Senior ML Engineer -50400196

We're building a new team building to bring the power of Datadog to developers within AI-focused Developer workflows such as AI agents like Cursor, Claude code, GitHub Copilot and Datadog's native AI agents.

We're looking for product-minded engineers who are excited about developer tools, SDLC improvements and AI in general to help us quickly define and ship features and tools that make all Datadog customers 10x developers.

At Datadog, we place value in our office culture - the relationships that it builds, the creativity it brings to the table, and the collaboration of being together. We operate as a hybrid workplace to ensure our employees can create a work-life harmony that best fits them.

What You'll Do:

- Work on agents, prompts, evals, MCPs and direct agent tools from ideation to productization, for allowing Datadog to help companies and developers to maximize the benefit of their

integration with Datadog

- Help conceptualize and build innovative User flows and experiences within Datadog's user space and different extensions
- Prototype and see what works well in the real world, iterate closely with our users, and then ship
- Follow the latest research on LLM prompt optimization, agents, and code editing.
- Support other Datadog product teams to help them build and productionize their developer-focused AI Workflows. For example, you'll work with the Live Debugger team to create an agentic production debugging experience, delivering on the vision of "one click to reproduce" for production errors.

Who You Are:

- You're a backend engineer with at least 5 years of professional experience who values code simplicity and performance. You've shipped software that uses LLMs to production
- You are passionate about Generative AI and its ability to help software engineers be more productive
- You have relevant experience with Large Language Models, large-scale systems and data sets,

machine learning, or adjacent fields

- You are a great community ambassador and can drive hard technical conversations towards a pragmatic solution
- You want to work in a fast, high-growth startup environment that respects its engineers and customers
- You have experience writing classic or AI oriented developer tools(such as IDEs, static code analysis, SDLC tools etc).
- You have a BS/MS/PhD in a Computer Science, Engineering or related scientific field or equivalent experience

Datadog values people from all walks of life. We understand not everyone will meet all the above qualifications on day one. That's okay. If you're passionate about technology and want to grow your skills, we encourage you to apply.

Benefits and Growth:

- New hire stock equity (RSUs) and employee stock purchase plan (ESPP)
- Continuous professional development, product training, and career pathing
- Intradepartmental mentor and buddy program for

- Intradepartmental mentor and buddy program for in-house networking
- An inclusive company culture, ability to join our Community Guilds (Datadog employee resource groups)
- Access to Inclusion Talks, our Internal panel discussions
- Free, global mental health benefits for employees and dependents age 6+
- Competitive global benefits

Benefits and Growth listed above may vary based on the country of your employment and the nature of your employment with Datadog.

About Datadog:

Datadog (NASDAQ: DDOG) is a global SaaS business, delivering a rare combination of growth and profitability. We are on a mission to break down silos and solve complexity in the cloud age by enabling digital transformation, cloud migration, and infrastructure monitoring of our customers' entire technology stacks. Built by engineers, for engineers, Datadog is used by organizations of all sizes across a wide range of industries. Together, we champion professional development, diversity of thought,

innovation, and work excellence to empower continuous growth. Join the pack and become part of a collaborative, pragmatic, and thoughtful people-first community where we solve tough problems, take smart risks, and celebrate one another. Learn more about #DatadogLife on Instagram, LinkedIn, and Datadog Learning Center.

Equal Opportunity at Datadog:

Datadog is proud to offer equal employment opportunity to everyone regardless of race, color, ancestry, religion, sex, national origin, sexual orientation, age, citizenship, marital status, disability, gender identity, veteran status, and other characteristics protected by law. We also consider qualified applicants regardless of criminal histories, consistent with legal requirements. Here are our Candidate Legal Notices for your reference.

Datadog endeavors to make our Careers Page accessible to all users. If you would like to contact us regarding the accessibility of our website or need assistance completing the application process, please complete this form. This form is for accommodation requests only and cannot be used to inquire about the status of applications.

What You'll Do:

- Work on prompts, evals, and agent tools for working with code as part of the Datadog MCP server, and on the engineering to productionize these systems

and integrate them within our customer's IDE

- Help conceptualize and build innovative UIs within the Datadog Cursor / VSCode extension that work hand in hand with our groundbreaking AI experiences.
- Prototype and see what works well in the real world, iterate closely with our users, and then ship
- Follow the latest research on LLM prompt optimization, agents, and code editing.
- Support other Datadog product teams to help them build and productionize their developer-focused MCP toolings. For example, you'll work with the Live Debugger team to create an agentic production debugging experience, delivering on the vision of "one click to reproduce" for production errors.

Who You Are:

- You're a backend engineer with at least 5 years of professional experience who values code simplicity and performance. You've shipped software that uses LLMs to production
- You are passionate about Generative AI and its ability to help software engineers be more productive
- You have relevant experience with Large Language Models, large-scale systems and data sets, machine learning, or adjacent fields
- You are a great community ambassador and can drive hard technical conversations towards a pragmatic solution
- You want to work in a fast, high-growth startup environment that respects its engineers and customers

- You have experience writing developer tools (such as IDEs, static code analysis tools, or compilers)
- You have a BS/MS/PhD in a Computer Science, Engineering or related scientific field or equivalent experience

Datadog values people from all walks of life. We understand not everyone will meet all the above qualifications on day one. That's okay. If you're passionate about technology and want to grow your skills, we encourage you to apply.

Datadog offers a competitive salary and equity package, and may include variable compensation. Actual compensation is based on factors such as the candidate's skills, qualifications, and experience. In addition, Datadog offers a wide range of best in class, comprehensive and inclusive employee benefits for this role including healthcare, dental, parental planning, and mental health benefits, a 401(k) plan and match, paid time off, fitness reimbursements, and a discounted employee stock purchase plan.

The reasonably estimated yearly salary for this role at Datadog is:

\$187,000—\$240,000 USD

Artificial Intelligence • Cloud • Software • Cybersecurity

We are building the monitoring and security platform for developers, IT ops teams and business users in the cloud age.

The Role

Datadog is seeking an extremely talented professional to drive product strategy, source, manage, and execute acquisitions, source venture investments, and help run the "Datadog for Startups" program. You will be a key partner to Datadog's founders and startup founders and highly visible at the most senior levels of Datadog. The group reports directly to the CEO.

We are looking for an innovative and strategic thinker who is passionate about Datadog and the future of cloud services. The ideal candidate enjoys driving new product development ideas, likes to "roll up sleeves and get hands dirty", is hungry

 Datadog People Business Partner - NYC	10 Hours Ago Hybrid New York, NY, USA Easy Apply 120K-175K Annually Senior level
 Datadog Product Marketing Manager	10 Hours Ago Hybrid New York, NY, USA Easy Apply 123K-164K Annually Junior

Datadog is seeking an extremely talented professional to drive product strategy, source, manage, and execute acquisitions, source venture investments, and help run the "Datadog for Startups"

and execute acquisitions, source venture investments, and help run the Datadog for Startups program. You will be a key partner to Datadog's founders and startup founders and highly visible at the most senior levels of Datadog. The group reports directly to the CEO.

We are looking for an innovative and strategic thinker who is passionate about Datadog and the future of cloud services. The ideal candidate enjoys driving new product development ideas, likes to "roll up sleeves and get hands dirty", is hungry for more responsibility, and puts the company's interests first. Superb negotiation skills (or willingness to develop them) are essential. This role includes managing relationships that may be unconventional in nature and have broad implications across Datadog. The team is small and values authentic, strong-willed individuals who think creatively and proactively.

The ideal candidate will research and generate ideas for new markets to enter, prioritize objectives and plan internal activity, drive due diligence and valuation analysis, spearhead term sheet and contract negotiations, create and present strategic documents and recommendations, and support integration by partnering with key leaders.

At Datadog, we place value in our office culture - the relationships and collaboration it builds, and the creativity it brings to the table. We operate as a hybrid workplace to ensure our Datadogs can create a work-life harmony that best fits them.

What You'll Do:

- Develop a deep understanding of Datadog's products and potential new markets for further expansion
- Identify opportunities for M&A and Datadog Ventures through direct engagement with senior business leaders, entrepreneurs, and venture capitalists
- Work closely with senior product and engineering leaders to assess potential acquisitions and investments
- Partner with business and product teams to comprehensively assess expansion opportunities and build internal and external consensus
- Lead all pre-transaction diligence efforts
- Identify value creation opportunities and risks in potential transactions
- Bring transactions over the finish line
- Engage with the startup community, early-stage VCs, and key internal stakeholders to help build the Datadog for Startups program
- Play a critical role in negotiating large, highly-complex partnerships with the major cloud hyperscalers
- Work with cross-functional groups within Datadog, including Product, Operations, Engineering, Legal, Finance, Tax, and Accounting teams

What you need to know about the NYC Tech Scene

As the undisputed financial capital of the world, New York City is an epicenter of startup funding activity. The city has a thriving fintech scene and is a major player in verticals ranging from AI to biotech, cybersecurity and digital media. It also has universities like NYU, Columbia and Cornell Tech attracting students and researchers from across the globe, providing the ecosystem with a constant influx of world-class talent. And its East Coast location and three international airports make it a perfect spot for European companies establishing a foothold in the United States.

Key Facts About NYC Tech

- Number of Tech Workers: 549,200; 6% of overall workforce (2024 CompTIA survey)
- Major Tech Employers: Capgemini, Bloomberg, IBM, Spotify
