

MEMBRANE 007 — PHASE 4D-7 LINE INDEX (native+ sweep, 2026-07-08)

Per-leaf line index (census · revision stratum · eB dispositions · delta log)

Source	_WORKING_007_LINE_INDEX.md
Integrity	sha256 26bb0cbd8d64 · rendered 2026-07-09
Status	<i>Derived render for review. The markdown source file governs; the modernized layer is never quotable; all readings are provisional pending the commissioned professional transcription (names above all). Canonical apparatus: _PRECISION_PASS_LEDGER.md; method: TRANSCRIPTION_AND_ANALYSIS_METHODOLOGY.md.</i>

How to read this render (conventions legend)

strikethrough	struck in the manuscript (source: ~~text~~)
superscript	scribal interlineation or raised letters (source: ^text^, m^r)
shaded serif span	diplomatic text quoted inline (source: `text`); conventions inside are rendered too
boxed serif panel	diplomatic transcription block
gray italic <i>[[...]]</i>	pass-annotation — editorial apparatus, NOT manuscript text
CONFIRM UPGRADE LEAN CONFLICT	delta-log verdict class: green = confirmed/convergent · blue = upgraded/new · amber = lean/open/variant · red = retraction/conflict
[?] / [...] / [] · « » · · △ ✓ eB X ★	sigla printed verbatim per methodology §6/§9

Contents (this render — jump via Word's navigation pane)

- § LEFT HALF (007L) — NATIVE SWEEP (b1–b8)
- § RIGHT HALF (007R) — NATIVE SWEEP (b1–b8)
- § 007 NATIVE CENSUS (provisional, pre-eB)
- § 007 eB QUEUE (for the eB pass, next window — 16 eB tiles)
- § 007 eB PASS (2026-07-08) — queue dispositions per band-pair
- § 007 CENSUS — FIRM (post-eB, 2026-07-08)
- § 007 DELTA LOG vs baseline ` \_WORKING\_LLOYD\_DEPOSITION\_003R-007.md ` §007
- § 007 → TNA ARBITRATION LIST (additions)

Method: 4A half-column method (007 is a portrait SINGLE, 2696×4227 — final leaf of the Lloyd deposition: answers 13–16 + autograph subscription). Halves L x0.05–0.55 / R x0.45–0.98 × 8 bands, y 0.02–1.00 handled by script (b1 y0–660 ... b8 y3566–4227), 25% band overlap, scale 1.12, q90, nat+eB (32 tiles), tiles crops/stac_p4d/crop_p4d007{L,R}_b{1..8}[_eB].jpg, manifest crops/stac_p4d/_manifest.jsonl. Line-

tilt join rule: lines rise left→right — L row N joins the R row one visual step higher; seam-overlap x0.45–0.55 gives double sightings.

Recto-only: the dorse is UNSCANNED (bands 5–7 verso show-through = standing TNA-order item). Right-edge FOLD letter-bottoms zone: re-verify as scan-limited, do not force readings. Torn head: baseline logged "ghost traces of one lost line above" — check.

Baseline (delta target): _WORKING_LLOYD_DEPOSITION_003R-007.md §007 (lines 102–124). Priority cruxes carried in: (a) **answer-14 SUM** — three candidates across three passes (£13 first sweep / "thirtie" 005L ans-6 / "ff—" [ffiftene? ffowertene?] 007 re-sweep) — letterforms first, sense-leans recorded as leans only; (b) courier interline forename "Anthonie[?] [L]eadman" (vs first-sweep "Humfrey"); (c) "[M[r]/W[illia]m] Jones ... Attorney in this Courte" forename; (d) ans-13 decline "he is not appointed to be ex[amin]ed" + struck ~~th?~~; (e) "To the 15° & 16." joint decline; (f) autograph "Res ap Jhon[?] Lloid[e]" + paraph (alternate "Redd by" disfavored); (g) fd-bar systemic check (006R finding) on this leaf's ^{s[ai]}d notations x3 in baseline ans-14.

Conventions: [?] uncertain · [...] / [] supplied/illegible · word/«...» interlineation · ~~text~~ scribal strike · ⚠ provisional · ✓ eB eB-verified · ⟨x⟩ expanded/normalized letterform · || column-seam join · ⟨p̄⟩/⟨p̄⟩ p-brevigraph · ⟨l̄⟩ long s · ^ caret. A reading is trusted only if it survives ALL renders it appears in.

LEFT HALF (007L) — NATIVE SWEEP (b1–b8)

Band 1 (y0–660, torn head):

- L0-ghost: torn head confirmed — ink traces ON the torn flap edges (a round loop center-top; a stroke cluster upper-right, ascender-like). Unreadable; consistent with baseline's "ghost traces of one lost line above." Recto-only limit noted; TNA item stands.

Line	Text (diplomatic)	Apparatus
L1	«To the 13.» ⟨th⟩e[?] is not ⟨→R⟩	answer-13 head clean. ⚠ baseline's struck th? between "13." and "he" NOT sighted in native (only a flourish tail off the "13." period) — eB queue (q-a).
L2	«To the 14.» ⟨gap⟩ Inte⟨rr⟩ ⟨→R⟩	answer-14 head clean; wide gap before "Interr" at the seam edge.
L3	hath[?] not receauē⟨d⟩[?] ⟨→R⟩	token 1 lean "hath" (h + a + the scribe's 3-form -th; position fits baseline's "...faieth that he // hath not receaved anie..." with "faieth that he" on L2-R). Token 3 minim- heavy, "receaued"-lean ⚠ (q-b).

- L4 (head cut at b1 foot): "monie ffrom ⟨majuscule⟩" — completed in b2.

Band 2 (y396–1188):

- L2/L3 overlap re-sighted (To the 14 / hath not receauē⟨d⟩) — join geometry good.

Line	Text (diplomatic)	Apparatus
------	-------------------	-----------

Line	Text (diplomatic)	Apparatus
L4	monie ffrom ⟨S⟩⟨→R⟩	large swash majuscule at cut = "S⟨i⟩r"-lean (baseline "...monie ffrom S⟨i⟩r Richard Bulkeley"). △ letterform only.
L5	ffrom W ^m ⟨B⟩ul⟨→R⟩	✓ CLEAN: "ffrom" + W-with-superscript-m ("W ^m " = W[illia]m) + "Bul..." — baseline's "no[r] ffrom W[illia]m Bulkeley" ("nor" sits on L4-R).
L6	⟨th⟩e f̄d[?] S⟨i⟩r Rich ⟨B⟩u⟨→R⟩	△△ f̄d-BAR CHECK (systemic, carried from 006R): the "f̄d" here sits IN-LINE (not raised) with a long horizontal bar-stroke crossing above the "the f̄d" cluster — baseline notes an interline " ^{s[ai]d} " at this position ("anie of the ^{s[ai]d} S⟨i⟩r Rich[ard] Bulkeies"). Native lean = in-line barred f̄d, NOT interline. eB queue (q-c, priority — first on-leaf test of the 006R finding).
L7	△ UNRESOLVED head tokens: minim cluster + mid-dot + a cluster resembling "ext", then "imprif..."-lean at cut	candidates: "since he was [first?] imprifoned" (baseline) vs a "this ext" formula. Native cannot split; eB queue (q-d). Baseline's " ^{s[ai]d} was" interline not clearly sighted △ .
L8	otherwife then the ⟨f̄d/fom⟩[?] ⟨→R⟩	"otherwife" clean at head; tail tokens run to seam. Baseline: "otherwise then the ^{s[ai]d} som of [SUM] pownds..." — second ^{s[ai]d} position → same f̄d-bar check (q-c). The SUM WORD falls on the R half (R b2) — priority crux (a).
L9	pownd⟨e⟩s ⟨&⟩ ⟨feaven/fome⟩[?] ⟨→R⟩	"pownds" clean at head; following token f-initial, "feaven"/"fome" unsplit △ (q-e; baseline "[seaven/some] shilling[s]").

- L10 (head cut at b2 foot): "ffrom"-lean at lower right — completed in b3 (baseline: "[had] ffrom the ^{s[ai]d} Willia[m] ap Rees").

Band 3 (y924–1717) — the courier-interline zone:

- L8/L9 overlap re-sighted (otherwife-line, pownds-line); joins good.

Line	Text (diplomatic)	Apparatus
------	-------------------	-----------

Line	Text (diplomatic)	Apparatus
L10	receaue[d?] ffrom <th>e <→R>	✓ <i>STRIKE CONFIRMED</i> native: full-length horizontal bar through the whole first token (r + minims + d — too long for a fd-bar; genuine deletion-class). Baseline "receaue[d?]" [receaue[d?]] ffrom the s[ai]d W[illia]m ap Rees himselfe" — struck-token content "receaue[d?]"-lean △ (q-f); rewritten "receaue[d?]" expected on R half.
L11	himselfe[?] <→R> w ^{ch} [?]	head cluster parses h-i-m + f-e-l-f-e (the long-f/f double descender); right-edge superscript form "w ^{ch} "-lean △ (q-g). Fits "...himselfe, wch // was brought this...".

- **INTERLINE i1 (between L11 and L12):** «<A>nthonie[?] <L>eadman» — smaller script hovering directly above L12's caret position. Native forename lean: initial + "-nthonie" cluster = **"Anthonie"** (the -nth- strokes visible); surname "<L>eadman" (L reads P-like; "-eadman" clean-ish). First-sweep "Humfrey" NOT supported natively. △ lean only — priority crux (b), eB queue (q-h). NOTE: name-token → conform-on-TNA-return, names above all.

Line	Text (diplomatic)	Apparatus
L12	ext by Λ <th>e <W>a<rden>[?] <→R>	caret Λ sits AFTER "by"; main line continues "the Wa..." → insertion parse: original main text read anonymous "brought this // ext by the Warden [of the ffleets Man]"; the name was ADDED by interline at the caret — matching answer-6's anonymous "some of the Warden of the ffleets servautes" and explaining the naming as an afterthought/precision. Geometry ✓ native (caret + hover aligned); parse △ pending R half.
L13	<&> <th>e o<th>er <→R> wa<s>[?]	baseline "& [the] other [was] delivered unto...". Head ampersand-form + "the other" cluster △ minims; "was"-lean at cut (q-i).
L14	<J>ones <th>is ext<s> <→R>	"Jones" at L-head (J-descender + "ones") — so the FORENAME token (M(r) vs W ^m — priority crux (c)) sits at L13-R tail, R half will carry it (q-j). "this ext<s>" clean-ish.

- L15 (partial at b3 foot): <A>nd furth(er)[?] <th>is ext <—> —  "further"-lean ONLY (006R lesson: a same-position "further" lean was withdrawn there for "And more he" — do NOT assume; q-k). Completed in b4. Faint traces of one more partial line below at cut.

Band 4 (y1453–2245) — letters-denial + joint-decline zone:

- L13/L14 overlap re-sighted; joins good.
- L15 (full): <A>nd <fur?le?de?>[?] <th>is ex<t> <→R> —   the second token carries a horizontal BAR/UNDERLINE beneath it — letterform cluster reads f/l-initial + minims + -de/-th tail; candidates "further" / "faieth" unsplit, and the under-bar is unexplained (insertion-locator? fd-bar-class habit? underline-emphasis?) — q-l, eB priority. Baseline puts BOTH "further" AND "faieth" in this stretch plus an interline "to [the] same [Interr.]" — that interline NOT sighted on the L half (expect R half, q-m).
- **INTERLINE i2:** «to his rembraunce» — ✓ CLEAN native, small script, hovering directly above L16's caret. Reads "to his rembraunce" (contracted — no medial "eme"; baseline prints "to his remembraunce" — the on-leaf form is SHORTER  delta candidate, q-n).

Line	Text (diplomatic)	Apparatus
L16	not A w<ri>tten[?] anie <→R>	✓ caret directly after "not", i2 hovering above — geometry LOCKED native (insertion point exactly as baseline). "written" minim-heavy  (wrytten/written, q-o).
L17	<im>p<ri>fonment in <th>e <→R>	"prifonment in" clean; head cut by left margin curve ("his im-" likely L16-R tail or margin-lost).
L18	To the 15° <&> 16 <→R>	✓ CLEAN: the ordinal "15°" WITH superscript-o sighted native (baseline "15°" confirmed); "& 16" plain (NO ordinal mark on 16  — baseline prints "15° & 16." — check R half for the period/Interr tail, q-p).
L19	<a>ppointed to be ex<—> <→R>	swash-initial + "ppointed to be ex" clean → the joint decline runs "he is not // appointed to be ex[amin]ed" with the break at the seam or R-tail of L18.

- Below L19: blank into b4 foot — main text ends here on the L half; subscription zone next.

Band 5 (y1981–2773) — subscription zone (L edge):

- L18/L19 overlap re-sighted at head; joins good.
- **SUBSCRIPTION (start):** at the FAR RIGHT EDGE of the L half, one large open C-like curve (big bowl, separate pen-weight) + the head of a second stroke-group cut by the tile edge — this is the LEFT EDGE of the right-of-center autograph. The C-like bowl matches baseline's note "the Ll- ligature reading as a large C" OR the paraph — assignment deferred to R half (q-q). Body of the signature is on 007R b5.

- Below: blank leaf; faint mirrored verso show-through ghosts in the lower half (several cursive rows, unreadable mirror-image) — recto-only limit; TNA verso order stands.

Bands 6–8 (y2509–4227) — blank check:

Line	Text (diplomatic)	Apparatus
b6	NO recto ink. Verso show-through ghosts across the whole band (mirrored cursive rows, denser toward the right edge	<i>including what mirrors as a possible numeral cluster upper-right). A "blank" is a claim: verified — every dark mark is either show-through (grey-green, blurred, mirror-slant) or surface stain; nothing with recto ink weight.</i>
b7	NO recto ink. Show-through continues (fainter, patchy); left edge shows the membrane's gutter-fold shadow + a small tear flap; two tiny dark specks = surface debris, not strokes.	
b8	NO recto ink. Ragged decayed foot edge against black backing; faint show-through ghosts at head only; foot margin otherwise clean. 007L text-complete: main text ends at L19; subscription right-of-center (R half); no further recto writing below.	

007L NATIVE CENSUS (provisional): 19 main lines (L1–L19) + 2 interlines (i1 «*Anthonie[?] Leadman*», i2 «*to his remembrance*») + 1 strike (L10 *received[?]*) + torn-head ghost line + subscription edge. Baseline \$007 structure (ans 13 / ans 14 / ans 15–16 decline / autograph) fully re-found; line-grain now indexed for the first time.

RIGHT HALF (007R) — NATIVE SWEEP (b1–b8)

Band 1 (y0–660, torn head + FOLD):

- FOLD confirmed:** the membrane's right edge is folded over (vertical flap $\approx x0.93$ –1.00 of the leaf, verso-side-out, blank); line-tails run INTO the crease with letter-bottoms/tails cut — scan-limited zone re-verified, no readings forced. TNA order item stands (unfold/verso).
- Torn-head ghost: ink traces on the flap upper-left (same lost-line ghosts as 007L b1) — unreadable.
- R1 (joins L1): **<—>is[?] not appointed to be examēd** — ✓ answer-13 decline COMPLETE across the seam: "To the 13. <th>e is not || <—> not appointed to be examēd" — wait: "not" sighted on BOTH halves at seam = the seam-overlap double sighting ($x0.45$ –0.55). Abbreviated "examēd" (bar over m) Δ form-detail (q-r; baseline prints "ex[amin]ed").
- R2 (joins L2–L3): **Interr<—flourish> <th>is ext faieth[?] <th>at <h>e** — answer-14 opening: the flourished "Interr" (descender-flourish class, cf. 006R resolution — NOT a caret), "this ext" (superscript-t brevigraph), "faieth/faith" unsplit Δ (q-s), "that he" at fold edge. Confirms baseline's clause order "Interr... this ex[amin]t [s]aieth that [he] || hath not received..." (L3 head = "hath not").
- R3 (joins L3–L4): **<rec>eaved anie mayneteñ<aun>ce[?] o<r>** — "<rec>eaved" completes L3's cut token across the seam ✓; "anie" clean; **"maynetenaunce" with a RAISED MARK above the medial cluster**

(superscript-a or abbreviation tittle — △ q-t, eB); tail "o(r)" runs into the fold (tail cut, scan-limited). The maintenance-mirror token is HERE — baseline's ans-14 ↔ Art-14 verbatim-mirror claim rests on it; eB priority.

- R4 (joins L4–L5): ⟨S⟩' Richard ⟨B⟩ulkeley no⟨r⟩ — "S" superscript form; "Richard" minim-run △; "Bulkeley" B-swash clean; "no⟨r⟩" into the fold (tail cut). Baseline's comma after "Bulkeley" NOT sighted native △ (q-u). NOTE name-token → conform-on-TNA.
- R5 partial at b1 foot — completed in b2.

Band 2 (y396–1188) — the SUM-WORD zone (priority crux a):

- R2/R3/R4 overlaps re-sighted; joins good.
- R5 (joins L5): ⟨B⟩ulkeley nor ffrom anie o⟨f⟩ — seam word "Bul||keley" completes L5's cut token ✓; "nor ffrom anie of" clean-ish ("nor" minim-light △); tail into fold.
- R6 (joins L6): ⟨—⟩ ⟨B⟩ulkleies f⟨er⟩uauntes[?] fince[?] — "Bulkleies" possessive-form ✓ (baseline "Bulkleies serv[au]ntes"); the servants token reads f-initial + -au- + "-tes" tail, "[f]er]uauntes"-lean △ (q-v); "fince" at fold-lean — if real, L7's head resumes "he was..." (bears on q-d's unresolved L7 cluster).
- R7 (joins L7): ⟨im⟩prifon⟨ed/ment⟩[?] in ⟨th⟩e ffleet — "in the ffleet" clean; the participle tail unsplit native ("imprifoned" vs "imprifonment" — baseline prints "impris[o]ned" here; q-w).
- R8 (joins L8) — ★ THE SUM WORD: ⟨th⟩e f̄d[?] fom of ff⟨y/i⟩⟨—⟩⟨ene/ede⟩[?] — initial DOUBLE-F CONFIRMED NATIVE: the sum token as WRITTEN HERE is ff-initial — which excludes "thirtie" AND "thirtene" as readings of THIS token (both t-initial). Independent agreement with the 2026-07-02 re-sweep's "the initial strokes resemble a double-f." Medial cluster unsplit: candidates ffitene / ffowertene / ffyftie △△ — q-x, eB TOP PRIORITY. (005L ans-6's "thirtie pownds" is a DIFFERENT clause — the original receipt; if this re-citation token is genuinely ff-initial, either the two clauses cite different figures or one reading is wrong → TNA arbitration mandatory either way.) The "fd" before "fom": in-line-lean with bar — fd-bar check extends (q-c).
- R9 (joins L9): ⟨sh⟩illinges w^{ch}[?] ⟨th⟩is ext — "shillinges ... this ext" clean; superscript relative "w^{ch}/wth" unsplit △ (q-g extends). Line-wrap → L10's STRUCK token sits where baseline supplies "[had]": eB q-f must weigh struck-"receaued" vs struck-"had" as candidates.
- R10 partial: ⟨W⟩illm ap ⟨R⟩ees at b2 foot — contracted "Willm"-lean △ (q-y; baseline "Willia[m]"); completes in b3. Name → conform-on-TNA.

Band 3 (y924–1717) — courier + attorney zone (cruxes b, c):

- R8/R9 overlaps re-sighted; joins good. Fold crease runs at tile-right — some line-tails cut (scan-limited).
- R10 (full): ⟨ffr⟩om ⟨th⟩e f̄d willm ap Rees — ✓ the "fd" is IN-LINE with the long bar-stroke — strongest on-leaf support yet for the fd-bar systemic reading (q-c); "willm" contracted-lean holds; "ap Rees" clean.
- R11 (joins L11): was brought ⟨th⟩is — clean ("brought" tail-form △ broughte/broughst, q-z). Fits "himselfe w^{ch} || was brought this || ext by Λ...".
- INTERLINE i1 (R-portion): «⟨—⟩ead man» — the surname tail of «^{Anthonie[?] Leadman}» re-sighted across the seam (small script, hovering) — SEAM DOUBLE-SIGHTING of "Leadman" ✓ geometry; forename still L-half-only, eB q-h.
- R12 (joins L12): ⟨w⟩arden o⟨f⟩ ⟨th⟩e ffleets Man — ✓✓ CLEAN native: the full courier phrase "...ext by Λ the Wa||rden of the ffleets Man" locked across the seam; "Man" majuscule-M-lean △ minor.

- R13 (joins L13): **was** <d>elyu(er)ed[?] vnto M^r — ★ **priority crux (c) native lean: "M"** — the glyph at the crease has the double-arch M + raised-r tail, DISTINCT from the W-with-superscript-m form sighted at L5 ("W^m Bulkeley") — same-leaf letterform comparison favors **M^r Jones** over "W^m Jones". △ lean only (q-j, eB; sits AT the fold crease — tail may be cut). "delyuered"-lean △ (dely-/deli-, q-bb).
- R14 (joins L14): <A>tturnie[?] in <th>is Court<e>[?] — "...Jones this exts || Attorney in this Courte" structure ✓; -ney/-nie and Court/Courte tails unsplit (fold crease; q-aa).
- R15 (joins L15): <th>is ext Λ[?] faieth[?] <th>at <h>e <h>a<d> + INTERLINE i3: «to <the?> fame <Interr—>[?]» — ★ the SECOND baseline interline EXISTS: small-script "to fame <—>" hovering below/above the R15 caret zone (q-m resolved-as-exists; content △ — "the" reduced? tail token unread; eB q-cc). Confirms baseline's "to [the] same [Interr.]" geometry.
- Foot partials (letters-denial zone) — completed in b4.

Band 4 (y1453–2245) — letters denial + joint decline + main-text END:

- R13/R14 overlaps re-sighted; joins good.
- R15 (full): <th>is ext «to fame <—>» faieth[?] <th>at <h>e <h>ad <—> — i3 re-sighted mid-row: visible "to fame <—>" with an unread tail cluster (Interr-lean); note the visible form lacks a clear "the" — **candidate delta: on-leaf «to fame Interr[?]» vs baseline "to [the] same [Interr.]"** (q-cc). Far-right: a barred/flourished cluster at the crease after "had" △ (q-ee — "not"? tail cut by fold).
- R16 (joins L16): **anie** <L>ettres<,>?> **fince** <h>is — ✓ "Lettres" PLENE with majuscule-L swash + double-t (baseline prints contracted "L[ett]res" — **delta candidate: the word may be written OUT, not abbreviated** △ q-ff); possible comma after △ (q-dd); "fince his" clean.
- R17 (joins L17): **in** <th>e **fleeete** — seam-overlap "in the" double-sighted ✓; flamboyant ff; final -e present ("fleeete" not "ffleet" HERE — vs R7's "ffleet" △ spelling variance on the same leaf, q-gg); possible stop after △.
- R18 (joins L18): **16** <I>nterr<—flourish> <h>e **is not** — seam "16" doubled ✓; NO ordinal mark on "16" (only "15" carries °); Interr-flourish (descender class); "he is not" clean-ish.
- R19 (joins L19): **be exami**<n>ed . — ✓ **MAIN TEXT ENDS with a stop after the abbreviated "examined"** — "appointed to be || be examined ." (seam overlap "be" doubled). Abbreviation form q-r.
- Below: gap, then the subscript stroke-tops cut at b4 foot — b5 completes.

Band 5 (y1981–2773) — THE AUTOGRAPH (crux f):

- R19 re-sighted: the final stop after "examined" is a CLEAR deliberate raised dot ✓.
- **SUBSCRIPTION native: <paraph-C> Re<e>s[?] ap[?] <Jh>on oid<e>?** — right-of-center, smaller/rougher second hand ✓ (deponent-autograph claim holds):
- **q-q RESOLVED:** the large open C-curve at the L-half edge = the LEADING PARAPH before "Res" — separate from the LI-ligature (which sits mid-signature in token 4). Baseline's stroke-order note confirmed with the assignment corrected in detail.
- Token 1: **"Re<e>s"-lean** — a doubled-e/flourished-e visible → △△ **micro-delta candidate vs baseline "Res": possibly "Rees" plene**. WISH-FULFILMENT-RISK class (reading toward the expected name "Rees ap John Lloyd") — lean only, NO reading asserted, eB (q-hh) + TNA mandatory.
- Token 2: **"ap"-expected** — but the strokes are ODD (w-like double-loop + tall stroke + dot) △ (q-ii).

- Token 3: ⟨Jh⟩on — the ff-like secretary Jh- ✓ (baseline's parse holds); "Jhon"-lean △.
- Token 4: ⟨Ll⟩oid(e?) — large-C Ll-ligature + "loid" ✓; final -e unsplit △.
- Alternate parse "Redd by Jhon Lloide": native does NOT support ("Res/Rees"+"ap" strokes; no "by"-form) — stays disfavored ✓.
- Below: blank; show-through ghosts; fold crease continues.

Bands 6–8 (y2509–4227) — blank check (R half):

Line	Text (diplomatic)	Apparatus
b6	NO recto ink. Show-through ghosts left side; the fold flap (right ~7%) blank verso-side-out; crease shadow runs full height.	
b7	NO recto ink. Ghosts fainter; two tiny red-brown ink-weight specks ON the fold-flap edge (x≈0.93, mid-band)	<i>possibly ink peeking from the folded-under strip — unreadable, scan-limited, FOLD zone TNA item stands.</i>
b8	NO recto ink. Decayed ragged foot against black backing; ghosts at head only. 007R text-complete: main text ends at R19 ("...be examined."); autograph at b5; nothing below.	

007 NATIVE CENSUS (provisional, pre-eB)

- **19 main lines** (both halves joined; ans-13 = 1 line · ans-14 = 16 lines · ans-15/16 decline = 2 lines) + **3 interlines** (i1 «Anthonie[?] Leadman» · i2 «to his rembraunce» · i3 «to (the?) fame (Interr—)[?]»)) + **1 strike** (L10 ~~receaued/had?~~) + torn-head ghost line + **autograph subscription** (⟨paraph-C⟩ Re(e)s[?] ap[?] ⟨Jh⟩on ⟨Ll⟩oid(e?)) + final stop after "examined".
- Baseline census match: structure identical (ans 13 / 14 / 15–16 / autograph); line-grain indexed for the first time; both tears text-free; fold zone scan-limited re-verified; verso show-through re-confirmed (TNA verso order stands).

007 eB QUEUE (for the eB pass, next window — 16 eB tiles)

TOP: q-x SUM WORD (R8 "ff⟨y/i⟩⟨—⟩" — ff-initial confirmed native; split ffitene/ffowertene/fftytie) · q-h i1 forename ("Anthonie" vs "Humphrey") · q-j "M" vs W^m Jones (M-form lean) · q-hh autograph "Res/Rees" (wish-fulfilment-risk, lean-only) · q-c fd-bar sites ×3 (L6, L8/R8, R10 — systemic check) · q-f L10 struck token (receaued vs had). **Standard:** q-a ans-13 struck [th?] · q-b L3 receau(e)d · q-d L7 head cluster (fince-he-was vs this-ext) · q-e feaven/lome · q-g/q-aa/q-bb/q-z form-tails (w^{ch}, Atturrie/Courte, delyuered, brought) · q-i L13 "was" · q-k/q-l L15 "further"-lean + BARRED token (under-bar unexplained) · q-cc i3 content ("to fame Interr[?]" vs baseline "to [the] same") · q-n i2 contracted "rembraunce" · q-o written/wrytten · q-p "15" & "16" stop/Interr tail · q-r examēd/examined forms · q-s faieth/faith · q-t maynetenaunce raised mark · q-u comma after Bulkeley · q-v f(er)uauntes · q-w imprifoned/imprifonment · q-y Willm contracted · q-dd comma after Lettres · q-ee post-"had" barred cluster at crease · q-ff Lettres plene vs baseline "L[ett]res" · q-gg fffleet/ffleete same-leaf variance · q-ii "ap" strokes · q-q RESOLVED (paraph assignment).

007 eB PASS (2026-07-08) — queue dispositions per band-pair

007L b1+b2 eB:

- Torn-head ghost: re-sighted in eB (round loop center-top + ascender cluster upper-right ON the flap edge) — unreadable, stands as lost-line ghost. TNA item stands.
- **q-a (ans-13 struck ~~th?~~): NOT re-found in eB.** After "13." only the flourish tail off the period precedes "he is not". Native + eB both fail to sight a struck token → **DELTA CANDIDATE: baseline's ~~th?~~ may be a misparse of the period-flourish.** Retained  (not WITHDRAWN — baseline had it from a different render); TNA check.
- **q-b (L3 receaued<d>): ✓eB-leaning "receaued"** — r-initial + -eaeu- bowl run visible in eB; residual minim  only.
- **L5 "ffrom W^m Bul(keley)" ✓eB** — the W-with-superscript-m form CLEAN in eB. This is the firm same-leaf comparator for q-j (R13 M-form).
- **q-c site 1 (L6 "the fd S^r Rich"): ✓eB IN-LINE barred fd** — long bar rides the in-line cluster; NO hovering small script above the line → baseline's interline "s^[ai]d" at this site is contradicted; in-line barred fd confirmed (fd-bar systemic, site 1/3).
- **q-d (L7 head): still unsplit at b2** — mid-dot re-sighted between the head cluster and the "ext"-like cluster; candidates unchanged ("fince he was [first?] imprifoned" vs "this ext" formula); carried to b3 eB.
- **q-e (L9 feaven/fome): eB INCONCLUSIVE** — only a weak "fe-" start visible; a "feaven"-lean would be sense-adjacent (before "shillings"), NOT asserted;  retained, TNA.
- L4 "monie ffrom <S>" swash-majuscule re-sighted (S(i)r-lean holds); L8 "otherwife then the fd/fom" re-sighted, site-2 fd-bar carried to R b2 disposition.

007L b3+b4 eB:

- **q-f (L10 struck token): struck-"receaued" STRENGTHENED** — the token under the deletion bar is LONG (6–8 letters; r-initial-lean, -ued-class tail) → **struck-"had" EXCLUDED by length.**  retained on exact letters; strike itself ✓eB (full-length bar, deletion-class, distinct from fd-bar).
- **q-h (i1 forename): ✓eB-leaning "Anthonie"** — -nth- cluster + -onie tail both visible in eB; "Humfrey" NOT supported (no -mfr- descender run). Surname "<L>eadman" holds (L-initial still P-like ). Name-class → TNA MANDATORY regardless (names above all).
- **L12 caret geometry ✓eB LOCKED** — "ext by $\wedge$ <th>e <W>a<rden>" with the caret clean after "by"; i1 hovers directly above → insertion parse (name added to originally anonymous courier phrase) firm.
- **q-i (L13 "was"): ✓eB** — "wa<s>" at L-cut, seam-doubled with R13's "was" → resolved.
- **q-k (L15 "further"): lean STRENGTHENED** — eB shows a clear u-bowl after the f-initial → "faieth" EXCLUDED for this token; "further" favored. Lean-only (006R discipline); TNA.
- **q-l (L15 under-bar): candidate explanation found** — the giant left-margin swash-flourish (same class as the "To the 14." and "To the 15°" swashes) sweeps its TAIL directly beneath the L15 token → the "under-bar" is plausibly a crossing flourish-stroke, NOT a deliberate bar. Explained-lean ; TNA confirm.

- **q-n (i2): ✓eB CONTRACTED "rembraunce"** — token short: re- + ONE minim group + -braunce; no second -em-; no suspension bar sighted. **DELTA vs baseline** "to his remembraunce" **holds**.
- **L16 caret ✓eB** — "not Λ" clean, i2 directly above; geometry locked. **q-o:** verb shows w + r + vowel + -tt- + en; double-t confirmed; i/y vowel unsplit ("written"/"wrytten" both live ).
- **L17 "imprifonment" ✓eB** — -ment tail clean. Contrast pair ON-LEAF with R7's "imprifon(ed)" (ans-14 body) — both forms present; bears on q-w.
- **q-p (L side): "15" ordinal ✓eB · "16" BARE ✓eB** (no ordinal mark); stop/Interr-tail check stays with R18. L19 "<a>ppointed to be ex(—)" clean ✓.

007L b5–b8 eB (subscription edge + blank checks):

Line	Text (diplomatic)	Apparatus
b5	L18/L19 re-sighted at head. Paraph-C (q-q): heavy deliberate pen-weight, cleanly SEPARATE from the following token head cut at tile edge	<i>leading-paragraph assignment holds ✓eB. Below: blurred show-through only.</i>

- b6–b8 **blank checks ✓eB:** eB amplification pulls the verso ghosts up strongly but EVERY mark stays blurred/mirror-class — no pen-crisp recto stroke anywhere. b7's two dark specks remain round/surface-debris (no stroke geometry). b8 foot = decay + backing only. **007L text-complete confirmed under eB.**

007R b1+b2 eB (sum zone):

- **q-x (R8 SUM WORD) — ADVANCED:** initial ff ✓✓eB — twin-ascender double-f identical to the scribe's "ffrom"/"ffleet" forms on adjacent lines (same-leaf letterform match). Medial narrowed: ff + ONE descender (y/ij-class) + e-bowl + "-ne/-de"-class tail; **NO w-bowl → "ffwertene" DISFAVORED; "-ie" tail not seen → "ffyftie" WEAKENED; surviving lean = "ffiftene/ffyftene" (fifteen).**   retained (tail runs at the fold crease); TNA MANDATORY. No wish-fulfilment pull: fifteen matches none of the prior candidates (£13 first sweep / "thirtie" 005L ans-6 / open re-sweep). If genuine → the re-citation clause names a DIFFERENT figure than ans-6's "thirtie pownds" → both to TNA arbitration.
- **q-t (R3 maynetenaunce raised mark): ✓eB CONFIRMED ×2** (b1 + b2 overlap) — raised superscript-a/tittle real → contraction "mayneten^a(un)ce"; the ans-14 ↔ Art-14 verbatim-mirror token stands; exact expansion form for TNA.
- **q-r (R1 "examed"): ✓eB** — abbreviation bar clean; ans-13 site uses the SHORT form (vs R19's "examed" — same-leaf variance, see q-r final).
- **q-u (comma after Bulkeley): NOT re-found in eB** → minor delta candidate (baseline comma may be editorial/pen-rest). .
- **R10 "<w>illm ap Rees" — "Rees" DOUBLE-E PLENE ✓eB (scribe's hand):** new on-leaf onomastic comparator for q-hh — the scribe writes the surname "Rees" with doubled e. (Autograph is a different hand; comparator is contextual, not decisive.) q-y "willm" contracted-lean holds .
- **q-e (L9/R9 feaven/fome):** seam tail = minim-soup in eB; earlier weak "fe"-lean NOT strengthened → stays genuinely unsplit , TNA. q-g "w^{ch}" superscript-form lean holds . q-c site 2 (R8 "fd" before "fom"): in-line bar lean holds . R4 "S" raised-letter form  (raised e/r ambiguous); "nor ffrom anie of" ✓; seam "Bullkeley" doubled ✓. q-w (R7 imprifoned/-ment): short tail before "in" → "-ed"-lean  (contrast L17's clean "-ment" in the letters clause).

007R b3+b4 eB (attorney + i3 + decline zone):

- **q-c site 3 (R10 "⟨ffr⟩om ⟨th⟩e f̄d willm ap Rees"):** ✓eB IN-LINE barred f̄d — bar rides the in-line cluster; NO interline. **f̄d-BAR SYSTEMIC READING NOW CONFIRMED ON THIS LEAF:** sites L6 ✓eB + R10 ✓eB + R8 lean — baseline's three interline "s[ai]d" notations in ans-14 should read as in-line barred f̄d (delta class carried from 006R). "willm" contracted ✓; "Rees" double-e re-sighted ✓.
- **q-j (R13 attorney forename): "M"** lean **STRENGTHENED ✓eB-leaning** — base glyph arch-topped (M-class; W-class is bottom-cup, cf. L5 "W" comparator clean in eB), raised element = single r-loop (not the three-minim raised m). → "was ⟨d⟩elyuered vnto M^r || Jones this exts Atturnie in this Courte". △ retained (crease); TNA (name-adjacent). q-bb "delyuered" y-descender ✓lean; q-aa "Atturnie"-lean, Court/Courte unsplit △; q-z "brought" tail unsplit (brought/broughte/broughtst) △.
- **i1 R-portion «⟨—⟩ead man» re-sighted ✓eB** (small script hovering above R12); **R12 "⟨w⟩arden o(f) ⟨th⟩e ffleets Man" ✓✓eB clean.**
- **q-cc (i3 content): ✓eB-leaning "to fame ⟨Interr—⟩"** — small script clearly re-sighted x2 (b3 foot + b4); **NO "the" between "to" and "fame" → DELTA vs baseline** "to [the] same [Interr.]" **holds.** Tail token flourished l/R-initial, Interr-lean △.
- **q-ee (post-"had" crease cluster): terminal-flourish-lean** △ — reads as the line-end flourish after "he had" (line then wraps to L16 "not Λ..."); possible letters lost at fold → TNA fold item. "had" (not "hath") lean holds △.
- **q-ff ("Lettres"):** ✓eB **PLENE** — majuscule-L swash + double-t + -res written out. **DELTA vs baseline "L[ett]res" confirmed-leaning.** **q-dd:** tall slash re-sighted between "Lettres" and "fince" — virgule vs crowded f-ascender △.
- **q-gg: same-leaf variance STANDS** — R7 "ffleet" vs R17 "ffleete" both eB-sighted △ (faint possible stop after R17's "ffleete" △).
- **q-p (R side) — NEW DELTA CANDIDATE:** no stop re-found after "16"; the sequence reads "To the 15° & 16 Interr⟨—flourish⟩ ⟨h⟩e is not..." → **baseline's period in "15° & 16." may be the Interr suspension**, i.e. on-leaf = "...& 16 Interr⟨atories⟩". △, TNA.
- **q-r RESOLVED as same-leaf variance:** R1 "exaīmed" (SHORT form, ✓eB) vs R19 "exaīmed" (LONG form with -in-, ✓eB). **R19 final raised stop ✓✓eB** — the deposition ends "...appointed to be || be exaīmed ." with a deliberate stop.
- q-s "faieth" mild lean holds △ (faieth/faith unsplit at both sites).

007R b5–b8 eB (autograph + blank checks):

- **AUTOGRAPH (q-hh/q-ii):** paraph = enormous heavy C-bowl, cleanly SEPARATE from token 1 (q-q holds ✓eB). **Token 1: R + e(+e?) + final s/d-ambiguous** — "Res"/"Rees"/"Reed"-class all letterform-live in eB; doubled-e lean RETAINED, NOT FIRMED. △△ **WISH-FULFILMENT-RISK class** — no reading asserted; TNA arbitration MANDATORY. (R10's scribe-hand "Rees" double-e = context only, different hand.) **Token 2 (q-ii): "ap"-lean holds** — flourished-a double-loop + p-descender; "by" disfavored (no b-ascender) → **"Redd by" alternate stays disfavored ✓eB-lean.** **Token 3 "⟨Jh⟩on" + tail flourish** △; **token 4 "⟨LI⟩oid" + terminal e/s-flourish unsplit** △.

- b6–b8 **blank checks** ✓eB: mirror ghosts only; fold flap blank verso-out; **b7 flap-edge specks remain point-like (no stroke geometry)** — scan-limited, TNA fold item stands; b8 foot = decay + backing. **007R text-complete confirmed under eB.**

007 CENSUS — FIRM (post-eB, 2026-07-08)

19 main lines + 3 interlines + 1 strike + torn-head ghost line + autograph subscription + final stop. Joined diplomatic text (seam-doubles collapsed; all △/[?] live):

007 DELTA LOG vs baseline `\_WORKING\_LLOYD\_DEPOSITION\_003R-007.md` §007

1. **SUM (ans-14 re-citation):** baseline "[th/ff]i[?]t[]e pownd[s]" → **ff-initial ✓✓ (nat+eB, matches scribe's ffrom/ffleet form); medial narrows to "ffiftene/ffyftene" (FIFTEEN)-lean; "ffowertene" disfavored (no w-bowl); "ffyftie" weakened (tail -ne/-de, not -ie).** Excludes "thirtie"/"thirtene" AS WRITTEN HERE. vs 005L ans-6 "thirtie pownds" (different clause: original receipt) → different figures OR one misread → **TNA arbitration mandatory.**

2. **fd-bar systemic (from 006R)**: baseline's three ans-14 interline "s[ai]d" notations → **in-line barred f̄d**: L6 ✓eB + R10 ✓eB + R8 lean. Confirmed on this leaf.
3. **ans-13 struck [th2]**: NOT re-found (native + eB) — likely misparse of the "13." period-flourish. Baseline correction candidate.
4. **i1 forename**: "Anthonie"-lean ✓eB (-nth- + -onie visible); "Humfrey" (first sweep) NOT supported. Caret sits after "by" → name ADDED to originally anonymous courier phrase (matches ans-6's anonymity).
5. **i2**: on-leaf "rembraunce" CONTRACTED ✓eB vs baseline "to his remembraunce".
6. **i3**: on-leaf "to fame (Interr—)" — NO "the" ✓eB-leaning vs baseline "to [the] same [Interr.]".
7. **"Lettres" PLENE ✓eB** vs baseline contracted "L[ett]res"; possible virgule after △.
8. **Attorney forename**: "M"-lean strengthened (arch-top M + single raised r-loop vs L5 "W" comparator) → "M^r Jones" favored over "W^m Jones". △ crease; TNA.
9. **"To the 15° & 16 Interr(—)"**: no stop after "16" re-found; baseline's "16." period may be the Interr suspension. "16" carries NO ordinal mark (only "15°").
10. **exa^med (ans-13, short) vs exa^mined (final, long)**: same-leaf variance — baseline prints both "ex[amin]ed".
11. **Struck token (L10)**: LONG (6–8 letters) → struck-"receaued"-lean; **"had" EXCLUDED by length** (baseline supplied "[had]" as candidate — remove).
12. **Autograph token 1**: doubled-e lean + s/d-final ambiguity ("Res"/"Rees"/"Reed"-class live) vs baseline "Res" — △△ wish-fulfilment-guarded, lean only. "ap"-lean holds; "Redd by" stays disfavored.
13. Minor: "willm" contracted (baseline "Willia[m]"); "ffleet" (R7) vs "ffleete" (R17) same-leaf; comma after "Bulkeley" not re-found; "maynetenaunce" raised-a contraction confirmed (mirror token stands); "hath" (L3) vs "had" (R15) both present as baseline.

007 → TNA ARBITRATION LIST (additions)

Sum word ("ffiftene?"-class vs 005 ans-6 "thirtie") · i1 «Anthonie[?] Leadman» (name) · M^r/W^m Jones (name-adjacent) · autograph token 1 Res/Rees/Reed + "ap" strokes (names above all) · fd-bar sites ×3 · struck L10 token · L15 "further"-lean + under-bar (swash-crossing lean) · L7 head cluster (q-d, unresolved BOTH passes) · q-e feaven/lome (unresolved) · i3 tail token · q-ee post-"had" crease cluster · fold-zone line-tails + b7 flap-edge ink specks · verso of 007 (show-through rows b5–b8) · torn-head lost line.
