U.S. Commerce Secretary Gina Raimondo Announces Expansion of U.S. AI Safety Institute Leadership Team

The institute is housed at the National Institute of Standards and Technology (NIST).

April 16, 2024

U.S. Secretary of Commerce Gina Raimondo announced today additional members of the executive leadership team of the U.S. AI Safety Institute (AIS), which is housed at the National Institute of Standards and Technology (NIST). Raimondo named Paul Christiano as head of AI safety, Adam Russell as chief vision officer, Mara Campbell as acting chief operating officer and chief of staff, Rob Reich as senior advisor, and Mark Latonero as head of international engagement. They will join AIS Director Elizabeth Kelly and Chief Technology Officer Elham Tabassi, who were [announced in February \(https://www.commerce.gov/news/press-releases/2024/02/us-commerce-secretary-gina-raimondo-announces-key-executive-leadership\)](https://www.commerce.gov/news/press-releases/2024/02/us-commerce-secretary-gina-raimondo-announces-key-executive-leadership). The AIS was [established within NIST \(https://www.commerce.gov/news/press-releases/2023/11/direction-president-biden-department-commerce-establish-us-artificial\)](https://www.commerce.gov/news/press-releases/2023/11/direction-president-biden-department-commerce-establish-us-artificial) at the direction of President Biden, including to support the responsibilities assigned to the Department of Commerce under the president's landmark Executive Order.

“To safeguard our global leadership on responsible AI and ensure we’re equipped to fulfill our mission to mitigate the risks of AI and harness its benefits, we need the top talent our nation has to offer. That is precisely why we’ve selected these individuals, who are the best in their fields, to join the U.S. AI Safety Institute executive leadership team,” said U.S. Secretary of Commerce Gina Raimondo. “Developing guidelines that will strengthen our safety and security, engaging with civil society and business, and working in lockstep with our allies are fundamental to addressing this generation-

defining technology. Because of President Biden’s leadership, we’re cultivating the talent pool necessary to achieve these critical goals.”

“I am very pleased to welcome these talented experts to the U.S. AI Safety Institute leadership team to help establish the measurement science that will support the development of AI that is safe and trustworthy. They each bring unique experiences that will help the institute build a solid foundation for AI safety going into the future.”

—Under Secretary of Commerce for Standards and Technology and NIST Director Laurie E. Locascio
