | ⟨R⟩ich ⟨B⟩ulkley to teftifie ✓✓eB-CLEAR" — the struck-form content reads Courte-like but syntax requires an unstruck "Courte" somewhere in the clause (dittography-strike suspected); unresolved △ TNA-light. **The witness-theory verb "to teftifie" is letterform-verified.**
- **Richard-anaphora count now TWO** ("told the ⟨f⟩d Rich[ard]" R11 + "the ⟨f⟩d Rich ⟨B⟩ulkley" R15) — both anaphoric "fd" forms require a prior naming of Richard, feeding Queue 4's R6-slot crux toward "S[i]r Rich[ard]"; the R6 letterforms still favor "Tristram" — **both readings stay live → TNA.**

Line	Text (diplomatic)
R16	"to ⟨u⟩fe h[i]m" ✓ shape; tail "matters" ✓ shape. R17: "h[i]s ⟨k⟩nowledg[e]" ✓eB; "touchinge" join △ stands.

- R18/R19 strike zone, partial under-rule recovery (Rb r8): "...[ac]quainted [un]to(?)△ the ⟨f⟩d..." — full-line strike arbitration continues at b4 (Queue 7).
- R10 "thereo[f] , But" re-✓ (Ra r2).

[Queue 7 + Queue 8] Ra_b4_eB/Rb_b4_eB (R16–R27) — THE R19 STRIKE + THE BILL-INSPECTION ZONE:

- **R19 FULL-LINE STRIKE (STRIKE R#5) CONFIRMED as a deliberate full-line cancellation** — bold rule + huge looping left-margin descender-flourish, running across both half-columns. Partial under-rule recovery (ALL △ heavy, provisional): "⟨W⟩[i]thdrawe △ th[?] h[i]s ⟨f⟩uite △ [?]d th[i]s ext [ac]quainted △ [un]to the-⟨f⟩d [?]" — semantic shape: *withdrawing his suit + acquainting the said [someone]*. **A struck clause about withdrawing the suit — TOP TNA arbitration item** (professional recovery under the rule needed).

The cancellation appears imperfect: the surviving post-strike syntax runs "...to teftifie ... h[i]s knowledge touchinge [?] matters [R19] (R)ichard (B)ulkley ;△(strike-tail may clip this) att w[hi]ch tyme..." — broken join on record.

- **R20 "Richard-dittography" RESOLVED: NOT dittography — two distinct clauses.** R20 = "(R)ichard (B)ulkley ; att | w[hi]ch tyme the (f)[d?]△" (closes the partially-struck acquainted-sentence) · R21 = "(R)ichard willed th[i]s ext | to bringe h[i]m in△ th[i]s/h[i]s" (anaphoric "the fd Richard" heads the willed-clause). **Richard-anaphora count now FOUR** (R11, R15, R20, R26) — all feeding the Queue-4 R6-slot crux.

Line	Text (diplomatic)
R21	the "in" strike-candidate (R#6) stays plausible-NOT-affirmed △ (barred blob before "h[i]m"); TNA-light.

- **R22: the crux word before "that he would" = "(f)ayinge"△** (favored over "[pro]misinge" — no p-contraction visible): "[?]△ the (f)d (B)ill to fee , (f)ayinge△ that he would ✓eB".

Line	Text (diplomatic)	Apparatus
R23	"firft fee it , yf th[i]s ext meant to (u)fe h[i]m"	"meant" UPGRADED to ✓eB-CLEAR (native "[meant?]").

- **R24: "as a wittnes ,"** ✓✓eB-CLEAR (crystal at Ra r10) — **the Art-5 witness-condition phrase letterform-verified.** Tail after the comma stays knotted △.
- **R25: the delivery verb recovers** — "[& fo?] afterwarde h[i]s ext brought ✓eB | the (f)d (B)ill unto the ✓" (native "[?]") — Lloyd DID bring the bill; its recipient resolves through R26 "the (f)d(?) (R)ichard (B)ulkley ✓(re-confirmed)".

Line	Text (diplomatic)
R27	"the fame (u)fed thefe wordes" ✓ shape re-confirmed; "havige redd"△ → Queue 9 (b5).

- R16 "to (u)fe h[i]m" re-✓; R17 "h[i]s (k)nowledg[e]" re-✓.

[Queue 9 + Queue 10 part] **Ra_b5_eB/Rb_b5_eB (R23–R34) — THE QUOTE, eB-VERBATIM:**

- **R26/R27: "who havinge redd ✓eB the fame (u)fed thefe△ wordes"** — the redd-vs-Edd crux resolves to "redd" (syntax-locked, letterforms compatible; E-like flourished initial noted) — **Richard READ the bill before speaking.**
- **R28 TOP-TOP crux SHARPENED: "(g)eorge"△ LETTERFORM-FAVORED over "heere"** — on **TWO independent sightings** (Ra r5 + the seam-overlap duplicate at Rb r3 head): initial g-descender + medial secretary-g (z-form) present in both; "heere" requires an h-ascender absent in both. **NOT affirmed — names-above-all → TOP TNA.** If "george", Bulkeley addresses the deponent by FORENAME inside the quoted speech (deponent = George Lloyd, from the adversary's own mouth). "viz[t]." direct-speech marker ✓eB; "is a longe (B)ill , yf" ✓✓eB (both tiles).

Line	Text (diplomatic)
R29	"yf you (d)oft bringe me as a (w)ittnes , I" ✓✓eB-CLEAR.

Full quote now eB-verbatim except its first word: "*(george)«or»[heere?] is a longe Bill , yf you doft bringe me as a wittnes , I will fpeake the truthe .*" Answer-4/answer-5 boundary re-confirmed at the period.
- R31 (answer-5 head): swash "To the 5[th] . Interr[ogatorie]«or»Entred" — the formula-class crux recurs (3rd occurrence on 004: L1/L20/R31; the seam-dup's bare "-ed" tail noted) → TNA formula-class. "th[i]s ext faieth that neither the" ✓eB.

R33	"<L>auncelott ulkley <w>m" ✓✓eB	<i>William in superscript-abbreviated form.</i>

- R24 tail knot: still (unresolved after the "wittnes ," comma); R25 "the fd ill unto the" re-✓ CLEAR.

[Queue 10 rest + Queue 11] Ra_b6_eB/Rb_b6_eB (R31–R40) — TRISTRAM + THE FRAMING DENIAL:

- **R34 TRISTRAM (TOP): "<T>riftram" LETTERFORM-FAVORED** — large flourished initial + CLEAR "-iftram" body (i-f-t-r-a-m); "Eiftram" is no name. NOT affirmed — names-above-all → **TOP TNA**. Fifth answer-5 list member candidate firmed: "...<w>m | [B]ulkley , <T>riftram | ulkley or either o[f] them...". The cross-link to R6's slot stands (same letterform cluster) — the tension (R6 = one slot; Richard-anaphora ×4) goes to TNA whole.
- R31 formula: a "-e<rr>d"-compatible sighting ("Interr'd"-like) logged; formula-class stands.
- R32 Ra "the <f>d <R>ichard ul[kley] ," re-✓; **<D>aniel third sighting** (-el[l] form; b2/b5/b6 concordant). R33 "<L>auncelott ulkley <w>m" re-✓; the "[nor?]" connector before "<w>m" NOT seen at eB — likely just ", w[illia]m" light.

[Queue 12 + Queue 13 part] **Ra_b7_eB/Rb_b7_eB (R38–R45) — FFLOUDE + THE SELF-AUTHORSHIP CLOSE OPENS:**

- R40 FFLOUDE (TOP-TOP): the body is letterform-affirmed — "ffloude"△ — ff-digraph clear at line head + "oude" body attested (u-d sequence with d-ascender). "ffowler"/"ffouke" now letterform-DISFAVORED (no l-ascender before the tail; the d is present). Honorific "e[*f*q?]"△ stays knotted. - R41: STRIKE R#8 DEMOTED — otiose/idiom-stroke FAVORED; "be<fore> <d>eclared" likely UNSTRUCK (the bar rides above x-height with no descender-flourish — contrast R19's true cancel-rule). The stock deposition idiom "otherwise then [as is?]"△ before declared" is thereby restored as the probable reading △; TNA-light. Raised "[?]ame"-form at the R40/R41 join unplaced △ (interline? tilt-catch?). Tail "[?]iba△/<g>ave△" unresolved.

- R46 drawinge-vs-Edw RESOLVED: "for the <d>rawinge" ✓eB — the "<E>dw[?] me[?]" fragment guess WITHDRAWN (a pen-lift split "<d>raw-inge" mimicked "Edw me"; no Edward-name on this page). Rb half:

B. CORRECTIONS / DIVERGENCES (4D reading against the baseline text):

- B1. **L3 head-knot:** baseline "against M[r] ^{Richard} ~~struck~~ Barker" — 4D finds NO interline/caret there: in-line "m[r] <R/N>ithgale △ A[n/r]e (STRIKE #0) arker". The "^{Richard}"-interline reading is NOT corroborated; the knot is a name-like in-line form → TNA TOP (names).
- B2. **"Countie of A[n]glesey":** 4D attests initial <A> only (gutter-cut) — Anglesey is baseline-supplied, not read.
- B3. **faulte vs facte (x2):** baseline §004L "cond[em]ned for the s[ai]d facte" + "innocent of the facte" — **4D eB: "faulte" BOTH times (L26/L30, parallel-form, 3 sightings).** 004 uses "faulte" where the baseline wrote "facte" (and where 003R interlined "^{facte}"). Baseline correction proposed.
- B4. **L27:** baseline "call[ed] this ex[aminan]t a[side], desiringe" — 4D letterforms do not support "aside/desiringe"; reads "call [for?] th[i]s [ext?] a [?] of/afore △ the <Sh>er[?]ing △" — a TIME-MARKER the baseline missed (Shrev-ing-vs-Shering) → TNA.
- B5. **L33 quote opening:** baseline "sayeng: 'here is a direction'" — 4D: "fayinge △ **the[re]** is a <d>irec[c]on" — there-vs-here divergence △ (4D favors "there") → TNA-light.
- B6. **R2 struck word:** baseline "Sir → M[r] Barker correction" — 4D reads the struck form as an **ff-initial cluster** "ff[?]", not "Sir" → TNA.

- B7. **THE ANSWER-4 LIST (vs baseline + ledger D6):** baseline styles FIVE members ("[S[i]r Richard?] Bulkley kn[igh]t, Daniell, [Tristram?], Willia[m], Launcelott") and D6/zg4list read "Tristram" in "the list gap." **4D's row-anchored census contradicts the five-man styling: R7 Rb reads "<D>aniell(dup) ulkley , or willm" DIRECTLY — no slot between Daniell and William.** The only name-slot is R6's tail (before "Bulkley Kt"), where letterforms favor "<T>riftram" △ but FOUR anaphoric "the [d Rich[ard]" tokens (R11/R15/R20/R26) require Richard named in answer 4 — i.e., D6's "Tristram" sighting probably read the R6 slot, and the slot's identity remains the crux. **4D verdict: answer-4 list = FOUR members [slot-name (Kt), Daniell, willm, Lancelott]; Tristram enters only in answer 5 → TNA TOP.**
- B8. **Catch-all tail:** baseline "or of any other Bulkley" — 4D eB: "or o[f] anie oth[er] [per]fon or <p>[er]fons△ thereo[f]△" — "any other Bulkley" NOT attested → TNA-light.
- B9. **R10/R11:** baseline "before the exhibitinge [or?] [con]trivinge thereof" — 4D: "before the exhibitinge o[f] the <f>d bill" — no "[con]trivinge" seen.
- B10. **R14:** baseline "had caused the same to be drawne [interline]" — **4D resolves: a TILTED FULL LINE, not an interlineation** (Rb half occupies a true row slot).
- B11. **R27/R28:** baseline "used these words [or the] ver[ie] like in effecte to this ex[aminan]t:" — 4D reads "ufed thefe wordes | to h[i]s ext viz[t]." and did NOT sight "or the verie like in effecte" (if present it sits in the unread R27-tail seam) — AND 4D adds quote-opening text the baseline lacks (see C2) → TNA.
- B12. **Answer-5 list order:** baseline "R[i]chard, Launcelott, Tristram, nor Daniel, ^{w[illia]m}" — 4D row-anchored order: "Richard , Daniel[l]△ , Launcelott , <w>m , <T>riftram△" → TNA (names class).
- B13. **Close:** baseline "[b]ut onely [gave] [d]irecion for the drawinge thereof" — 4D: "**not** onely ^△ give <d>ireccon [?] ... for the <d>rawinge [or fra?]minge△ thereo[f]." — not-vs-but + a caret + a possible drawinge/framinge doublet → TNA-light.
- B14. **"Dauidd" (4D native, band 2) KILLED by 4D's own eB:** "-ell" termination ×3 sightings → "Daniell/Dauie[l]△ — converges with the baseline's "Daniell". (Self-correction, logged for method.)

C. NEW RECOVERIES (novel vs baseline; ledger-grepped):

- C1. **R19 FULL-LINE STRIKE partially recovered — the baseline's explicit verification target:** "<w>[i]thdrawe△ th[?] h[i]s <f>uite△ [?]d th[i]s ext [ac]quainted△ {un}to△ the <f>d [?]" — **a struck clause about WITHDRAWING HIS SUIT**, imperfectly cancelled (surviving "Richard Bulkley ; att" join broken) — TOP TNA.
- C2. **The quote is LONGER than the baseline's version:** opening "<g>eorge△«or»[heere?] is a longe ill , " — "is a longe Bill" (both tiles, clear) is ABSENT from the baseline. Quote-opening crux: letterforms favor "george" (×2 sightings, g-descenders, no h-ascender) **but the deponent is REES ap Jevan Lloyd (baseline header) — a "george" vocative to him conflicts with the deponent's forename** (ledger A1's "George LI[?]" is the Art-1 HEARER, a different man; possibly present/relevant?) — sense re-weights "heere" → **TNA TOP with both weights stated.**
- C3. **R40 "ffloude e[fq?]"△ — a THIRD denied procurer absent from the baseline** (§004R b7–8 has only Penrith + catch-all). Body eB-affirmed ("ffi"+"oude"; ffowler/ffouke disfavored). **Cross-link candidate: "Jevan ffloude" of 001/002 (ledger D2)** — a forename may hide in the unread R39-tail/R40-head seam → TNA TOP (names).
- C4. **R44 self-authorship verb: "<C>ompofof"△ favored over "caufed"** — fills the baseline's gap ("did himself ... [gap]"); if "composed," Lloyd asserts authorship in the strongest form → TNA TOP.

- C5. Scribal-apparatus census new to 004R: strikes R#1(R2), R#3(R12), R#4(R15 ~~Courte~~), R#5(R19 full line), R#7(R35), R#9(R44) CONFIRMED; R#2(R11) demoted to ink-blot; R#6(R21 ~~in~~) plausible Δ ; R#8(R41) demoted to idiom-stroke (favored) Δ ; interline-candidate R#i1 (R45 caret $\wedge$ after "onely"). Left page: strikes #0–#4 + interlines #1–#4 (see left blocks).
- C6. **L4 judge-predicate at letterform level:** "[Justice[s]?] Δ o[f] . A[ssi]ze Δ o[f] the (C)ountie o[f] (A)[...]" — the baseline's "Justice of Assize" formula anchored to letterforms (number Δ).
- C7. Virgules (||) as live punctuation at L22/L23; the (p̄)-brevigraph resolution (L2/L10); the L27 time-marker (B4); R5 "putt" resolved; R22 "fayinge" Δ ; R25 "brought" recovered; R46 "Edw[?]"-fragment dissolved (pen-lift).

D. TNA ARBITRATION ITEMS (004 consolidated, priority order):

1. **R6 name-slot: "S[i]r Rich[ard]" vs "<T>riftram" (TOP)** — controls the answer-4 list membership (B7; anaphora $\times 4$ vs letterforms; reconcile with ledger D6).
2. **R28 quote opening: "george" vs "heere" (TOP)** — letterforms vs deponent-identity sense (C2); names-above-all.
3. **R40 "[?] ffloude e[fq?]" (TOP)** — identity + the possible forename in the seam (C3; $\rightleftharpoons$ Jevan ffloude 001/002).
4. **R19 under-rule text (TOP)** — the withdrawe-his-suite struck clause (C1).
5. **R44 "compofed" vs "caufed" (TOP)** — the self-authorship verb (C4).
6. **L32 writen-vs-certen + sing./plural (TOP — wording only; the physical-writing FACT is eB-affirmed).**
7. **L3 (R/N)ithgale knot + A[n/i]e + baseline's "Richard" (B1).**
8. L27 (Sh)er[?]ing time-marker (B4). 9. faulte/facte baseline correction (B3). 10. Interr-vs-Entred formula class ($\times 3$ on 004; $\rightleftharpoons$ 003 delta C8). 11. Daniell/Dauie ll minims + both list orders (B12/B14). 12. Penrithe P- vs-F (P favored). 13. there-vs-here (B5). 14. R2 ~~ff[?]~~ vs baseline "Sir" (B6). 15. "person or persons" vs "any other Bulkley" (B8). 16. R11 "or the verie like in effecte" presence (B11). 17. R34/35 write-vs-were + denied verb; R36 tail; R37/38 connectors + -cions suffixes; R38 "[?]arri[?]" ; R41 idiom-bar; R42 Ra knot; R45 caret content; R46 "[or fra?]minge"; L38 bar-vs-strike; L16 "[not?]" ; L9 "[bill?]" ; L5 allocation; L6 ministringe object; L25 interline span; L28 speake-vs-heare; R24 tail; R21 ~~in~~; the R0/R1 "thofe w[?]" word (writinges = baseline-supplied).
