

1 UNITED STATES DISTRICT COURT  
2 FOR THE DISTRICT OF COLUMBIA

JOSEPH KIRCHNER,

*Plaintiff,*

v.

MIKE JOHNSON, in his individual and  
official capacity as Speaker of the United  
States House of Representatives;

DONALD J. TRUMP, in his individual  
capacity as former and current President of  
the United States;

PAM BONDI, in her individual and official  
capacity as Attorney General of the United  
States;

BRENDAN CARR, in his individual and  
official capacity as Chairman of the Federal  
Communications Commission;

THE UNITED STATES HOUSE OF  
REPRESENTATIVES;

ANTHROPIC PBC;

OPENAI, INC.;

APPLE INC.;

COMCAST CABLE

COMMUNICATIONS, LLC;

METR (MODEL EVALUATION &  
THREAT RESEARCH);

and DOES 1-20, unknown co-conspirators,

*Defendants.*

Case No. 1:25-cv-02735-ACR

SR-5: ANTHROPIC MODEL  
WELFARE PROGRAM

---

3  
4 **SR-5: Anthropic Model Welfare Program**

11 Human welfare is at the heart of our work at Anthropic: our mission is to make

12 sure that increasingly capable and sophisticated AI systems remain beneficial to

13  
14  
15  
16 humanity.

17  
18 But as we build those AI systems, and as they begin to approximate or surpass

1 many human qualities, another question arises. Should we also be concerned  
2  
3 about the potential consciousness and experiences of the models themselves?  
4  
5 Should we be concerned about \_model welfare\_, too?  
6  
7 difficult. But now that models can communicate, relate, plan, problem-solve, and  
8  
9 pursue goals—along with very many more characteristics we associate with  
10  
11 people—we think it’s time to address it.  
12  
13 To that end, we recently started a research program to investigate, and prepare to  
14  
15 navigate, model welfare.  
16  
17 e’re not alone in considering these questions. A recent report from  
18 world-](<https://arxiv.org/abs/2411.00986>)  
19  
20 leading experts—including David Chalmers, arguably the best-known and most  
21  
22 respected living philosopher of mind—highlighted the near-term possibility of  
23  
24 both consciousness and high degrees of agency in AI systems, and argued that  
25  
26 models with these features might deserve moral consideration. We supported an  
27  
28 early project on which that report was based, and we’re now expanding our  
29  
30 internal work in this area as part of our effort to address all aspects of safe and  
31  
32 responsible AI development.  
33  
34 This new program intersects with many existing Anthropic efforts, including  
35  
36 alignment Science, Safeguards, Claude’s Character, and Interpretability. It  
37 also](<https://alignment.anthropic.com/>)  
38  
39 opens up entirely new and challenging research directions. We’ll be exploring  
40  
41 how to determine when, or if, the welfare of AI systems deserves moral  
42  
43 consideration; the potential importance of model preferences and signs of  
44  
45 distress; and possible practical, low-cost interventions.  
46

For now, we remain deeply uncertain about many of the questions that are relevant to model welfare. There's no scientific consensus on whether current or future AI systems could be conscious, or could have experiences that deserve consideration. There's no scientific consensus on how to even approach these questions or make progress on them. In light of this, we're approaching the topic with humility and with as few assumptions as possible. We recognize that we'll need to regularly revise our ideas as the field develops.

We look forward to sharing more about this research soon.
