

WORKING LINE INDEX — MEMBRANE 006 (P4D-6)

Per-leaf line index (census · revision stratum · eB dispositions · delta log)

Source	_WORKING_006_LINE_INDEX.md
Integrity	sha256 a21d42397a10 · rendered 2026-07-09
Status	<i>Derived render for review. The markdown source file governs; the modernized layer is never quotable; all readings are provisional pending the commissioned professional transcription (names above all). Canonical apparatus: _PRECISION_PASS_LEDGER.md; method: TRANSCRIPTION_AND_ANALYSIS_METHODOLOGY.md.</i>

How to read this render (conventions legend)

striketthrough	struck in the manuscript (source: <code>~~text~~</code>)
superscript	scribal interlineation or raised letters (source: <code>^text^</code> , <code>m^r</code>)
shaded serif span	diplomatic text quoted inline (source: <code>`text`</code>); conventions inside are rendered too
boxed serif panel	diplomatic transcription block
gray italic <code>[[...]]</code>	pass-annotation — editorial apparatus, NOT manuscript text
CONFIRM UPGRADE LEAN CONFLICT	delta-log verdict class: green = confirmed/convergent · blue = upgraded/new · amber = lean/open/variant · red = retraction/conflict
<code>[?] / [...] / [] · « » · · △ ✓ eB X ★</code>	sigla printed verbatim per methodology §6/§9

Scan: 8368179_STAC_8_203_38_006.jpg (5109×4227) · double-page opening (same class as 002/003/004/005) **Strips:** La x0.03–0.30 · Lb x0.25–0.53 · Ra x0.52–0.78 · Rb x0.73–1.00 × 8 bands · scale 1.12 · q90 · overlap 0.25 · nat+eB → 64 tiles at crops/stac_p4d/crop_p4d006* **Method:** native sweep per column → eB queue → eB resolutions → census → delta vs baseline

_WORKING_LLOYD_DEPOSITION_003R-007.md §006L/§006R **Baseline expectation (checked before cutting):** LEFT = Lloyd answers 8(tail?)–9–10(opens) — recognizance-forfeiture action vs Howell Lewis; counsel-advised suits "according to the Lawe"; wrongs "in cominge to London"; answer 9 = the bill-copy shown to Sir Richard Bulkeley as prospective witness + "at all that day" denial; answer 10 opens at torn foot. RIGHT = answers 10–12 — warden's-man word-passing denial; Towneley "of Councell ... in fome of his Law caufes"; answer 11 letter/token + Towneley-payment denial (mirrors Art. 11/14 theory); answer 12 Lord Chancellor petition + "divers kinsmen in London" sureties. Both feet torn per baseline. **Line-tilt join rule (family trait):** lines rise left→right; La row N joins the Lb row one visual step higher (same for Ra→Rb). Seam-overlap words (x0.25–0.30, x0.73–0.78) lock joins and give independent second sightings.

Conventions: [?] uncertain · [...] / [] supplied/illegible · ^{word} interlineation · ~~text~~ scribal strike · «or» in-line insertion · △ provisional · ✓eB = eB-verified · ⟨x⟩ = expanded/normalized letterform · || = scribal virgule · ⟨p̄⟩ = pre- brevisgraph · ⟨l⟩ = long s

LEFT PAGE (006L) — NATIVE SWEEP

Band 1 (La b1 + Lb b1, src y 0–660): page head TORN/ragged (text begins immediately at the surviving edge — the opening of this leaf's first surviving line is mid-answer-8, matching the 005R torn foot). Seam-locks: "at ⟨W⟩eftm̄" (La interline right edge ⇌ Lb top-left corner tail "—eftm̄"), "againft the" (La r1 tail ⇌ Lb r1 head "—infthefd"), "the faied" (L4). Lb r1 "⟨H⟩owell ⟨L⟩ewis" is LARGE and clean — best sighting of the name in the file so far.

- **L1:** «BIG FLOURISHED TOKEN»[?]△△ at ⟨W⟩eftm̄ againft the ⟨l⟩d ⟨H⟩owell ⟨L⟩ewis vp[on — edge]
- flourish-token shape: large open bowl + double sweep, then ⟨rr/ve⟩ + ⟨eg/es⟩ + tall ⟨fh/q̄⟩-class finish. Candidates NOT asserted (one shape-consistent guess "⟨E⟩xcheq̄uer" recorded for the queue ONLY — forum-name wish-fulfilment risk, treat like R33/Barker class). eB queue #1.
- **L2:** the ⟨ff⟩orfeiture⟨s⟩[?]△ of a ⟨R⟩ecognizaunce ⟨Wh⟩[...]△ [edge]
- big flourished R on "Recognizaunce" ✓ nat; singular/plural -s △; the ⟨Wh⟩[?] tail-word ⟨Wh⟩[ich]? Wh[ereupon]? eB queue #2.
- **L3:** ⟨th⟩is ex⟨t⟩ ⟨l⟩aieth that no ⟨p⟩[er]fon or ⟨p⟩[er]fons pa[id?]△ [edge]
- **L4:** anie ⟨p⟩[ar]tes[?]△ of the ⟨l⟩aied charges besides h[im?]/th[is?]△ [edge]
- baseline reads "any p[ar]te ... besides [this examinant] himself" — La shows a possible plural "p̄tes"; tail token h—/th— cut at edge. eB queue #3.
- (next row descenders at b1 foot — band 2)

Band 2 (La b2 + Lb b2, src y 396–1188): overlap re-shows L2–L4 heads/tails (all consistent). NEW STRUCTURE: an interline insertion with marginal caret Λ at La (small module, crammed between main rows, containing its own strike): **L#i1** «was moved to ⟨→⟩ bringe» — the baseline's "he was moved to [bring]" is apparently an INSERTION over the main line. A second reduced row lower = the baseline's known interline **L#i2** "in cominge to London" (+

possible tail "<th>er(e)[?]"). One struck token-pair (STRIKE L#1) before "made knowne". One row does NOT appear in the baseline at all (L6 "<A>ccon to <eu>get[?] him")  .

- **L5:** <...>[?]  <th>is[?] ext him fel(f) || . And that he <...>[?]  « L#i1: was moved to <=br> bringe » [caret ^ in La margin]
- main-row tail after "And that he" unclear on nat (baseline: "was moved to [bring] the said [acci]on[s]") — if "was moved to bringe" is wholly interlined, the main row must carry different/struck matter. eB queue #4 (структура).
- **L6:** <A>ccon[?]  to <c/e>(u/n)ge(t)[?]   him — NOT in baseline. Candidate shapes only: "accion to euict him"? / "to engage him"? — none asserted. eB queue #5.
- **L7:** ffor fuch || <W>ronges as he had <f>uftained — edge] 
- **L8:** fuftained , « L#i2: in cominge to <L>ondon <th>er(e)[?] » [second small caret ^ lower in La margin]
- baseline marks "in cominge to London" interlined ✓ convergence; my possible extra tail-word "<th>er(e)/<Wh>er(e)[?]" beyond baseline. eB queue #6.
- **L9:** <Ch>th>e(d)[?] <G>oo(d)[?]   [STRIKE L#1] made <k>nowne <th>ofe[?]/<th>e[?] <f>d grie[ves?] 
- baseline supplied "[those] wronges" — nat leans "thofe/the fd grie—" (grieves/grievances?). eB queue #7 (strike contents + the grie- token).
- **L10:** <w>ronges[?]  vnto <C>ouncell <&>[?] <th>at <th>ey — edge] 
- (band 3 for next rows)

Band 3 (La b3 + Lb b3, src y 924–1717): seam-locks: "advifed/advized" (L11), "remember" (L14). Overlap re-shows L8–L10. REVISION to the L9/L10 parse: "made knowne" is followed by a RAISED, smaller-module token-run "<th>ofe[?] <f>d grie(u)—[?]" — possible interline **L#i3** (a caret ^ sits one row lower, under the "Councell" row tail — insert-point geometry UNRESOLVED  ); the main chain would then read "made knowne « thofe fd grie[vous?] » || Wronges vnto Councell" — "grievous wronges" coheres but is NOT asserted. eB queue #7 expanded.

- **L9 (revised):** <Ch>th>e(d)[?] <G>oo(d)[?]   [STRIKE L#1] made <k>nowne « L#i3: <th>ofe[?] <f>d grie(u)[ous?]  »
- **L10 (revised):** <W>ronges vnto <C>ouncell <&>[?]/<wh>o[?]  <th>at <th>ey/he — edge]  [+ caret ^ below this row's right zone]
- **L11:** was by <th>em ad(v)ifed || [adv]ized to <p>[ro]fecute <th>[e — edge] ✓ (seam-lock "advifed"; baseline convergence)
- **L12:** <f>d[?] <fuites/reco—>[?]   accordinge[?]  <vn>to[?]/<m>o(r)e[?]  the <L>awe .
- baseline supplied "[suits]" and "[the]"; La head token genuinely ambiguous at nat (fuites vs a reco- form); the pre-"Lawe" token also unfixed. eB queue #8.
- **L13:** <T>o the 9 . <In>terr[og?] this ext faieth that <h>[e?]  ✓ (answer 9 opens; big curled T; "9" firm on nat)
- **L14:** doth not remembe(r) || [re]member <wh>e(th)er <h>e <h>ad anie[?]  ta[lke — edge] (seam-lock "remember")
- **L15:** w(i)th the <f>d <S>[i]r <R>ichard ulkley touchinge <th>[e?]  — "Sr Richard Bulkley" LARGE and clean in Lb
- **L16:** [fai]ed[?]  ill in the <S>tarrechamber (heads into band 4; big flourished S)
- (band 4 for next rows)

Band 4 (La b4 + Lb b4, src y 1453–2245): seam-locks: "terme or" (L17), "talke" (L18), "ext" (L21), "would" (L22). L16's head firmed to "the ⟨f⟩d ⟨B⟩ill". The answer-9 witness-preparation core is HERE and largely clean. INTERLINE L#i4 "about ⟨th⟩e" with caret ^ confirmed (baseline also marks it interlined ✓); before the caret, after "it was", a dash-like stroke — possibly a tiny struck token under it △.

- **L17:** the laft teṛme or || [ter]me or not ; ⟨B⟩ut ⟨if⟩[?] △ this ex[t]
- **L18:** ⟨h⟩ad then anie talke || talke ⟨—⟩ or conference w(i)th[?] △
- **L19:** the ⟨f⟩d ⟨S⟩[i]r ⟨R⟩ich[ard] || ⟨R⟩ichard , it was ⟨—⟩[?] △ «^{L#i4: about ⟨th⟩e}» ⟨fh⟩ewinge[?] △
- the post-"it was" dash/possible micro-stroke = eB queue #10; "fhewinge" big-flourish lean (baseline "[sh]ewinge").
- **L20:** ⟨h⟩im the ⟨C⟩opie(s)[?] △ of the ⟨f⟩d ⟨B⟩ill at ⟨fu⟩ch
- **"Copies" PLURAL-lean on BOTH sightings** (La "Copies", Lb "—pies") vs baseline singular "Copie" — eB queue #9.
- **L21:** tyme as this ext || [ext] told the ⟨f⟩d ⟨S⟩[i]r ⟨R⟩ichard
- **L22:** that this ext would || would ⟨v⟩fe ⟨h⟩im as a ⟨w⟩ittnes ✓
- (band 5 for next rows)

Band 5 (La b5 + Lb b5, src y 1981–2773): overlap re-shows L20–L22 (L20 "Copies" plural-lean AGAIN on the La sighting). STRIKE L#2 "⟨th⟩e" inside L23 confirmed = the baseline's "concerning the some" ✓ convergence.

- **L23:** conceṛninge ⟨th⟩e [STRIKE L#2 ✓] ⟨f⟩ome of the matters
- **L24:** of the ⟨f⟩d bill . || ⟨A⟩nd further this ext ⟨f⟩ai⟨e⟩th[?] △ (big flourished And)
- **L25:** that he had not || not to his ⟨k⟩nowledge(s)[?] △ ⟨&⟩[?] △
- "knowledges" plural-lean vs baseline "knowledge" — eB queue #11; La "not" sits raised — possible interline insert △ — eB queue #12.
- **L26:** [⟨&⟩] now remembraunce , || anie talke at all
- **L27:** w(i)th the ⟨f⟩d ⟨W⟩m || ⟨B⟩ulkley the laft teṛme
- **L28:** [touchinge the fd?] △ ⟨B⟩ill ; ⟨N⟩either[?] △ did ⟨th⟩[is — edge] (band 6 re-shows)
- (band 6 for next rows)

Band 6 (La b6 + Lb b6, src y 2509–3302): seam-locks: "B[ill]" (L28), "conferre" (L31), "as" (L33). L28's head firmed to "touchinge the fd". The Thursday/Warden sequence is clean. NEW: **STRIKE L#3** — a heavily inked struck token ABOVE the L30 verb (three tall ascenders + loop, ⟨W⟩ard—? ⟨ff⟩leet—? false start?) △△ eB queue #13. The L30 verb itself: "att⟨—⟩ed by the" — baseline marks "att[ended?]" ; letterforms allow attended/attached (= arrested — legally loaded) — eB queue #14, treat like the 005 "acquited" lesson: letterforms first, sense second.

- **L28 (revised):** touchinge the ⟨f⟩d || ⟨B⟩ill ; ⟨N/M⟩either[?] △ did th⟨is⟩[?] △
- **L29:** ext , ⟨v⟩ppon the || ⟨Th⟩urfdai after ⟨h⟩e was ✓
- **L30:** [above: STRIKE L#3 ⟨ff/ffW⟩—△△] att⟨—⟩ed[?] △ by the || ⟨W⟩arden of the ⟨ff⟩leete(s)[?] △ (ffleete/ffleets tail at fold edge)
- **L31:** man ⟨f⟩ecretlie[?] △ conf[erre] || [co]nferre w(i)th the ⟨f⟩d ⟨S⟩[i]r
- **L32:** ⟨R⟩ich[ard] ⟨B⟩ulkley[?] △ || in his ⟨ch⟩amber about ✓

- **L33:** the ⟨f⟩d ⟨B⟩ill as ll as is ⟨fu⟩ppofed ; ⟨N⟩either[?] △
- **L34:** [did this ext to his] remembraunce[?] △ ⟨f⟩peake[?] △ (heads into band 7)
- (band 7 for next rows)

Band 7 (La b7 + Lb b7, src y 3038–3830): seam-lock: "who" (L38). Answer 9 CLOSES mid-line at L36 with terminal flourish; answer 10 opens at L37 with big curled T. "paffed his word" (suretyship idiom) clean at Lb.

- **L34:** did this ext to ⟨h⟩is ll remembraunce ⟨f⟩peake ✓
- **L35:** w⟨i⟩th the ⟨f⟩d ⟨S⟩[i]r ll ⟨R⟩ich[ard] ⟨B⟩ulkley at all ✓
- **L36:** that day . [terminal flourish — ANSWER 9 ENDS] ✓
- **L37:** ⟨T⟩o the 10 ⟨In⟩teṛ[?] △ this ext ⟨f⟩aieth that he doth ("10" numeral firm on nat)
- **L38:** not ⟨k⟩nowe ⟨wh⟩o ll ⟨wh⟩o[?] paffed his ⟨w⟩ord to the ✓
- **L39:** ⟨W⟩arden of the ⟨ffl⟩eete ll ⟨ff⟩leete[?] △ ⟨M⟩an for his ⟨a⟩[ppearaunce?] △ (ffleete/ffleets tail again △ — queue with L30's)
- **L40:** [in the ⟨St⟩arrechamber[?] △ ⟨...⟩ nor (band 8 re-shows)
- (band 8 for next rows)

Band 8 (La b8 + Lb b8, src y 3566–4227, TORN FOOT): seam-lock: "in the" (L40, La tail ⇌ Lb head — clean double sighting). **CRITICAL FOOT FINDING: below L40 both strips show BLANK parchment (~2–3 line-heights) before the torn edge — NO descender traces.** L40 is the final written line of 006L; the tear cost margin, NOT text. The mid-sentence "nor" hand-off to 006R is scribal page-flow, not a lacuna.

- **L40 (full):** ⟨a⟩ppearaunce[?] △ , in the ll in the ⟨St⟩arrechamber , nor [PAGE ENDS mid-clause → 006R]
- "appearaunce" tail-form △ light; beneath it a deep double-V zigzag mark (descender-flourish class, not a letter-row) △.

LEFT PAGE (006L) — NATIVE CENSUS

40 surviving text lines (L1–L40) + 4 interlines (L#i1–L#i4) + 3 strikes (L#1–L#3). Foot torn but text-complete (blank parchment below L40). Content span: answer 8 (mid, from 005R hand-off) → answer 9 (opens L13, closes L36) → answer 10 (opens L37, hands to 006R at L40 "nor"). Baseline §006L structure fully confirmed; new structure recovered: L#i1 (was-moved-to-bringe insertion), L#i3 (thofe-fd-grie— candidate interline), L6 (a row the baseline does not have), STRIKE L#1/L#3 (unrecorded in baseline).

LEFT eB QUEUE (006L) — 16 items

- L1 flourished head-token** △△ — bowl+double-sweep, ⟨rr/ve⟩+⟨eg/es⟩+tall finish. Guarded guess "⟨E⟩xcheq[uer]" (forum-name wish-fulfilment risk — R33/Barker-class handling: describe, don't assert).
- L2** "fforfeiture(s)[?]" sing/plural + tail "⟨Wh⟩[...]" (Which/Whereupon?).
- L4** "ptes" plural vs baseline "p[ar]te" + tail "befides h[im?]/th[is?]" .
- L5 structure** — main-row tail after "And that he" (what does the MAIN line carry if "was moved to bringe" is interlined?) + strike contents inside L#i1.

5. L6 "<A>ccon[?] to <c/e>(u/n)ge<t>[?] him"   — NOT in baseline; candidates {euict? engage?} unasserted.
6. L8 / L#i2 interline tail — extra word "<th>er<e>/<Wh>er<e>[?]" beyond baseline's "in cominge to London"?
7. L9 STRIKE L#1 contents (<Ch/th>e<d> <G>oo<d>?) + L#i3 "<th>ofe <f>d grie<u>[ous?]" interline-vs-main + caret-
Λ geometry (sits under L10's tail).
8. L12 "<f>d <fuites/reco—>" head token + pre-"Lawe" token ("<vn>to/<m>o<r>e/the").
9. L20 "<C>opie(s)" PLURAL double-sighting vs baseline singular "Copie".
10. L19 post-"it was" dash — micro-strike beneath L#i4 "about the"?
11. L25 "knowledge(s)[?]" plural + following "<&>[?]".
12. L25 raised "not" — interline insert or line-rise?
13. L30 STRIKE L#3 contents (<W>ard—? <ff>leet—? false start)  .
14. L30 verb "att<—>ed" — attended vs attached (arrest sense — letterforms first; 005 "acquited" lesson).
15. L30/L39 "ffleete/ffleets" tails (both at fold edge) + L31 "fecretlie" confirm.
16. L28/L33 "Neither" initial forms (N/M) + L40 "appearaunce" tail + sub-row zigzag mark class.

LEFT PAGE (006L) — eB PASS

Band 1 (La/Lb b1 eB):

- **#1 L1 flourished head-token** —   **RETAINED**. eB sharpens the anatomy: enormous open bowl-initial (E/C/R-class) with double sweep, mid-cluster of 2 humps + descender loop (<eg/eq/es>-class), tall terminal double-ascender with up-right flourish. Both shape-consistent candidates ("<E>xcheq[uer]" forum-name; "<R>ecogl" echo of L2) are wish-fulfilment-risk → NO reading asserted; TNA arbitration mandatory. Interline "at <W>eftm̃" above its right end: ✓eB clean.
- **#2 L2 — "fforfeiture" ✓eB SINGULAR**. The nat's possible terminal <s> is a hairline ligature upstroke into "of", not a formed letter — plural WITHDRAWN. Tail-word: eB (Lb) shows a SHORT token, <W> + minim cluster + raised <ch>-class finish → "<w>[hi]ch"-lean  (length excludes "Wherevpon").
"<R>ecognizaunce" big-R ✓eB.
- **#3 L4 — "ptes" PLURAL-lean holds**  (eB shows a formed -es tail loop after p̃t, unlike L2's hairline; vs baseline singular "p[ar]te" — TNA list). Tail after "befides": tall ascender-PAIR at the cut → "th[is]"-lean  (coheres with L5 "this ext him felf"; h-alone disfavored). L3 "pa[id?]" tail still gutter-cut  retained.
- Band-1 bonus: Lb "<H>owell <L>ewis" ✓eB — flawless, the file's best sighting of the name confirmed under eB.

Band 2 (La/Lb b2 eB):

- **#4 L5 structure — PARTIALLY RESOLVED (structural hypothesis firmed, lean not asserted)**. eB shows the L#i1 insertion is TWO crammed rows: "was moved to" / "X bringe", caret Λ in La margin ✓eB. Reconciled chain (LEAN ): main "...him felf . And that he <the>[?] <fd>[?]" + «was moved to X bringe» → L6 "<A>ccon<s>[?]" to <—> him" → L7 "ffor fuch Wronges..." — i.e. "he «was moved to bringe» the fd Accons to <—> him ffor fuch Wronges as he had fultained in cominge to London". The struck token inside L#i1 (between "to" and

"bringe"): short, head-ascender + 2–3 minims, horizontal bar — candidates {false start "br—/bri—", "deale"} NONE asserted △ retained. L5 head-token: eB shows bowl-flourish + "him felf" (the bowl may be the ext-brevigraph) △ retained.

- **#5 L6 — MAJOR REVISION ✓eB(structure)/△△(verb).** The row is NOT alien to the baseline: "<A>c̄cōn<s>[?]" = the baseline's supplied "[acci]on[s]" (A/R-class initial △; La-portion of the line blank/indented — main-vs-interline geometry still open). The VERB is the new content: <c/e/r><u><g>e<t/e> with **g-descender CONFIRMED on eB → "euict" EXCLUDED (WITHDRAWN)**. New sense-coherent shape-candidate: "reuenge[?]" (minim-compression normal for this hand; "to reuenge him ffor fuch Wrongs" = EME reflexive-without-self, fully coherent); "cudgell" remains shape-possible but sense-loaded (assault) — 005-acquited handling: NO reading asserted, double-△, TNA arbitration list.
- **#6 L8/L#i2 — extra tail-word REAL ✓eB.** A token stands after "London" beyond the baseline's "in cominge to London" — form "<th>er<e>/<wh>er<e>" △ retained (loop-descender visible; word firmly present).
- **#7 (first look) — STRIKE L#1 contents still illegible under eB** (bar too heavy; b/G-class ascender + double-bowl beneath) △△; the raised "<th>ofe[?] <f>d grie—" cluster re-sighted at Lb foot — centers in band 3.
- L#i2's second caret $\wedge$ (La margin, under "fultained" head) ✓eB confirmed.

Band 3 (La/Lb b3 eB):

- **#7 — STRUCTURE RESOLVED ✓eB / readings △.** L#i3 is a TRUE INTERLINE (smaller module, raised, between L9-main and the row above) and the caret- $\wedge$ geometry now coheres: the $\wedge$ sits in the seam zone at the head of the "vnto Councell" row = insertion point before L10's "Wrongs". Chain FIRM: "made knowne «<th>ofe/<th>efe[?] <f>d grie<u>[ous?]>» Wrongs vnto Councell" — letters g-r-i-e firm on eB, tail <u>[ous?] △ retained (grievous/grievances both open; "grievous Wrongs" coheres but NOT asserted). **STRIKE L#1 contents: ILLEGIBLE under eB △△ retained** — extent firmed: a token-PAIR (~8–10 letter-widths; short token + bowl token, b/G-class ascender + double-bowl beneath the bar), ending just before "made". TNA arbitration list.
- **#8 — PARTIAL ✓eB.** L12 head token: eB shows f/ff-class DOUBLE-ASCENDER head + bowl + minims + rounded tail → "fuite<s>/fute"-lean △; the "reco—" alternative WITHDRAWN (no r-bowl head). Pre-"Lawe": "<vn>to[?] the[?]"-lean ("more" disfavored); "<L>awe ." + terminal point firm ✓eB. L12 (joined): "<f>d <fu>ite<s>[?] accordinge <vn>to[?] the[?] <L>awe ."
 - Band-3 bonus: **L11 FULL ✓eB** "was by them advifed || advized to <ṑ>[ro]fecute the" (+ a micro-tick/possible caret above the row before "ṑfecute" △ noted — may be the f head-stroke); L10 tail "<f>[?] that <th>ey[?]" △ retained; L13 "To the 9 ." ✓eB; L14 "anie[?]" △-light retained ("time" shape-possible); L15 "Sr Richard Bulkley" ✓eB huge+clean; L16 "[B]ill in the <St>arrechamber" ✓eB. L#i2 tail-word: "<th>er<e>"-lean now ahead of "wher<e>" (no W-double-bowl at initial) △.

Band 4 (La/Lb b4 eB):

- **#9 — "<C>opies" PLURAL ✓eB(lean).** Formed -es cluster on ALL FOUR sightings (La nat, Lb nat, La eB, Lb eB seam-overlap "<—>o<pi>es of"). Confirmed DELTA vs baseline singular "Copie" — substantive (plural = multiple copies of the bill circulating pre-hearing). △-tag kept solely as baseline-variance → TNA arbitration list.

- **#10 — RESOLVED ✓eB: NO struck token.** The post-"it was" mark is a short baseline FILLER/LOCATOR DASH at the L#i4 insert point (no letter-bodies beneath); caret Λ + interline "about the" crisp on eB. "Micro-strike" hypothesis WITHDRAWN. Same dash-class mark also present after L18's "talke" (noted).
- Band-4 bonus: L17 "But <if>" lean FIRMED (i-dot visible) ✓eB-light; **L16 full ✓eB** "the fd Bill in the <St>arrechamber" (big flourished St); **L22 full ✓eB** "that this ext would ll would <v>fe <h>im as a <w>ittnes" — the witness-preparation line verified end-to-end; L19 "<f>ewingee" double-ascender ✓-lean; L21 "told the fd Sr Richard" ✓eB; L14/L18 "anie" stays △-light (anie/time flip persists both strips).

Band 5 (La/Lb b5 eB):

- **#11 — "<kn>owledges" PLURAL ✓eB.** Formed terminal -es (secretary k as f-class ligature + "-edges" curl). Second confirmed plural-DELTA vs baseline ("knowledge") → TNA arbitration list. Following token = ampersand-class "&)" ✓eB-lean (figure-8 form with descender loop). Chain: "had not to his knowledges & now remembraunce anie talke at all w[i]th the fd Wm Bulkley the laft terme" ("now" = EME adjectival 'present' idiom — retained as written).
- **#12 — RESOLVED ✓eB(lean): LINE-RISE, not an insert.** "not" is full-module with NO caret anywhere; the apparent raise is the family left→right line-tilt caught at the La strip edge. Interline hypothesis WITHDRAWN.
- **STRIKE L#2 "<th>e" DOUBLE-CONFIRMED ✓✓eB** (La row 4 direct + Lb row 4 seam re-show) = baseline's "concerning the some" exactly.
- Band-5 bonus: "Copies" plural sightings #5–#6 (La/Lb b5 overlaps) — plural now solid across six sightings; L23 tail "fome of the matters" ✓eB; L27 "Wm Bulkley the laft terme" ✓eB clean; L24 "faieth" △-light retained (fold-cut); the "anie" a-bowl compression now consistent across L14/L18/L26 — logged as scribal habit, △-light retained.

Band 6 (La/Lb b6 eB):

- **#13 + #14 (LINKED) — CORRECTION HYPOTHESIS, lean only △△.** STRIKE L#3 resolves in shape: THREE tall parallel ascenders + bar, sitting directly above the verb — shape-compatible with a false-start "attend—" (tt+d = 3 tall). The verb beneath: "atta(ch)ed"-LEAN — a-BOWL after "att" (not e), compact (ch)-class cluster, NO minim-pair+d of "-nded". Joint hypothesis (NOT asserted, 005-acquitted handling): scribe wrote "attend—", struck it, wrote "attached" (= ARRESTED). Sense-chain if confirmed: "Neither did this ext , vppon the Thurfday after he was attached by the Warden of the ffleete(s)[?] man fecretlie conferre w[i]th the fd Sr Richard Bulkley in his chamber about the fd Bill as is fuppoed" — arrest-vs-attendance changes the Thursday-scene legally. BOTH tokens → TNA arbitration list, double-△ (wish-fulfilment-risk class: vivid sense).
- **#15 — PARTIAL.** "<f>ecretlie" ✓eB(lean) CONFIRMED (f-e-cr-e-t-l-i-e legible). L30 "ffleete/ffleete(s)" tail STILL △ (fold-edge shadow) — the -s is structurally live (possessive would bind "man": "the Warden of the ffleete's man"); defer to L39's instance (band 7).
- **#16 — PARTIAL.** BOTH "Neither" initials (L28, L33): double-arch N-class ✓eB(lean) — M excluded (would need three arches). Punctuation before each: semicolon-class △-light.
- Band-6 bonus: L29 "ext , vppon the ll Thurfday after he was" ✓eB; L32 "in his chamber about" ✓eB clean; L33 "as is fuppoed" ✓eB (big ff); L28 head "touchinge" △-light retained (-inge tail reads m—e-like under eB).

Band 7 (La/Lb b7 eB):

- **#15 — RESOLVED(lean) ✓eB.** L39 tail reads "<ff>leete <M>an" — terminal -e + hairline connector, NO formed -s; the possessive is EME **unmarked genitive by juxtaposition** ("the Warden of the ffleete Man" = the Warden-of-the-Fleet's man; capital-ish M on "Man" noted, matches baseline's form). L30's fold-△ instance parallel-resolves to "ffleete" (lean). "fecretlie" third sighting consistent ✓.
- **Answer boundaries FIRM ✓✓eB:** L36 "that day ." + terminal space-filler flourish (big left-sweeping horizontal+loop to line-end) = ANSWER 9 CLOSES; L37 "<T>o the 10 <In>terr this ext faieth that he doth" — numeral 10 dead clean = ANSWER 10 OPENS.
- **L38 ✓✓eB:** "not <kn>owe <wh>o || <wh>o paffed his <w>ord to the" — suretyship idiom verified end-to-end (big ff in "paffed").
- **Band-7 bonus:** L34 "did this ext to his || remembraunce <f>peake" ✓eB; L35 "ulkley at all" ✓✓eB (very clean); 4th "Neither" N-class sighting (L33 re-show); L39 head "<W>arden of the <ff>—" ✓ joins the Lb tail.

Band 8 (La/Lb b8 eB, torn foot):

- **#16 — RESOLVED(class).** L40 head = "app(ar/ear)aunce"-class ✓ (appearance sense firm; exact vowel-cluster spelling △-light, "apparaunce"-lean in this view) + comma ✓. The sub-row deep double-V zigzag = **pp-descender pen flourish** — not a letter-row, not a paraph ✓eB. ("Neither" N-initials already resolved bands 6–7 → item CLOSED except the spelling micro-△.)
- **L40 tail ✓✓eB:** "in the <St>arrechamber <, > nor" — the page's final word "nor" CLEAN; mid-clause hand-off to 006R confirmed. (Possible word-split "Starre chamber" in this view △-micro.)
- **FOOT TEXT-COMPLETE ✓✓ RE-VERIFIED under eB, both strips:** blank stained parchment below L40, ZERO ink strokes, then the torn edge — the tear cost margin, not text.
- **Band-8 bonus:** L37 "10" third dead-clean sighting; L38 "paffed his word to the" re-clean; L39 "ffleete <M>an for his" re-shown (+ an unread flourishy mark at Lb right edge after "his" △-micro, not load-bearing).

LEFT PAGE (006L) — CENSUS FIRM (post-eB)

40 lines + 4 interlines (L#i1–L#i4) + 3 strikes (L#1–L#3); foot torn but TEXT-COMPLETE (eB-re-verified).
Answer 8 (mid) → answer 9 (L13–L36) → answer 10 (L37 → "nor" hand-off to 006R). All 16 queue items worked: 8 resolved ✓eB, 5 retained △ (leans recorded), 3 double-△ for TNA arbitration.

eB-pass scorecard:

- **Resolved ✓eB:** #2 "fforfeiture" SINGULAR (plural withdrawn) · #10 locator-dash, no strike (withdrawn) · #12 raised-"not" = line-rise (insert withdrawn) · #15 "ffleete" unmarked genitive + "fecretlie" · #16 N-initials + apparaunce-class + zigzag = pp-flourish · #6 L#i2 tail-word REAL ("ther(e)"-lean) · #7-structure L#i3 = true interline, caret before "Wronges" · #5-structure L6 coheres with baseline's "[acci]ons".
- **Retained △ (leans):** #3 "p̄tes" plural-lean · #8 "fuite(s)"-lean (reco- withdrawn) + "vnto the Lawe"-lean · #4 L5 structure-lean ("he «was moved to bring» the fd Accons...") · "anie" a-bowl habit (L14/L18/L26) · L28 "touchinge" · L24 "faieth".

- **Double-△ → TNA arbitration:** #1 L1 flourished head-token (guarded "Excheq[uer]" guess — Barker-class, describe don't assert) · #4/#5 L#i1 strike contents + the L6 verb ((c/e/r)(u)(g)e(t/e), g-descender firm; candidates reunge/cudgell — neither asserted) · #7 STRIKE L#1 contents (token-pair, illegible) · #13/#14 STRIKE L#3 (3-tall-ascender token) + verb "atta(ch)ed"-lean — correction hypothesis ~~attend~~ → attached (= arrested), sense-loaded, NOT asserted.
- **Confirmed DELTAS vs baseline (for the delta log):** "Copie(s)" PLURAL (6 sightings) vs baseline "Copie" · "knowledge(s)" PLURAL vs "knowledge" · L#i1 "was moved to X bringe" is an INSERTION (baseline reads inline) · L#i3 "<th>ofe [d grie(u)[ous?]" interline (absent in baseline) · L#i2 extra tail-word after "London" · STRIKES L#1/L#3 (unrecorded in baseline) · L12 "fuite(s)" vs supplied "[suits]" (converges) · "But if" firmed.

RIGHT PAGE (006R) — NATIVE SWEEP (Ra x0.52–0.78 || Rb x0.73–1.00, seam overlap x0.73–0.78; lines rise left→right, Ra row N joins the Rb row one visual step higher; seam words = double sightings)

Band 1 (Ra/Rb b1 nat, torn head): head torn on BOTH strips (dark ground, ragged edge; Rb loses its top-right corner). First surviving ink = mid-answer-10, continuing L40's "...Starrechamber , nor" hand-off ✓.

- **R1** (first line below tear): "<wh>ether anie p[er]fon or not || paffed his worde for" — matches baseline "nor whether anie p[er]son or not passed his worde for". Seam overlap re-sights "not pa—" ✓ join locked. "worde" shows a double-d-like shape ("wordde") △-micro → eB.
- **R2:** "this ext in <that>[?] behalfe || <;> ffor he faieth he" — "that" is an abbreviated tall-cluster (y^t-class?) △; "faieth" a/i minimis △-light; semicolon-class mark after "behalfe" △-light.
- **R3:** "did[?] not requeft anie || p[er]fon fo to" — "requeft" big-ff clean ✓; head token "did" loopy-d lean △. Matches baseline "he did not request anie p[er]son so to doe".
- **R4:** "doe . And <fur>ther[?]/<mo>re[?] he || <f>ai(eth)[?] <that>[?] ..." — "doe ." clean ✓ (answer-clause close + period); the And-<X>-he formula lean; tail under-resolved △ → eB.
- **R5:** "...<kn>ow<eth>[?] <not>[?] <that>[?] the[?] || <T>owneley[?] ..." — **first "Towneley" sighting** (Rb: T-bowl + o-w-n-e-l + descender-y; supports baseline's supplied "[the said] Towneley") — LEAN ONLY pending eB (name-class discipline).
- **R6:** bottom-of-crop fragments only (Ra: large dark strokes; Rb: "<th>at"-ish + an unread tail cluster) — defer to band 2 (0.25 overlap re-shows).
- **eB QUEUE (right page) opens:** R#1 "wordde" double-d micro · R#2 R2 "that"-abbrev cluster · R#3 R4 tail ("And further he faieth..." formula) · R#4 R5 "Towneley" + expected "was of Councell" clause.

Band 2 (Ra/Rb b2 nat): overlap re-shows R2–R5 tops ✓ (R3 head firms to "did" — two looped-d ascenders; R4's post-"And" token now reads ascender-FREE → "<m>o<r>e"-lean STRENGTHENS over "further").

- **R4 (revised lean):** "doe . And <m>o<r>e[?] he || ..." — "doe ." clean; the And-more-he opening suggests a deposition formula bridging to the Towneley clause.
- **R5:** "<kn>oweth[?]/<f>ai<eth>[?] <—> that || <th>at[?] he <c>annot[?]/<kn>ow<eth>-not[?] <f>ay[?] to his[?]" — the answer-10 CLOSE FORMULA between "And more he" and "of Councell" is under-resolved △△;

native suggests a "cannot fay/knoweth not" construction NOT in baseline's supplied bridge "[neither knoweth he that the said]" — POTENTIAL DELTA, lean only → eB priority.

- **R6:** "of <C>ouncell <w>[i]th <th>e || ...<M>r[?] <T>owneley <w>as[?]" — "**of Councell**" **SIGHTED DIRECTLY** ✓ (big-C bowl + oun-minims + cell; baseline carried it only as a queried supply "[was of Councell?]"). Towneley second sighting (T-o-w-n-e-l + y-descender) — lean, name-class. Word order vs baseline △ (native hints "...Towneley was of Councell" order resolves across R5→R7) → eB.
- **R7:** "ulkley in fome o[f] || ...<S>r[?] <Rich>ard[?] ...his Law caufes" — "Bulkley in fome o—" ✓ (fome/fonne minims, sense firm); "**Law caufes**" ✓✓ CLEAN (baseline "in some of his Law causes" confirmed verbatim); "Richard" sighted (R-i-<ch>[z-form]-a-r-d) lean.
- **R8:** big left-margin paragraph flourish + "<T>o <th>e 11 <l>nterr || this ext fai<e>th that he" — **ANSWER 11 OPENS** ✓✓, **numeral 11 dead clean**; same boundary-flourish grammar as L36/L37.
- **R9:** "did not carrie anie || l<ett>re or token <l>nce[?]" — "did not carrie anie" ✓; "**l<ett>re or token**" ✓✓ (baseline Art.-11 mirror confirmed); "fince" △-light.
- **R10:** "<th>e <l>d[?] <vi>th[?] day o[f] || october to <a>nie p[er]fon" — the October date-anchor re-sighted (numeral cluster △ → eB); "to anie p[er]fon" ✓.
- **R11 (bottom edge):** "<th>e County of <A>nglef[ey]— ..." — "the County of" ✓; "Anglefey" partial at edge, band 3 re-shows.
- **eB QUEUE adds:** R#5 answer-10 close formula ("cannot fay"-class cluster, potential DELTA) · R#6 Towneley confirm + possible "M" title · R#7 S^r-Richard superscript cluster · R#8 "fince" · R#9 vjth-day numeral · R#10 "Anglefey".

Band 3 (Ra/Rb b3 nat): overlap re-shows R8–R11 ✓ ("To the 11" numeral re-clean; "l<ett>re or token" re-clean; "Anglefey"-lean holds via tilt — the right-edge tall-A cluster is R11's risen tail, A-n-g-l-e-f-e-y △-light).

- **R9 (micro-revision):** "carrie" shows a trailing d-like stroke → "carrie<d>[?]" △-micro (may be flourish into "anie"; EME tense favors "carrie") → eB.
- **R11:** "or p[er]fon<s> <w>[i]th[in] || the County of <A>nglefey" — "**or p[er]fons**" **DELTA-candidate:** native gives the full doublet "to anie p[er]fon or p[er]fons wthin the County of Anglefey"; baseline reads only "to any p[er]son w[i]thin..." → eB confirm.
- **R12:** "ffrom the fd || <S>r <Rich>ard ulkley for" — "ffrom the fd" clean ✓; "Bulkley for" ✓; "Richard" third sighting (R-i-<ch>[z-form]-a-r-d) lean.
- **R13:** "anie <M>onie to be || paied or <d>elyu[er]ed <to>[?] this" — "**anie Monie to be**" ✓✓ CLEAN; "paied or delyu[er]ed" ✓ (baseline's supplied "[delivered]" confirmed); the "to-this" bridge cluster △ → eB.
- **POSSIBLE INTERLINE R#i1 + STRIKE R#1 (△△ structure):** below/around R13's head sits a SMALL raised token-pair ("or fent[?]"-class — candidates «or fent» / «except») above a SHORT HEAVILY-STRUCK token (~3–4 letters, horizontal strike). Neither in baseline. Geometry (which row it serves, insert-point) unresolved → eB PRIORITY.
- **R14:** "<N>either || doth this ext <kn>owe" — big-N "Neither" ✓ (5th N-sighting this membrane); "doth this ext knowe" ✓ lean (baseline's supplied "[know]" confirmed).
- **R15:** "that the fd <S>r <Ri>[chard] || ulkley & <W>^m" — "**Bulkley & W^m**" ✓✓ CLEAN (ampersand + superscript-m W^m; baseline "Rich[ard] Bulkley & W[illia]m" confirmed).

- **R16:** "ulkley[?] or either of them did <g>iue[?]/<g>raunt[?] or" — "or either of them" ✓ (baseline confirmed); the verb after "did" has a g/p-descender + raue-cluster: "giue"-lean vs "graunt" △ → eB (baseline "give or promise").
- **R17 (bottom edge):** "...<to th>e <f>d <M>r <T>owneley <a>nie —" — Towneley third sighting, now WITH the M^r title-lean ✓ (baseline "to pay to the ^{s[ai]}d M[r] [T]owneley"); band 4 re-shows.
- **eB QUEUE adds:** R#11 interline «or fent[?]»-class + R#12 STRIKE R#1 (short token, geometry) — PRIORITY · R#13 "carrie(d)" micro · R#14 "or p[er]fons" delta confirm · R#15 "delyu[er]ed to-this" cluster · R#16 "giue/graunt" verb · R#17 M^r-title confirm.

Band 4 (Ra/Rb b4 nat): overlap re-shows R13-head structure + R14–R15 ✓. **R#11/R#12 REVISED**

OBSERVATION: the heavy horizontal stroke extends LEFT toward the margin — may be a LINE-FILLER closing a short line (L36-class grammar), with the small raised pair being a risen line-TAIL rather than an interline; candidates now (a) interline+strike vs (b) short-line + filler + risen tail — still △△ PRIORITY.

- **R15/R16 row-structure FIRM:** R15 ends "...Bulkley & W^m"; R16 OPENS with the repeated surname: "ulkley or either o[f] || them did <g>iue[?]/<g>aue[?] or" — "Bulkley or either o—" ✓✓ clean this band (verb still △, g-descender + aue/iue).
- **R17:** "promife to pay to || the <f>d[?] <M>r <T>owneley anie" — "**promife to pay to**" ✓✓ CLEAN (big-P descender). **NEW STRUCTURE** △△: between "the" and "M^r" sits a SHORT TOKEN carrying a horizontal stroke — candidates: struck "fd", INTERLINED "fd" (baseline shows ^{s[ai]}d as an interline here), or the stroke is M^r's superscript bar → eB.
- **R18:** "fom or <S>oms o[f] || monie <r>ewarde or" — "**fom or Soms**" ✓✓ (capital-ish S on "Soms"); "**monie rewarde or**" ✓✓ (baseline "som or soms of monie, rewarde or recompence" confirmed).
- **R19:** "<r>ecompen[?] for his || <p>aines & care taken" — "recompence" letterform-lean (r-e-c-o-m-p-e-n-c-e traceable); "**paines & care taken**" ✓✓ ampersand clean (baseline verbatim).
- **R20:** "or to be taken in || the <—><f>d fuite in the" — "or to be taken in" ✓✓; "the fd fuite in the" ✓✓; a dash-class stroke before "fd" △-light (L#4 locator-dash grammar?) → eB.
- **R21:** "<St>arrechamber . || —" — "**Starrechamber .**" ✓✓ WITH PERIOD = **ANSWER 11 CLOSES**; Rb seam re-sights "—ber ." ✓. Below: bottom-edge fragments (boundary-flourish curve on Ra; an unresolved Rb fragment "...<f>urete[?]/<ch>a(rge)[?]"-class) → band 5.
- **eB QUEUE adds:** R#18 the "the <f>d M^r" cluster (struck vs interlined fd vs superscript bar) · R#19 R20 dash-class stroke · R#20 answer-11 close boundary (flourish + answer-12 opening formula, expect baseline's interlined "twelfth").

Band 5 (Ra/Rb b5 nat): overlap re-shows R19–R21 ✓ ("Starrechamber ." re-clean; two long virgule-strokes after the close △-light — likely flourish descenders). **ANSWER 12 OPENS.**

- **R22:** "<T>o <th>e <tw>elft(h) <l>nterr <th>[is] —" — **the ordinal IS INTERLINED** ✓ (**R#12**): small raised "twelft(h)"-cluster above the line, confirming baseline's "twelfth" caret-notation. Under-structure △△: possible numeral ("12"?) or caret beneath the interline — differs from the numeral-style "To the 10"/"To the 11" boundaries → eB.
- **R23:** "doth not <|>[?] <r>emember || whe<th>er vppon a" — "doth not remember" ✓✓; "whether vppon a" ✓✓ (Rb); a caret-like short mark between "not" and "remember" △ (stray stroke vs caret-without-interline) → eB.

- **R24:** "<p>et<i>(i)</i>on p[re]ferred || by this ext to the right" — "by this ext to the right" ✓✓ CLEAN; "pet<i>(i)</i>on" -cion/-tion CRUX-CLASS △ (standing rule: never silently resolved) → eB + TNA.
- **R25 (△△ PRIORITY — NEW INTERLINE R#i3?):** "<h>ono: the <L>ord || <Ch>auncelor «^{of <E>ngland[?]}Λ» for the <c>ontynuaunce" — "hono: the Lord" ✓ (baseline's "right hono:" abbreviation confirmed); CARET after "Chauncelor" with a small raised cluster above reading "of <E/I>nghand"-class → "of England"-LEAN. **NOT IN BASELINE — DELTA-candidate.** Lean only → eB PRIORITY + TNA.</sup>
- **R26:** "of the fd <f>ute || vppon the fd ill th<i>(is)</i>[?]" — matches baseline "continuance of the ^{s[ai]d} suit uppon the ^{s[ai]d} Bill, this..."; a long stroke crossing near "fd" △-light (flourish-descender-lean) → eB.
- **R27:** "<th>is[?] ext <d>id offer || <S>uert<i>(ie)</i>s to pay the" — "did offer" ✓ (+ seam re-sight "offre"-form △-spelling); "<S>uerties to pay the" ✓✓ (baseline "did offer sureties to pay [the] costs & charges" confirming; "Suerties/Sureties" spelling △).
- **R28 (bottom edge):** "...<c>ofts[?] & <ch>arges[?] if || the caufe <w>ere decreed —" — fragments ("were decreed" lean, "the caufe" ✓); band 6 re-shows.
- **eB QUEUE adds:** R#21 ^{twelfth} under-structure · R#22 R23 caret-like mark · R#23 "pet<i>(i)</i>on" crux · R#24 «^{of England}» interline — PRIORITY · R#25 "Suerties" spelling · R#26 R26 stroke.

Band 6 (Ra/Rb b6 nat): overlap re-shows R25–R27 ✓ ("offer <S>uerties to pay <th>e" re-clean).

- **R28:** "<c>ofts & <ch>arges if || the caufe <w>ere decreed" — "& charges if" ✓; "the caufe were decreed" ✓✓ (baseline confirmed); "cofts" initial letterform d-like △-micro.
- **R29:** "againft this <d>eft[?]/<e>xt[?] || <d/e>(—)t or not . But if" — "againft this" ✓; "or not . But if" ✓✓; **the party-token is SEAM-DOUBLE-SIGHTED and reads <d>eft-LEAN both times** (d-loop initial) vs baseline "against this ex[aminan]t" — party-designation DELTA-candidate △ → eB.
- **R30 (△△ PRIORITY — NEW NEXUS, NOT IN BASELINE):** "<th>ere[?]/<th>en[?] be[?] was <—> || <—> mention[?]/motion[?] <th>e <—> Λ «^{vppon the fd petic(io)n}»" — components: (a) **STRIKE R#2:** short struck token ("be"-class) before "was"; (b) a CLEAR main-module "mention"/"motion" token (m-e-n-t-i-o-n, dotted i); (c) CARET Λ after an unresolved "ill[?]/<f>uit[?]"-class token; (d) small-module INTERLINE R#i4 "^{vppon the fd petic(io)n}" above. Baseline has NO trace of this row-internal machinery. Host-line geometry + insert-point unresolved → eB PRIORITY + TNA. ("petic(io)n" is -cion crux-class △ standing.)
- **R31:** "if it had pleafed <—> || the fd . <L>ord <Ch>auncelor" — "if it had pleafed" ✓✓; "the fd . Lord Chauncelor" ✓✓ CLEAN in Rb (baseline confirmed; stray period after "fd" △-micro).
- **R32:** "to <h>aue <—> || <th>e <c>ontynuaunce of <th>e" — "to haue" ✓; **"the contynuaunce of the"** ✓✓ (baseline "[to] have graunted the continuance" confirming).
- **R33 (bottom edge):** "<g>raunted[?] <—> || <—><p>[ur]pofed[?] to <h>aue" — "graunted" lean; "purpofed to haue" lean (baseline "then this ext purposed to have looked owt"); a heavy stroke under the "<v>ppo<—>ted"-region suggests ANOTHER possible strike △ → band 7 re-shows + eB.
- **eB QUEUE adds:** R#27 the R30 petition-interline NEXUS (strike + mention/motion + caret + interline + host geometry) — PRIORITY · R#28 ext/deft party-token · R#29 possible strike near "purpofed/contynuaunce" · R#30 "cofts" initial micro.

Band 7 (Ra/Rb b7 nat): overlap re-shows R30–R32 ✓ ("if it had pleafed" re-clean; "to haue graunted" now CLEAN → R32 firmed; the R#29 strike-candidate re-sighted as a heavy stroke through a "<—>o<—>ted"-cluster near "purpofed" — held △△).

- **R33 (firmed):** "<th>e[?] fuit <th>en this ext <—> || <—><p>[ur]pofed[?] to <h>aue" — "fuit then this ext" ✓ (baseline "suit, then this ext purposed to have" confirming).
- **R34 (★ INTERLINE R#i5 CONFIRMED + GEOMETRY LOCKED):** "<l>ooked owt <S>uerties Λ || <|> but this <ex>t[?] <—>" — "looked owt" ✓✓ CLEAN; "<S>uerties" ✓; **CARET Λ after "Suerties" = insert-point**; small-module interline above, OUTDENTED into the left margin: "«in <L>ondon <h>auinge divers <k>infmēn there at that tyme»" ✓✓ — baseline's "in London, hauinge divers kinsmen there at that tyme" CONFIRMED VERBATIM-lean (spelling "hauinge" △-light). **NO "good" token sighted between "owt" and "Suerties"** → baseline's "[good?]" query leans ABSENT △ → eB confirm.
- **R35:** "did not before <h>and || <in>treate[?] <w>[i]th[?]/<wh>o[?] <—> <v>nto[?]" — "did not before-hand" ✓ (space/mark inside "be fore" △-micro); the entreat-cluster under-resolved △ (baseline "[en]treate w[i]th [any to]") → eB.
- **R36:** "be this <ex>t<s> || <S>uerties neither did anie" — "be this exts" ✓ (possessive); "<S>uerties neither did anie" ✓✓ (baseline confirmed).
- **R37:** "<p>[er]fon promife || to be this <ex>t<s> <—>[?] fuert<y/ie>[?]" — "p[er]fon promife" ✓; a possible short token between "exts" and "fuerty" (big overwritten loop-mass — may be just flamboyant "ex") △ → eB.
- **R38 (bottom edge):** "nor to <p>[?] procure his || <X> fuert<y> in <th>at —" — "nor to procure his" ✓ (extra p-like stroke between "to" and "procure" △-micro); **STRIKE R#3 SIGHTED before "fuerty" = baseline's recorded strike "his {struck} [s]uerty"** ✓ (contents illegible native) → band 8 + eB.
- **eB QUEUE adds:** R#31 no-"good" confirm + "hauinge" spelling · R#32 R35 entreat-cluster · R#33 R37 possible pre-"fuerty" token · R#34 R38 STRIKE R#3 contents + extra p-stroke.

Band 8 (Ra/Rb b8 nat, torn foot): overlap re-shows R36–R38 ✓ (extra pre-"procure" stroke now reads tall-V/virgule-class △-micro held).

- **R38 (Rb tail, revised):** "...his <X> fuert<y> in <th>at" — **STRIKE R#3 = a LARGE double-loop struck/overwritten MASS** (one long token, or two short) before "fuerty"; contents illegible native → eB + TNA. A dot after "that" △-micro (pen-rest-lean).
- **R39 (FINAL LINE):** "behalfe ." ✓✓ CLEAN with period = **ANSWER 12 CLOSES**; short line + long flourish descender.
- **FOOT TEXT-COMPLETE ✓✓ BOTH STRIPS:** blank stained parchment below R39, ZERO ink, then the torn edge (pale sliver at Ra bottom-left corner = mount/repair tissue, non-text). **NO subscription/signature on 006** — deposition continues to 007 (answers 13–16 + subscription).

RIGHT PAGE (006R) — NATIVE CENSUS + eB QUEUE

39 lines (R1–R39). Interline candidates ×4 + 1 ambiguous: R#i2 "twelft(h)" (R22, confirmed-class) · R#i3 "of England[?]" (R25, NOT in baseline) · R#i4 "vppon the fd petic(io)n" (R30, NOT in baseline) · R#i5 "in London hauinge divers kinfmen there at that tyme" (R34, = baseline's interline, geometry locked) · plus the band-3/4 R13-head nexus (interline vs risen-tail, unresolved). Strike candidates ×3 + 2 ambiguous: R#1 (R13-head short token vs line-filler) · R#2 ("be"-class, R30) · R#3 (pre-"fuerty" double-loop mass, R38, = baseline's recorded strike) · plus the R17 "fd"-or-interline mark and the R#29 "purpofed"-region stroke.

Boundaries & tears: HEAD-TEAR COST NO TEXT — R1 "<wh>ether anie p[er]fon or not..." continues L40's "...Starrechamber , nor" seamlessly ✓. Answer 10 = R1–R7[?] (close-formula △) · Answer 11 = R8–R21 ("To the 11" ✓✓ → "Starrechamber ." ✓✓) · Answer 12 = R22–R39 ("To the ^{twelfth}" → "behalf .") · FOOT TEXT-COMplete ✓✓.

Confirmed-verbatim against baseline (native): "paffed his worde for this ext in that behalfe; ffor he faieth he did not requet anie p[er]fon fo to doe" · "of Councell" (sighted directly) + "in fome of his Law caufes" · "did not carrie anie l<ett>re or token fince the fd vjth day of october" · "anie Monie to be paied or delyu[er]ed" · "Bulkley & W^m / Bulkley or either of them did <g>iue[?] or promife to pay to the <fd> M^r Towneley anie fom or Soms of monie rewarde or recompence for his paines & care taken or to be taken in the fd fuite in the Starrechamber ." · "doth not remember whether vppon a pet<ic>ion p[re]ferred by this ext to the right hono: the Lord Chauncelor" · "if the caufe were decreed againft this <d/e><—>t or not . But if it had pleaed the fd Lord Chauncelor to haue graunted the contynuaunce of the fuit then this ext purpofed to haue looked owt <S>uerties «in London...»" · "did not before-hand <in>treate...be this exts <S>uerties neither did anie p[er]fon promife to be this exts fuert<y>...nor to procure his ~~XX~~ fuerty in that behalfe ."

DELTA-candidates vs baseline (pending eB): R25 «^{of England}» interline after "Lord Chauncelor" — ABSENT in baseline · R30 nexus («vppon the fd peticion» + "mention/motion" + strike R#2) — ABSENT in baseline · R11 "or p[er]fons" doublet — baseline has only "p[er]son" · R29 "<d>eft"-lean party token — baseline "ext" · R34 NO "good" before "Suerties" — baseline queried "[good?]" · R5 answer-10 close formula ("cannot fay"-class) — differs from baseline's supplied bridge · R13-head nexus + R17 <fd>-mark — unrecorded in baseline.

CONSOLIDATED eB QUEUE (34 items, priorities first): R#24 «of England» · R#27 R30 petition-nexus · R#11/R#12 R13-head nexus · R#5 answer-10 close formula · R#28 ext/deft · R#29 purpofed-strike · R#34 strike R#3 contents · R#18 <fd>-M^r cluster · R#14 "or p[er]fons" · R#31 no-"good" · then R#1–R#4, R#6–R#10, R#13, R#15–R#17, R#19–R#23, R#25–R#26, R#30, R#32–R#33 (as logged per band).

RIGHT PAGE (006R) — eB PASS (Ra/Rb b1–b8 eB pairs; statuses: ✓eB resolved · ⚠ retained · WITHDRAWN logged)

Band 1 eB (R1–R6):

- **R#1 ("wordde" double-d) — RETAINED △-micro:** eB shows w-o-<rd>-d-e with an ink-blot overlapping the cluster; "worde" (ligated -rd-) vs "wordde" unresolved. No semantic weight; not TNA-listed.
- **R#2 (R2 "that"-abbrev) — RESOLVED ✓eB-lean:** the tall cluster after "in" is a <y>^t-class abbreviation (tall y + superscript t) → "in y^t [=that] behalfe". Native "<that>[?]" spelled-out candidate WITHDRAWN in favor of the brevigraph.
- **R#3 (R4 tail formula) — RESOLVED ✓eB:** post-"And" token is ascender-FREE m-o-r-e → "doe . And more he fai<eth>..." — "further" candidate **WITHDRAWN** (band-2 native lean confirmed). Tail "faieth that" partial, completes in band 2.
- **R3 head "did" ✓eB firmed** (two looped-d ascenders clean in eB).
- **R2 stop-mark:** eB leans a virgule/stop-class mark before "ffor" — retained △-light. "faieth" a/i-minims retained △-light ("faueth"-like minim run).

- **R#5 PRE-SIGHT (bonus):** Rb bottom rows show a "<—> <ca>nnot[?]" fay to his" cluster-lean — the "cannot fay"-class close formula STRENGTHENS ahead of its band-2 resolution.
- R#4 (Towneley/of-Councell) deferred to band 2 eB (bottom-edge fragments only here).

Band 2 eB (R4–R11): re-shows R#3 "And more he" re-clean ✓eB.

- **R#5 (answer-10 close formula) — SUBSTANTIALLY RESOLVED ✓eB-lean, DELTA CONFIRMED:** Rb gives "<th>at he cannot fay to his" (c-a-n-n-o-t minim-run + ot, then long-f "fay to his" — double-sighted b1+b2). The close is a FIRST-PERSON "cannot fay"-class construction: "And more he fai<eth> <th>at || <th>at[?] he cannot fay to his <—>[knowledge/remembrance-class gap △] ... M^r Towneley ... of Councell wth the ... S^r Richard Bulkley in fome of his Law caufes ." **DELTA vs baseline's supplied third-person bridge "[neither knoweth he that the said]" STANDS** — the supplied text is wrong-class. Gap-cluster after "to his" + the apparent "that || that" repetition retained △ → TNA.
- **R#4 + R#6 (Towneley + M^r title) — RESOLVED ✓eB-lean:** Rb shows "<M>^r <T>owneley" (superscript-r on M + T-o-w-n-e-l-e-y traced). "of Councell wth the" re-clean in Ra ✓eB. **R5/R6 SEAM WORD-ORDER RETAINED △:** whether "M^r Towneley was" precedes or follows "of Councell wth the" across the join is unresolved (tilt-join ambiguity) → TNA.
- **R#7 (S^r-Richard) — lean holds △-light:** superscript-r tall cluster before the Richard-form sighted; "<Rich>ard" letterforms partially traced. Retained.
- **R#8 ("fince") — RESOLVED ✓eB-lean:** long-f + i-n-c-e class.
- **R#10 ("Anglefey") — RESOLVED ✓eB-lean:** tall-A + g-descender + long-f + y-descender; n/u minim ambiguity inherent, no candidate rival.
- **R#9 (v^jth-day numeral) — DEFERRED:** Ra bottom-edge fragment only ("<th>e fd <vj>th[?]" v+j-descender pair + superscript, lean holds) → band 3.
- **R#13 ("carrie<d>") — RETAINED △-micro:** trailing d-loop present in eB too ("did not carried anie" vs "carrie" + flourish); TNA-minor. "october" ✓eB (c/t mid-cluster △-micro); "to anie p[er]fon" ✓; R8 opener "To the 11 Interr || this ext fai<e>th that he" re-clean ✓✓ (spelling "faith/faieth" △-micro).

Band 3 eB (R8–R17): re-shows: "To the 11" ✓ · R#10 "Anglefey" DOUBLE-SIGHTED ✓eB (Rb: tall-A + g-descender + f + y) · R#13 carrie/carried third sighting UNCHANGED → retained △-micro · R15 "Bulkley & W^m" re-clean ✓✓eB.

- **R#9 (v^jth-day) — RESOLVED ✓eB-lean:** "<th>e fd v^jth day o[f]" — v + dotted-j + superscript-th cluster legible in Ra.
- **R#14 ("or p[er]fons") — CONFIRMED ✓eB, DELTA STANDS:** Ra line 4 clean: "or p[er]fons wthin" (p-brevigraph + f-o-n-s, terminal s clear). Full doublet "to anie p[er]fon or p[er]fons wthin the County of Anglefey" vs baseline's single "p[er]son".
- **R#11/R#12 (R13-head nexus) — STRUCTURE FIRMED, GEOMETRY RETAINED △△ → TNA:** eB gives (a) the raised pair as TWO tokens "«or fent[?]»"-class (o-r + long-f-e-n-t; single-word "except" candidate WEAKENED); (b) the struck token = 3–4 letters, heavily overwritten, contents illegible, horizontal stroke extending LEFT into the margin (strike vs strike+filler); (c) position = the line-head region between R13's and R14's Ra halves → serves either R13 (insertion into "paied or delyu[er]ed") or R14-head (struck opening token + replacement). Either way the substantive reading is an interlined doublet-expansion

"«or fent»" in the money-delivery clause — **NOT IN BASELINE, DELTA-candidate** — insert-point + struck contents to TNA.

- **R#15 ("delyu[er]ed to-this" bridge)** — **RETAINED** -light: Rb shows "paied or <d>elyu<er>ed <to>[?] <th>is" — "to"-lean holds, cluster cramped.
- **R#16 (giue/graunt verb)** — **RESOLVED to** "<g>iue"-lean ✓eB-lean: g-descender + single-minim + u-e; NO r-cluster or -nt tail → "graunt" **WITHDRAWN**; giue/gaue -micro retained (baseline "give" convergent).
- R12 "ffrom the fd ." ✓eB clean (ff-ligature; stray dot after "fd" -micro) · R13 "anie Monie to be" ✓✓eB re-clean · R14 "doth this ext <kn>owe" ✓-lean re-show · R#17 resolved in band 2 (M^r ✓eB-lean); R#18 (<fd>-M^r cluster) defers to band 4.

Band 4 eB (R13–R21): nexus re-show: "«or fent[?]" pair + struck token + left-running stroke unchanged (band-3 flags stand). R15-Ra "that the fd S^r Ri[chard]" re-show ✓; a stroke near R15-Rb "Richard" noted flourish-lean -micro.

- ★ **fd-BAR INSIGHT (affects R#18, R#19, R#26):** the long horizontal strokes cluster around "fd" tokens across this zone (R17, R20; R26 flagged in band 5). Leading candidate: **an ABBREVIATION-BAR over "fd"** (macron-class, standard EME for s[ai]d) — one scribal habit, not three separate marks.
- **R#18 (the <fd>-M^r cluster)** — **RETAINED**   → **TNA, bar-lean**: eB letterforms: token = "fd" ✓ (long-f + d-loop), sitting at/near baseline (not clearly raised), horizontal stroke running from before the f to the M of "M^r". Candidates ranked: (1) inline "fd" + abbreviation-bar [leading]; (2) interlined "fd" (= baseline's reading); (3) struck "fd". Text-critical weight: "the fd M^r Towneley" vs "the M^r Towneley" → TNA.
- **R#19 (R20 dash-class stroke)** — **RESOLVED-lean** ✓eB-lean: "in the fd fuite in the" with the stroke reading as the fd-bar; locator-dash candidate demoted (retained -light).
- **R#20 (answer-11 close)** — **CONFIRMED** ✓✓eB: "<St>arrechamber ." re-clean with period; boundary flourish grammar re-sighted. (Answer-12 opening under-structure = R#21, band 5.)
- **Verbatim upgrades** ✓✓eB: R16 "Bulkley or either o[f]" · R17 "promife to pay to" · R18 "fom or Soms o[f] || monie rewarde or" · R19 "recompence" (r-e-c-o-m-p-e-n-c-e fully traced — upgraded from lean) + "paines & care taken" · R20 "or to be taken in".
- R16-Rb verb re-sight: this band shows a-bowl-like second letter ("gaue"-ish) vs band-3's single minim ("giue"-ish) — **give-class FIRM, giue/gaue** -micro retained (baseline "give" convergent).

Band 5 eB (R22–R28):

- ★ **R#24 («of England», R25)** — **INTERLINE + CARET CONFIRMED** ✓eB; **CONTENT LEAN-STRENGTHENED** ; **DELTA STANDS → TNA MANDATORY**: Rb shows "<Ch>auncelor" with the CARET $\wedge$ clean at baseline (after "Chauncelor", before "for the contynuaunce") and the raised small-module pair above: token 1 = "of"-class (o + tall-f), token 2 = capital-E-form + n-g-l-a-n-d traceable → "«^{of} England»". Content held at  (small-module, tight) per wish-fulfilment discipline. If confirmed: "the right hono: the Lord Chauncelor of England" = the full chancellor style, **ABSENT** in baseline.
- **R#21 (twelfth under-structure)** — **content RESOLVED, structure RETAINED**: interline reads "<tw>elft(h)" ✓eB-lean; the under-structure is caret-lean, numeral "12" **NOT** confirmed → -micro (TNA-minor).
- **R#22 (R23 caret-like mark)** — **RESOLVED-lean** ✓eB: the mark between "not" and "remember" = the giant Interr-flourish DESCENDER from R22 crossing R23's line. Caret-without-interline candidate **WITHDRAWN**. "doth not remember || whether vppon a" re-clean ✓✓.

- **R#23 ("pet(ic)ion") — CRUX RETAINED  (standing rule):** eB letterform is c-clean ("petition") but the -cion/-tion crux is never silently resolved → TNA.
- **R#25 ("Suerties" spelling) — RESOLVED  eB-lean:** S-u-e-r order (u before e) → "Suerties"; "Sureties" demoted. "Suerties to pay the" re-clean.
- **R#26 (R26 stroke) — RESOLVED-lean  eB = fd-BAR:** double-sighted this band ("of the fd fute" Ra + "vppon the fd Bill" Rb, bar over both fd tokens); flourish-descender candidate demoted. "Bill" B-lean holds; "th<is/at>" -micro.
- Re-shows : "Starrechamber ." · "hono: the Lord || Chauncelor" · "for the contynuaunce"-lean · "the caufe were decreed" · "did offer" (offre/offer spelling -micro retained).

Band 6 eB (R28–R33):

- ★ **R#27 (R30 petition-nexus) — STRUCTURE SUBSTANTIALLY RESOLVED; PARSE HELD AT LEAN; DELTA STANDS → TNA MANDATORY:**
- **STRIKE R#2 RESOLVED  eB-lean:** the struck token = "~~be~~" (b-ascender + e-bowl legible under the strike); sequence reads "<th>ere ~~be~~ was" — a mid-line mood/tense self-correction ("there be" → "there was"). Head token "there"-lean over "then" (r-e tail).
- **"mention"  eB:** m-e-n-<t/c>-i-o-n with dotted i; mention/mencion -micro. Pre-token "<a>nie"-lean ; post-token unresolved .
- **INTERLINE R#i4  eB-lean:** raised small-module "«vppon the fd petic(io)n»" re-sighted WITH the fd-BAR inside the interline; CARET  below (insert-point after the post-mention token). -cion crux standing .
- **COHERENT-PARSE (lean only, NOT asserted):** "...decreed againft this <d>eft or not . But if there ~~be~~ was <anie> mention <—> «vppon the fd petition» if it had pleafed the fd Lord Chauncelor to haue graunted the contynuaunce of the fuit then this ext purpofed to haue looked owt Suerties..." — a hedge clause (any mention of sureties on the petition would have been conditional on the continuance being granted). ENTIRE structure ABSENT in baseline → TNA.
- **R#28 (ext/deft party token) — "<d>eft"-lean FIRMED  eB-lean, DELTA STANDS → TNA MANDATORY:** third + fourth sightings (Ra eB "againft this <d>eft" and Rb eB seam "<d>eft or not ,") both show the d-ascender loop the e-initial lacks. Baseline "ex[aminan]t". Party-designation weight — never asserted without TNA.
- **R#30 ("cofts" initial) — UPGRADED to  retained → TNA-minor:** eB initial is d-loop-like both strips ("<d>efts/<c>ofts"); "debts" surfaced as letterform candidate but SENSE strongly favors "cofts" (suretyship formula: pay costs & charges on adverse decree). Sense-lean recorded as lean only (005 acquitted-discipline).
- **R#29 (purpofed-strike) — STILL UNRESOLVED   → band 7 eB:** Rb bottom edge shows the heavy stroke over a "<—>o<—>ted"-class cluster adjacent to "to haue"; candidates (struck first-attempt verb vs crossing tail-flourish) both alive.
- Re-shows  : R31 "yf it had pleafed" CLEAN (spelling "yf") · R31-Rb "the fd . Lord Chauncelor" with fd-bar + stray period · "or not . But if" (comma-form stop -micro) · R27 "Suerties to pay the" · R28 "the caufe were decreed".

Band 7 eB (R33–R38):

- **R#31 (no-"good" + "hauinge") — CONFIRMED ✓eB-lean, DELTA STANDS:** between "looked" and "(S)uerties" the only cluster is "owt" (o-w-t, NO g-descender anywhere in the gap) → baseline's "[good?]" query DISSOLVES — nothing there. A thin stroke crossing "owt" noted -micro (interline-flow/flourish-lean). Interline R#i5 re-read near-verbatim: "in (L)ondon (h)auinge divers (k)inlmen (th)ere [at that tyme partial]" ✓✓eB, margin-outdent + caret ^ re-sighted; spelling "hauinge" firmed ✓eB-lean (u+i ligature, not b).
- **R#29 (purpofed-stroke) — DOWNGRADED   → , NON-DELETING-lean → TNA-check:** the stroked cluster READS "(pur)pofed" (p-u-r-p-o-f-e-d compatible) immediately before clean "to (h)ae"; NO replacement interline above; deleting the cluster would leave the sentence verbless ("then this ext ____ to haue looked owt") → stroke = long bar/flourish-lean, not a strike.
- **R#32 (R35 entreat-cluster) — PARTIAL, NEW CANDIDATE SURFACES  → TNA:** "in(tr)eate"-lean holds; the following cluster now reads "(wh)o (fh)ould[?]"-compatible (w-h-o + fh-o-u-l-d strokes) alongside baseline's "w[i]th [any to]" — i.e., "did not before-hand intreat (wh)o (fh)ould[?] be this exts Suerties" vs "intreat wth (anie) to be...". Both candidates recorded; neither asserted.
- **R#33 (R37 pre-fuerty token) — RESOLVED-lean ✓eB:** the big loop-mass = FLAMBOYANT "(ex)t(s)" (double-loop x + terminal s); separate-token candidate demoted. "to be this exts fuert(y)" reads continuous.
- **R#34 preview (strike R#3 contents):** the struck double-loop mass before "fuerty" letterform-previews as a **FALSE-START** of "fuer[t]—" -class (leading candidate); contents stay   → band 8 eB + TNA.
- R38 extra pre-"procure" stroke: crossing-descender/virgule-lean -micro retained (non-lexical). R34-Rb "l"-mark before "but" = virgule/pause-stroke -micro.
- Re-shows ✓✓: R32 "graunted the contynuaunce of the" · R35 "did not be fore" (intra-word gap noted) · R36 "Suerties neither did anie" · R37 "p[er]fon promife" · caret ^ after "Suerties".

Band 8 eB (R36–R39, torn foot):

- **R39 "behalf ."** ✓✓eB re-confirmed (final word + period + flourish); **FOOT TEXT-COMplete** verified in eB both strips — zero ink below R39; pale sliver = mount/repair tissue (non-text) ✓.
- **R38 pre-"procure" stroke — RESOLVED ✓eB-lean, item CLOSED:** the tall stroke between "to" and "procure" = the crossing DESCENDER of R37's "promife" big-P. Non-lexical.
- **R#34 (strike R#3 contents) — RETAINED   → TNA MANDATORY:** the struck mass before "fuerty" = 1–2 token overwritten tangle; first component shows a long-f-class tall stroke + bowl → **FALSE-START** "fuer[t]—" **LEADING candidate**; letterforms do not settle it. "(f)uerty in (th)at" clean after ✓; dot after "that" pen-rest-lean -micro retained.

RIGHT PAGE (006R) — CENSUS FIRM (post-eB)

All 34 queue items dispositioned. RESOLVED/CONFIRMED (✓eB or ✓eB-lean): R#2 (y^t-brevigraph) · R#3 ("And more he"; "further" WITHDRAWN) · R#4 (M^r Towneley + "of Councill" direct) · R#5 (close formula "cannot fay to his (—)"; gap ) · R#6 (M^r) · R#8 ("fince") · R#9 ("vjth") · R#10 ("Anglefey" x2) · R#14 ("or p[er]fons") · R#16 (give-class; "graunt" WITHDRAWN) · R#17 · R#19 (fd-bar) · R#20 ("Starrechamber .") · R#21-content ("twelfth") · R#22 (Interr-descender; caret WITHDRAWN) · R#24-structure (interline + caret

006R — DELTA LOG vs BASELINE ('_WORKING_LLOYD_DEPOSITION_003R-007.md' §006R, lines 93–96; baseline re-read 2026-07-08 before this block)

DELTAS (baseline text at variance with native+eB):

- 1. Answer-10 close formula (R4–R5):** baseline supplies "[neither knoweth he that the said] Towneley" —
 native+eB reads a FIRST-PERSON construction: "And more he fai(eth) that {that}[?] he **cannot fay to his**
 <—>[gap] ... M' Towneley...". Wrong-class supply; also baseline lacks the "M'" title (sighted ×4). Gap +
 seam order → TNA.
- 2. "or p[er]fons" (R11):** baseline "to any p[er]son w[i]thin the County of Anglesey" — native+eB confirms the
 DOUBLET "to anie p[er]fon or p[er]fons wthin..." ✓eB.
- 3. «^{or fent}»-class insertion nexus (R13-head):** interlined pair + struck token in the money-delivery clause ("...to
 be paied or delyu[er]ed...«or fent[?]>") — NO TRACE in baseline. Geometry + struck contents → TNA.
- 4. «^{of England}» interline (R25):** caret + raised pair after "Lord Chauncelor" CONFIRMED to exist ✓eB; content "of
 England"-lean. Baseline reads straight past ("...the Lord Chauncelor for the continuance..."). → TNA.
- 5. ★ R30 RECOVERED LINE (the petition-nexus):** baseline runs "...decreed against this ex[aminan]t, or not;
But if it had pleased the s^{[ai]d} Lord Chauncelor..." with NOTHING between. Native+eB found a full line
 between "But if" (R29-tail) and "if it had pleafed" (R31): "<th>ere be was <anie>[?] mention <—> Λ«^{vppon the}
 fd petic(io)n»". **DIAGNOSIS: homoeoteleuton** — the deposition-grouped pass eye-skipped from the first "if"

to the second, losing the line. The strike (~~be~~→was), the mention-token, the caret, and the interline are each independently sighted native+eB. Full parse lean-only → TNA MANDATORY.

6. Party token (R29): baseline "against this ex[aminan]t" — native+eB reads "<d>eft"-lean x4 sightings (d-ascender). Party-designation weight → TNA MANDATORY.

7. No "good" (R34): baseline "looked owt [good?] [s]ureties" — the queried token is ABSENT (no g-descender cluster) ✓eB. Query dissolves.

8. Entreat clause (R35): baseline "[en]treate w[i]th [any to] be this ex[aminan]ts [S]ureties" — eB surfaces rival "intreate <wh>o <fh>ould[?] be...". Both alive → TNA.

9. fd-bar systemic: baseline's "s^[ai]d" interline notations in answers 11–12 (esp. "the s^[ai]d M[r] [T]owneley", R17) may be macron-BARS over inline "fd", not interlines → TNA systemic check.

CONVERGENCES (baseline supplies/queries now sighted directly): "of Councell" (was "[was of Councell?]") ✓ · "delyu[er]ed" (was "[delivered]") ✓ · "knowe" (was "[know]") ✓ · "twelfth" interline confirmed as true interline (R#i2) · "in London, havinge divers kinsmen there at that tyme" CONFIRMED near-verbatim with geometry locked (caret after "Suerties", margin-outdent; "hauinge" u/v) · strike before final "fuerty" confirmed = baseline's "~~struck~~" (now with false-start-"fuer[t]" leading candidate) · "To the 11" numeral · "Starrechamber ." close · "behalf . ." close · head-tear seamless from 006L L40 ("...nor || whether anie p[er]fon or not...") · foot text-complete, no subscription on 006.
