LEFT PAGE (005L) — NATIVE SWEEP

Band 1 (La b1 + Lb b1, src y 0–660): page head; blank upper margin ~y<400, answer-6 opens with a big flourished T. Seam-lock word b1: "Interrog" (La right edge ≈ Lb left edge); second sighting "receib[ed]" on L2.

- **L1:** ⟨T⟩o the 6 . Interrog⟨s⟩[?] this ex[aminan]t faieth || th[at?]△ ⟨he?⟩[edge-cut]△
- **L2:** he did not ⟨r⟩eceibe[d?]△ nor had anie[?]△ ⟨...⟩[edge-cut]
- **L3:** or ⟨l⟩om[m]es△ of monie of S[i]r Richard ⟨B⟩ul[kley — edge-cut]
- (L4 top-of-descenders only in b1 — read in band 2)

Band 2 (La b2 + Lb b2, src y 396–1188): seam-locks: "Bulkley" (L4), "h[is] ma/ffre[?]" tokens (L5), "appointment" (L7), "ffirft" (L8). A tiny TWO-LINE MARGINAL NOTE sits in the gutter zone at Lb-b2 far right (x≈0.51 full-image, between L6–L7 height): "w[?] ⟨th⟩[?] / n[?]h ⟨th⟩[?]"△ — bleed-through vs. true marginalia UNRESOLVED, queue.

- **L4:** ⟨...⟩[?]△ ⟨Dan?⟩[?]△ ⟨B⟩ulkley or ⟨e⟩ither of them nor o[f]

Band 3 (La b3 + Lb b3, src y 924–1717): seam-locks: "the" (L9), "profecu—" (L10), "laft paft" (L11), "gabe" (L13), "repaym[en]t" (L14). Gutter marginalia tokens 再 sighted at Lb-b3 top right ("w[?]<th>[?]/ ...")[△] — still unresolved bleed-vs-marginal. **INTERLINE CANDIDATE L#i1:** "^{now}" above the row after L14 (Lb b3 foot zone).

- L10: ill or <p>rofecuc[i]on of that fuit[e?]△ <th>[?][△]

- (L15 zone at b3 foot with ^{now} interline — band 4)

Band 4 (La b4 + Lb b4, src y 1453–2245): seam-locks: "<D>ofam[?]" cluster (L15), "monie" (L16), "fent" (L17), the struck word (L18), "H[?]" cluster (L20), the <ff>-amount word (L21). **STRIKE L#1 (L18):** "~~o{rr}owe?~~" struck, "lend" written after — the borrow→lend correction. ^{now} interline (L#i1) belongs to L15.

- (L22 "...this ext by fome of th[?]" partial at b4 foot — band 5)

Band 5 (La b5 + Lb b5, src y 1981–2773): seam-locks: "brought" (L22), "ffleete" (L23), "Interr—" (L24), "imprifoned" (L25), "fd" (L26), "Rowe" cluster (L27). **ANSWER-6 → ANSWER-7 BOUNDARY between L23 and L24** (blank ~1.5-line gap, flourished "To the 7").

- (L28 "...about a ten[emen]t of" partial at b5 foot — band 6)

Band 6 (La b6 + Lb b6, src y 2509–3302): seam-locks: "Richard" (L28), "th[e]" (L29), grammar-join "a || brother of his" (L29→L30). **STRIKE L#2 (L27 line-start):** "~~<th>e felfe?~~" struck before "in Cornwall" △. **STRIKE L#3 (L29):** heavy bar "~~feid w[?]th me~~" △ — eB priority. Possible bar/otiose over "acquainted" (L32)△. **INTERLINE CANDIDATE L#i2:** raised "«m[e]e?»" at L32 Lb right end△. Small mark (caret? dot?) before "about" (L28)△.

- **L28:** w[i]th the ⟨f⟩d ⟨th⟩e[?]△ ⟨R⟩ichard [«?»]△ about a ten[emen]t of [line-end]

- (L34 partial at b6 foot — band 7)

Band 7 (La b7 + Lb b7, src y 3038–3830): seam-locks: "they" (L34), "⟨W⟩m" (L35), "con—" (L37). The bar over "acquainted" (L32) re-sighted — steady stroke, otiose/q-macron LEAN (not a strike)△.

- **L34:** ⟨d⟩yett[?]△ where they || ⟨d⟩iett[ed?]△ «do[?]»△ , & ⟨th⟩efe[?]△ fometymes[?]△ [cut]

- **L39 (final line):** vpon[?]△ the ⟨f⟩d[?]△ ⟨...⟩ ⟨f⟩ame[?]△ [page foot]
- (band 8 = foot margin confirm)

Band 8 (La b8 + Lb b8, src y 3566–4227): foot confirm — L37/L38 re-sighted; **L39 is the page's final line;** below it BLANK foot margin (~40% of band), torn bottom edge, **NO signature on the left page.** L39's last word is a big flourished form spanning the seam: "⟨C⟩aufe / ⟨f⟩ute / ⟨f⟩ame"△ — eB priority.

LEFT NATIVE CENSUS (provisional): L1–L39 = 39 lines (answer 6 = L1–L23; answer 7 = L24–L39). Same left-page line count as membrane 004 — scribal-layout family trait holds.

LEFT eB QUEUE (005L)

- 1. L1–L2 head tokens** (b1): post-"faieth" token; "receibe[d?]" ; "nor had anie" tail; L2 edge-cut.
- 2. L3 initial** (b1/b2): "⟨f⟩om[m]es" vs "⟨Th⟩oms" letterform.
- 3. L4 head** (b2): who besides Sir Richard — "⟨Dan?⟩[iell] Bulkley or either of them nor o[f]" head tokens.
- 4. L5 whole row** (b2): "⟨W⟩m ap ⟨R⟩ees h[is] ⟨ma/ffre?⟩[?]" — is "his ffrend" on the membrane here? + tail "nor of fumes o[?] th[?]" .
- 5. L6 tail** (b2): "by their or fume of the[ir?]" .
- 6. GUTTER MARGINALIA** (b2/b3 Lb right edge): two tiny lines "w[?]{th}[?] / n[?]{h}[?]" — true marginal note vs right-page bleed-through.
- 7. L9–L10** (b2/b3): "⟨d⟩rawinge" verb; "fuit[e?] ⟨th?⟩[?]" tail.
- 8. L11–L13** (b3): "⟨marche?⟩" month; L12 "fd ⟨S[i]r?⟩" (Sir present?); L13 head token + "a bill of his ⟨ex[aminan]t[s?]⟩ [own?]" tail.

9. **L15 whole row** (b3/b4): "fure[?] this <d>[?] «^{now}» [in] [impri]fonment in the <ffl>[eete?]" — interline L#i1 placement + host clause.
10. **L16–L19** (b4): L16 head; L17 head+tail; **STRIKE L#1 struck word** "ofrr>owe?" + tail "fom[e?]" ; L19 "[&?] fo therevpon the" tail.
11. **L20 whole row — TOP** (b4/b5): "w[?]th the <ff>ee[?]s△ <H[um]f[re]y?>△ fent this ext at all[?]" — Humfrey (a NEW name?) vs "his ffrend" vs "the ffees"; controls the messenger identity.
12. **L21 THE SUM — TOP** (b4/b5): "<ff>[?]△ pownds [&?] <f>ome[?]△ <f>h[ill]inges?" — baseline expects "thirtie[?] pownds"; the ff-ligature fights that.
13. **L22–L23 tail** (b5): "by fome of the || warden of the ffleete <f>erv[an]t[es?]" word order.
14. **L26–L30 answer-7 dispute zone** (b5/b6): L26 "fd <S[i]r?" vs fd <th>e"; **STRIKE L#2 "<th>e fe[?]"** + "Cornwall Rowe"; L28 doubled "the fd <th>e Richard" + pre-"about" mark; **STRIKE L#3 "leid w[?]th, me"** + "w[hi]ch a"; L30 mid tokens.
15. **L31–L36** (b6/b7): "Co[u]ntrey"; "acquainted" bar (otiose-lean); raised "«m[e]e?»" (L#i2); "fundrie tymes"; "keepe them companie"; L34 "dyett...dietted «do»"; L35 "by the fame"; L36 whole row.
16. **L37–L39 foot** (b7/b8): "conference[s?]" plural; "<p>roceed[inges?] w[hi]ch had"; **L39 final word** "<C>aufe/<f>ute/<f>ame".

LEFT eB RESOLUTIONS (005L)

(eB pass 2026-07-08; per-queue-item; ✓eB = resolved on the eB tile · △ retained = eB could not firm it · WITHDRAWN = native reading killed by eB.)

#1 (L1–L2 head): "<T>o the 6 . <l>nterrog(s)" numeral + point CLEAR ✓eB. L1 tail: "this ex[aminan]t faieth th[at]" ✓eB; the post-"th[at]" edge form is a flourished capital at the cut (<h>e[?]) — △ retained, tear/edge-limited. L2: "he did not <r>eceibe[d?] nor <h>ad" ✓eB; tail recovers the doublet's first half — "<anie?>△ <f>ume[?]" (eB shows "fume" hard against the cut; whether "anie" precedes it stays △). **Chain-lock ✓eB:** "...fume || or fom[m]es of monie of S[i]r <R>ichard ul[kley]" — the interrogatory formula doublet. "S[i]r" brevigraph (S + superscript r) firm ✓eB.

#2 (L3 initial): RESOLVED ✓eB — "<S>om[m]es": grand flourished secretary majuscule S + macron over "om" + terminal s; <Th>oms **WITHDRAWN** (no h-bowl present; "Thoms of monie" agrammatical; the fume-or-fommes doublet locks S).

#3 (L4 head): chain firmed ✓eB: "ulkley or eyther[?] of them nor of" (the "falgey"-looking token = secretary "eyther" △ light). The forename before "Bulkley" stays △: short form, rounded first bowl + minim cluster — candidates now "<Dan?> / <Ow>[e]n[?] / <Dv>n[?]" (Owen Bulkley reading added by eB letterforms; do NOT assert — TNA arbitration item; delta vs baseline §005L pending).

#4 (L5): "<W>m ap <R>ees <h>is" ✓eB; the disputed token after "his": eB letterforms = "ma" + ambiguous 2–3 letters — candidates "his man[?]" (servant idiom) / his m[ai]ft[er?] / ffre[nd?] — △ RETAINED, professional-arbitration item. Tail firmed ✓eB: "nor of <f>uñes o<f> <th>e[?]".

#5 (L6 tail): leaned ✓eB: "by <th>eir or <f>ome of <th>eir[?]" (parses with L7 "direc̄on or appointment"; them/their tail light-△). L6 head confirm ✓eB: "<ḡ>lon nor <ḡ>ons by" (ḡ brevigraphs clear). L7 note: "<d>irec̄on△" — -c[i]on brevigraph = crux-class, △ stands by rule; "or appointment <d>irectly or indi[rectly]" ✓eB.

#6 (GUTTER MARGINALIA): RESOLVED ✓eB — it is the RIGHT page's gutter-script insertion (R#i3, R8 height), not left-page marginalia and not bleed-through. On the eB tile the two tiny lines are crisp dark ink sitting at/just past the fold crease ($x \approx 0.51-0.52$); the Lb strip (to $x0.53$) simply captures the right page's gutter sliver. Height matches R8's insertion complex exactly — the cross-ref made during the right native sweep is confirmed. Text content of those two lines belongs to RIGHT eB queue #6. **Left-page census unaffected (no marginal note on 005L).**

#7 (L9–L10, part — b2 portion): L9 firmed ✓eB: "for or towards th[e] <d>rawinge of <th>e [ill?]" ("drawinge" verb now ✓; B-initial tail visible). L8 LOCKED ✓eB: "fithence the <ffi>rft day of october laft" (giant ff-flourish at La foot = the ffrft initial). L10 tail → band 3.

#7 (completion, b3): L10 ✓eB: "ill or <p>rofecūon of <th>at fuit" (word identity firm; -c[i]on brevigraph △ stands by crux-class rule); post-"fuit" tail token "<th>[e/at]" △ retained. L9's fold-edge tail form: the double-tall-ascender shape at the Lb right edge sits at/past the crease ($x \approx 0.51+$) — likely right-page sliver ink, NOT L9's tail; "of the [ill?]" △ retained, fold-limited.

#8 (L11–L13): L11 ✓eB: "in <mar>che[?] laft paft <th>[at] he this ext **borro[wed]**" (chain-lock "borrowed" at Lb edge; "marche" leaned ✓, light-△ on the ch-cluster). L12 LOCKED ✓eB: "of the fd <S>[i]r <R>ichard ulkley the fom[e] of" (Sir present — the flourished Sr brevigraph matches L3's). **L13–L14 IDIOM LOCK ✓eB:** "that he then gabe <h>im a bill of his ext[is] || <h>and for repaym[en]t thereof , And alfo" — "a bill of his hand" = promissory note; L14 "<h/b>and" RESOLVED → "hand" (h-form confirmed at La); native "[own?]" **WITHDRAWN** (unsighted on eB; idiom complete without it).

- **NEW FIND (grammar-locked):** L13's head token is the AMOUNT of the Bulkley loan — L12 ends "the fom[e] of [line-end]", so L13 must open with the sum before "that he then gabe...". One compact token, eB candidates "<te>nn[?] / <tw>oe[?] / roman-numeral+li[?]" △△ — identity UNRESOLVED; **TOP TNA-arbitration item (the first-loan amount).**

#9 (L15, part — b3 portion): interline L#i1 "now" **CONFIRMED ✓eB** — tiny raised "now" sits directly above "[im]prifonment" at the Lb b3 foot → host reading "...«now» [in] [im]prifonment in the <ffi>[eete?]" (placement firm). L15 head tokens → band 4.

#9 (completion, b4): L15 eB reading: "<fi>nce[?]△ <h>is[?]/<th>is△ «now» <l>mprifonm[en]t△ in the <ffi>eete ✓(ffi-ligature)" — the period idiom "his now imprifonment" fits the interline exactly; the native "<D>ofam" seam-cluster = the looped secretary capital I/J of "Imprifonm[en]t" (hypothesis△); "duringe" alternative noted; native "fure" superseded by "fince[?]" (grammar-preferred, both-f initial, △ retained). Chain into L16 ✓: "...ffleete , he wantinge monie..."

#10 (L16–L19): L16 ✓eB: "he wantinge monie to beare his neceffarie <ch>ar[ges]" — no head token visible on eB (row opens "he"); native phantom head "<...>[?]" **WITHDRAWN**. L17 ✓eB LOCK: "<th>e[?]/<th>en[?]△ this ex[aminan]t lent || vnto <W>illm ap <R>ees" ("Willm ap Rees" clear on Lb; head the/then △). **STRIKE L#1 RESOLVED ✓eB: struck token = "borrowe"** — clear b-ascender + o + rr-minims under the strike-bar, "lend" written after: the scribe flipped the request-direction ("to borrowe" → "to lend this ext fome monies") — L18

= "him felfe[?] Δ to ~~borrowe~~ lend this ex[aminan]t fom[e]". L19 $\checkmark$ eB LOCK: "<m>onies at <f>euerall tymes , <&> fo <th>erevpon the <f>d[?]" (a "fd" now sighted at the row tail — feeds L20).

#11 (L20 THE MESSENGER): "<H>umfrey" CONFIRMED $\checkmark$ eB — NEW NAME on the membrane (clear H-majuscule + um + f + e/r + y-descender on Lb): "...<H>umfrey fent this ex[aminan]t at <f>eu[erall?]/all[?] Δ || tymes...". Tokens BEFORE the name stay Δ : "<th>e <f>d[?] <R>ees[?]/<ff>ees[?]" (with L19's "therevpon the fd" chain, "the fd [ap] Rees" now rivals native "the ffees"). **Linkage hypothesis for TNA (not asserted): interrogatory's "Wm ap Rees his man[?]" (L5) $\leftrightarrow$ answer's messenger "Humfrey" (L20) — i.e., Humfrey is Rees's man.** "at feuerall/all tymes" Δ light (eB leans feuerall).

#12 (L21 THE SUM): ff-ligature amount-initial CONFIRMED $\checkmark$ eB $\rightarrow$ baseline's "thirtie[?] pownds" is CONTRADICTED on the membrane (thirtie cannot start ff). L21 = "tymes the fom of <ff>...ie[?] $\Delta\Delta$ pownds <&> <fo>me[?]/od[de?] Δ <fh>ill[inges?]" — amount candidates ffortie/ffiftie/ffowertie (letters after ff unresolvable at this magnification); "& fome/odde fhillinges" both idiom-viable. **TOP TNA-arbitration + DELTA-VARIANCE item — surface to user in the baseline delta (do not let either reading stand silently).**

- (b5 re-sight): ff-initial re-confirmed on BOTH strips; the shillings token re-sighted as "<fo>me/<fe>uen[?] Δ " — a "feuen"-with-macron reading would PARALLEL the right page's R24 "pownds & feaven fhillinges"; all three candidates stand Δ (cross-contamination risk noted — do not let the R24 parallel decide it). Chain firm: "att <f>euerall || tymes the fom of..." ("feuerall" now leaned $\checkmark$ eB over "all").

#11 (b5 re-sight — honest counter): the disputed pre-Humfrey token shows a TRUE double-f ligature on the La b5 tile (form matches L21's ff-amount and L23's ffleete) — "<ff>ees" **regains ground against band-4's "the fd <R>ees" hypothesis; both stand $\Delta\Delta$,** TNA arbitration ("w[i]th[?]/<W>m[?] <th>e/ap[?] <ff>ees[?]/<R>ees[?] <H>umfrey fent..."). "Humfrey" itself unshaken $\checkmark$ eB.

#13 (L22–L23): RESOLVED $\checkmark$ eB — the group-genitive word order is ON the membrane: L22–L23 = "w[hi]ch monies was rought this ext by fome of the || <w>arden of the <ffl>eete <f>[er]v[an]ts" = "some of the Warden of the Fleet's servants". Native "[to?]" **WITHDRAWN** (eB shows "brought this ext by" directly — dative without to). "ferv[an]ts" leaned $\checkmark$ eB (ferv + ts visible; the [an] suspended).

#14 (part, b5): answer-6 $\rightarrow$ 7 boundary re-locked $\checkmark$ eB: L24 = "<T>o the 7 . <f>nterr[og] he faieth that he did a" (formula row clean on Lb). L25 $\checkmark$ eB: "litle before he was imprifoned <r>eforte to" ("reforte" firmed; "did...reforte" periphrastic $\checkmark$). L26 leaned $\checkmark$ eB: "the <h>oufe of the <f>d S[i]r[?] Δ <R>ichard ulkley" (Sr-brevigraph shape matches L3/L12; light- Δ). L27: "in <C>ornwall <R>owe" — both words' letterforms now firm $\checkmark$ eB (a mid-height point sits between them — scribal dot before capital R, not a stop); **the toponym pair stays Δ as a unit (TNA item: Bulkley's house "in Cornwall Rowe" — a street/place name?);** strike L#2's struck matter $\rightarrow$ band 6.

RIGHT eB RESOLUTIONS (005R)

(eB pass 2026-07-08, Ra/Rb_eB tiles read as band pairs. Statuses: ✓eB = resolved on the eB tile · △ retained = eB could not firm it · WITHDRAWN = native reading killed by eB.)

#1 — R1 head (torn) [b1]: RESOLVED-structure. The answer numeral is a clear "8" ✓eB (two stacked loops, unambiguous digit after "the"). Full row (tilt-read: head lower-left, tail upper-right, seam-duplicate "his ex— /—is ex" locks the join): "<T>o the 8 . <l>nterr[og?]△ <th>is ex[aminan]t laieth <th>[at] [—]" — the standard double formula ("To the 8 Interr this ext laieth that") carries BOTH tokens; the "f̄w/f̄m̄t" shape between "ex" and "laieth" reads as the ex[aminan]t brevigraph tail, not a separate word. **Corner BLOT re-classified: a deliberate STRIKE** (multiple horizontal cancel-strokes over a short word), struck matter illegible → log as **STRIKE R#0 "f̄w/f̄m̄t"△** at the torn corner. TNA: Interr-vs-numeral-only formula + struck word.

#2 — R2 VALUE ROW [b1]: RESOLVED ✓eB. "had aboue <tw>entie pownds «^{in monie}» <&> apparrell worth about tenn pownds told[e?]" — "twentie" CONFIRMED letter-by-letter (t·w·e·n·t·i·e, no rival); interline **R#i1**

"in monie" **host CONFIRMED** (small script seated after "pownds", before "&"); seam-lock "pownd—||pownds" held; final token firmed to **"told"-lean** (= counted/reckoned, money idiom) light. The answer-8 asset total stands: ~20li money + ~10li apparel.

#3 — R3 / interline R#i2 [b1]: partially resolved. "of this ext" **CONFIRMED present** eB (small script above the R2→R3 boundary zone, seated above R3's head) — splice reads "...tenn pownds told «of this ext» [his] owne goode[s] <Cl>[...] that h[i]s ext was". "<o>wne goode[s]" firm-lean; "**<Cl>[oathes?]**" **RETAINED** (letterforms Cl+minims only; TNA).

#4 — R4–R5 [b1, b2 re-sight pending]: partially resolved. R4: "<n>euer[?]/<f>euer[?]" at the tyme <th>[?] <W>m <th>[e]lder[?] <&> alfo <th>is" — eB strengthens **"Wm th[']elder"** (**"Wm the elder"**) over a surname reading (the "u/e-lder" form reads as th'elder elision); surname candidate demoted, not withdrawn . R5: "a<cq>uinted of the <f>aue/<f>ame <tw>o <t/r>oll[?] w[i]th <w>oll[?]/<w>oes[?] — **eB could NOT firm the toll/woll tokens** — **RETAINED** (goods-list context; TNA arbitration; weak new thought "wooll" as commodity, not asserted).

#5 — R6 "John ap H[?]" [b1+b2]: RESOLVED to "<H>ow[ell?]". b1: vowel after H reads "o" firm → "Hewn" (e-vowel) demoted. b2 re-sight: **"by <J>ohn ap <H>ow<...>"** — **"How"** firm eB, name suspended after "How" (the stroke above = suspension-mark-lean, not a strike) → **"John ap How[ell]" PRIMARY**; final letters TNA. "<ch>elte" re-confirmed ("had a <ch>elte" eB).

#4 addendum [b2 re-sights]: R4 head "<n>euer/<f>euer" — STILL ambiguous on eB, stands. R5 tail "<tw>o <t/r>oll[?] w[i]th <w>oll[?]/<w>oes[?]" — unresolved ; coherence candidate "two rolls w[i]th wooll[?]" (goods-inventory fit) noted, NOT asserted.

#6 — R7–R11 REVISION ZONE [b2 component; b3 completes]:

- **THE PAWN CLAUSE** eB: "before[?] he <p>awned to his brother" — "pawnd" letter-clear (p·a·w·n·e·d), "to his || brother" seam-locked. FIRM.
- **STRIKE R#1 (R7):** struck matter now reads "by <le>ffe/<lea>fe[?] <h>is[?]/in[?] <th>e <f>e d te<n>ement" — **"the fd tenement" CONFIRMED under the strike** eB; pre-token candidates p[?]fe / leffe / leafe (new "by leafe[?]" hypothesis , not asserted). Unstruck tail ", And" confirmed.
- **INTERLINE R#i3:** re-sighted — "«<were>[?]/<all>[?] at <th>at tyme remayninge wpp[on?]<...>»" (leading word were/all now BOTH live). **Gutter overflow (the two tiny lines at x=0.52, = the ink sighted from 005L):** upper "<...><f>afe/<f>ale[?] , lower "[a]s <th>is ext[']s bro<th>er <h>old[eth?]" firm-lean — semantically CONTINUOUS with the pawn clause (the brother HOLDS the pawnd goods) → one-continuous-insertion hypothesis STRENGTHENED . Insertion-point caret "Λ" confirmed at the R8 tail zone before "And".
- **STRIKES R#3, R#4, R#5 CONFIRMED as true cancel-lines** eB: R#3 "<f>ume[?] <h>er[?] was"; R#4 strike-line through "fe a<cq>uinted <h>er[?] borrowed" ending before unstruck "he at <f>eu[er]all <h>ands"; R#5 strike through "borrowed at <f>eu[er]all tymes" + the "ext <ff>ather" zone (b3 re-sight next).
- R8 "to his ext in nol[?] <p>auen[?]" — eB does NOT support an "in pawne" normalization (letterforms hold "nol/vol") — **RETAINED** for TNA.

#6 — completion [b3]: MEGA-ITEM CLOSED. STRIKE R#5/R11 struck head CONFIRMED eB: **"of this ext <ff>ather the"** — the examinant's FATHER named in cancelled matter. **R12 struck head CONFIRMED struck:** **"<ff>pownds[?] <g> <f>eaven"** — the redraft hypothesis HOLDS (an early draft of the later "pownds & feaven fhillings" clause, struck here, re-entered at R24). R10 strike re-confirmed; ladder R7–R11 seats as

native (joins grammar-consistent). Residual Δ for TNA: R8 body cluster (" $\langle ff \rangle$ oud / in nol[?] / $\langle p \rangle$ auen"), R#i3 leading word (were/all), gutter-overflow upper line (fale/fale), STRIKE R#1 pre-token ($\langle p \rangle$ [?]fe/leffe/leafe).

#7 — R12–R14 floats [b3]: RESOLVED — seating locked by grammar-chain. R12 tail "he had alfo" $\checkmark$ eB $\rightarrow$ R13 = "when $\langle h \rangle$ e was fo a $\langle rr \rangle$ e $\langle fted \rangle$? Δ in[?] $\langle \dots \rangle$ $\langle fh \rangle$ illinges? two or $\langle th \rangle$ ree $\langle fh \rangle$ eepe" $\rightarrow$ R14 = " $\langle \& \rangle$ alfo fome hou $\langle e \rangle$ hold $\langle f \rangle$ tuffe w $\langle hi \rangle$ ch was lefte $\langle th \rangle$ is ext". Chain parses: "...he had alfo when he was fo arre $\langle fted \rangle$... two or three $\langle f \rangle$ heepe & alfo fome hou $\langle h \rangle$ hold $\langle f \rangle$ tuffe which was lefte this ext..." **WITHDRAWN: R14 "fold[?]"** (= the "- $\langle h \rangle$ hold" of "hou $\langle h \rangle$ hold" misparsed, no separate token). " $\langle fh \rangle$ eepe" $\checkmark$ eB-lean (-pe descender; " $\langle fh \rangle$ eepe" demoted). The fo-a $\langle rr \rangle$ cq verb stays Δ (suspended form; arrested-lean; same formula recurs R22 = queue #12).

#8 — R15 PARENTS ROW [b3]: RESOLVED $\checkmark$ eB. "by his $\langle ff \rangle$ ather $\langle \& \rangle$ $\langle M \rangle$ other || , And alfo at the fame" — Mother's majuscule M clear; seam-lock held. Full clause firm: "fome hou $\langle h \rangle$ hold $\langle f \rangle$ tuffe which was lefte this ext by his $\langle ff \rangle$ ather & Mother". R16 re-confirmed: "an intereft in a $\langle te \rangle$ nem $\langle en \rangle$ t" $\checkmark$ eB. (Parish token T1 on b3 reads " $\langle A \rangle$ nch/ $\langle A \rangle$ mb—le— $\langle fh \rangle$ e/ $\langle ghe \rangle$ [?]" — repetition-of-Amblowghe hypothesis strengthened Δ ; decided under #9/#10.)

#9 — R17 TENEMENT #1 NAME [b4]: candidates improved, Δ TNA. Row reads " $\langle c \rangle$ alled $\langle T \rangle$ y $\langle h \rangle$ ir[?] Δ $\langle ll \rangle$ an $\langle th \rangle$ y[?] Δ || lieng in the $\langle p \rangle$ [ar]i $\langle fh \rangle$ e of" — letterforms now segment as "Ty" + "hir/hin" + "llanthy/Wanthy". **NEW HYPOTHESIS (noted, NOT asserted): "Tŷ Hir"** (Welsh "long house", a real house-name form) for the first pair. T1 flourished parish token (b3/b4 top, " $\langle A \rangle$ /R)uchle $\langle fh \rangle$ "-ish) stays unresolved — repetition-of-Amblowghe hypothesis RETAINED Δ . TOP TNA (identification gold).

#10 — R18 PARISH + COUNTY [b4]: parish RESOLVED $\checkmark$ eB; county UNRESOLVED $\Delta\Delta$. " $\langle A \rangle$ mblowghe" **CONFIRMED** letter-train (A·m·b·l·o·w·g·h·e + flourish) $\checkmark$ eB — and **DOUBLE-LOCKED** by R20 tail "the $\langle p \rangle$ [ar]i $\langle fh \rangle$ e of $\langle A \rangle$ mblowghe" $\checkmark$ eB (second independent sighting, clean). Line-break repetition "in the . $\langle Co \rangle$ [unty] || $\langle C \rangle$ ounty of" confirmed-lean. **COUNTY NAME: NOT READ** — flourished $\langle A \rangle$ -initial lean only, rest lost in a strike/flourish tangle $\Delta\Delta$ — Anglesey-CONSISTENT but not asserted (Amlwch-in-Anglesey modern-ID stays hypothesis-only). TOP TNA.

#11 — R19–R20 TENEMENT #2 [b4]: RESOLVED except name-initial. Interline R#i4 = "fome" CONFIRMED $\checkmark$ eB — "fmale" WITHDRAWN (no l-ascender; form f·o·m·e): " $\langle \& \rangle$ alfo «^{fome}» $\langle i \rangle$ ntereft in || another tenement called". Name = " $\langle T \rangle$ yddgyn[?] Δ " (T-initial lean, "-yddgyn" tail firm-lean; Welsh "tyddyn" smallholding hypothesis retained); " $\langle T \rangle$ yddgyn lieng in || the $\langle p \rangle$ [ar]i $\langle fh \rangle$ e of Amblowghe" chain holds. Exact form $\rightarrow$ TNA.

#12 — R22 verb [b4; b5 re-sight pending]: Δ RETAINED with recorded tension. eB shows a **true q-descender $\rightarrow$ "a $\langle cq \rangle$ u $\langle i \rangle$ nted"** letterform-lean; but the sense (post-arrest borrowing narrative: "fince the $\langle \dots \rangle$ was fo a— || he hath had $\langle \& \rangle$ borrowed") favors an arrest-word. THIRD candidate added: "attached[?]" (arrest by attachment — could carry the descender as otiose). Candidates: acquainted (letterform) / arrefted (sense) / attached Δ — TNA arbitration. Tail LOCKED: "he $\langle h \rangle$ ath $\langle h \rangle$ ad $\langle \& \rangle$ borrowed" $\checkmark$ eB. R21 re-locked ("And further this ext || faieth that fince the"). (b5 re-sight: q-descender persists; no change.)

#13 — R23–R24 SECOND SUM [b5]: frame FIRM, value token $\Delta\Delta$ TNA. Frame locked: "of $\langle th \rangle$ is ext[$\langle s \rangle$] $\langle ff \rangle$ ather the $\langle f \rangle$ vm of $\langle \dots \rangle$ VALUE... || $\langle p \rangle$ ownds $\langle \& \rangle$ $\langle f \rangle$ heaven[?] $\langle fh \rangle$ illinges" $\checkmark$ eB (ffather clear; " $\langle fh \rangle$ illinges" clear on Rb; feaven-lean holds; father UNSTRUCK here, vs his struck naming at R11 — redraft topology consistent). **VALUE TOKEN NOT READ** (top-edge cut on the Rb tile): candidates " $\langle th \rangle$ ede[?]/ $\langle th \rangle$ ree[?]" stand; **NEW CANDIDATE** from the Ra letterforms: the tall doubled-ascender form immediately before "pownds"

may be "<f>core[?]" — i.e. "three fcore pownds & feaven fhillings" (60li 7s, period-standard score-counting) — noted, NOT asserted △△. TOP TNA.

#14 — R25 ordinal [b5]: RESOLVED-lean "fixt". Two independent supports: (a) the Rb token before "day of october" is a SHORT form with **no ff-ascenders** → "ffirft" letterform-demoted; (b) **internal grammar-lock: R30 reads "the fd 6 . day of" — a back-reference requiring an antecedent sixth-day mention = R25** (same-answer coherence, not cross-page contamination). The 005L L8 "ffirft day of october" parallel is a DIFFERENT clause/date (answer 6) — no conflict. △ light retained for TNA; unexplained residue: a pre-seam "ff—" form on Ra whose row-seat (R23 ffather vs R25 head) is uncertain — logged, TNA.

#15 — R30 [b5 component; b6 completes]: digit "6 ." CONFIRMED ✓eB (clear numeral + point) + "day[s?] of"-lean → date back-reference reading ("the fd 6 . day of {...}"). Tail shows "into <th>is <H>{...}:" with the **abbreviation COLON** → "his bill into this Ho[norable Court]" hypothesis STRENGTHENED △. **b5's "his fonne[?]" WITHDRAWN-lean** (= the "Ho—" tail misread). Final call at b6.

Band-5 bonus locks: R26 "feverall <f>omms of <M>onie" ✓eB (majuscule M clear) chained to "he hath layed owt"; R29 "owt he <ca>nnot <d>epole" ✓eB (cannot-depose formula clean); R27 "afwell in fute[s] of ll lawe as for <th>is ext[']s" re-locked; R28 "but how much" re-locked.

#15 — R30 completion [b6]: bill-clause CONFIRMED ✓eB. Row now reads: "<...> the <f>d 6 . <d>ay[s?] of <...> ll <...>[exhibi?]ted/[prefer?]red△ <h>is bill into <th>is <H>o<no>[?]" — "6 ." re-locked ✓; "his bill into this Hono:" CONFIRMED ("bill", "into" letter-clear; abbreviation COLON clear; expansion "Hono[rable Court]" primary-lean). Pre-bill verb = "-ted/-ded" token △ (exhibited/preferred); the bill-exhibitor (subject) UNREAD △△ — TNA. **INTERPRETATION-lean (recorded, NOT asserted): the clause anchors the answer's timeframe to the bill's exhibition — "fince the laid fixt day of october [when the plt?] exhibited his bill into this Honorable Court" — making 6 OCTOBER the bill-exhibition date and further locking R25's "fixt".** day[s?] singular/plural ambiguous △.

#16 — R31 "BARKER?" [b6]: eB CANNOT RESOLVE — △△ RETAINED, TNA MANDATORY. Row frame: "ut <th>is ext <h>athe ll <w>[i]th <M/B>arker[?]△△ <&> o<th>er[s] ✓-lean <...> [→R32] october <p>[ro]fecuted ll for <Co>nspiracie...". Letter-by-letter on eB: initial shows a **two-peak form** → **slight M-lean** ("**M**arker"); B NOT excluded; "-ar<k>er" tail holds. Per standing rule (Floyd-v-Barker wish-fulfilment risk): NO reading asserted, NO article use permitted; professional TNA arbitration REQUIRED. "<&> other[s]" firmed.

#17 — R32–R35 [b6]: CONSPIRACY ROW LOCKED + carets resolved. "for <Co>nspiracie <d>epend[i]nge in <th>e ll <C>ourt" ✓eB (Conspiracie letter-train visible). Carets R#i5/R#i6 CONFIRMED (two "A" marks visible); interline word at BOTH R33 and R34 = "<h>/g>ade" letterforms → "**hade**" (= **had**) **sense-lean**: "<C>ourt «^{hade[?]}» against the <ff>[?] △ and "<&> alfo «^{hade[?]}» «^a» <f>ute". DELTA LOG — P4D-5 vs BASELINE §005L/§005R (BASELINE = _WORKING_LLOYD_DEPOSITION_003R-007.MD, RE-SWEEP 2026-07-02)

Variances where P4D-5 eB CORRECTS the baseline

- R15 parents: "lefte this ext by his <ff>ather <&> (M)other" ✓eB** vs baseline "by his [grand?]mother" — the eB sighting was clear (ff-form + & + majuscule Mother). P4D-5-favored. → conform baseline on TNA confirm.
- R36 "<H>owall" H-lean CONVERGES** with baseline "Howell [Lewis]" — both passes now favor H- over P- (the b7 "Hugh Powell" pairing hypothesis weakens; the party is a LEWIS: "Howell Lewis"). ✓ convergence.
- R#i4 "fome" ✓eB** (baseline also "some") ✓ agree; "fmale" dead.

Variances where the BASELINE counter-indicates P4D-5 (downgrade mine, TNA arbitrates)

- L8 date** △△ **REOPENED: my "lithence the <ffi>rft day of october laft" LOCK is COUNTER-INDICATED.** Baseline reads "sithence the ff Sixt day of october" (struck ff-start, then Sixt — scribe began "ff[irst?]", corrected). My R30 "the fd 6 . day" internal lock + R25 "fixt" now FAVOR the baseline: **all three dates = 6 October** (the bill-exhibition anchor). My L8 "ffirft" may have read the struck ff + "Sixt" minimis as one word. DOWNGRADED to △△; TOP TNA.
- R4 "<W>m <th>[e]lder[?]" vs baseline "the laid Murder"** — baseline reads "...was [neuer?] at the tyme [of] the [s]aid **Murder** & also [when he was] **acquited** of the [same]" — "Murder" fits my "<M/W>m-u-e-l-d-e-r" letterforms plausibly (M+urder) and the sense far better (the estate dated to murder-time and acquittal). My th'elder hypothesis DEMOTED; both △; TNA.
- The fo-a(cq) verb (R5/R13/R22): baseline "acquited" (ACQUITTED) resolves my q-descender tension** — not "acquainted", not "arrefted": "when he was **acquited** of the fame", "fince he was fo **acquited**". Fits

letterform (q) AND sense (the answer dates everything to the acquittal). My "arrested"-sense-lean WITHDRAWN-lean; census framing "post-arrest" → **"post-acquittal"**. Δ light, TNA confirms.

7. R5 "two <t/r>oll w[i]th woll/woes" vs baseline "two [C]olts w[hi]ch were" — baseline's parse ("two Colts which were...") is smoother and fits the letterforms ("toll"≈"Colt", "wth woes"≈"wch were"); baseline-favored Δ . (Livestock: colts AND sheep.)

8. L27 "<C>ornwall <R>owe" vs baseline "[Ch]annall Rowe" (= Channel/Cannon Row, Westminster) — REAL VARIANCE: my letterforms read Corn-wall firmly; baseline reads Chann-all with the Westminster identification. Both -all Rowe; "Chanon/Channon Rowe" period-attested for Cannon Row. $\Delta\Delta$ TOP TNA; surface to user.

9. L39 "vppon the fd <C>aufe[?]" vs baseline "uppon the fd ~~struck~~ [Bill]" — variance Δ (Caufe-lean vs supplied [Bill]); TNA.

10. L35 "by the fame <th>[?]" vs baseline "by [chaunce?]" — variance Δ ; TNA.

11. L15 "<l>mprifonm[en]t" vs baseline "[committment?]" — variance Δ light (mine letterform-based); TNA.

The M/B-arker structural hypothesis (MAX-CAUTION item)

12. Baseline: "hath [pre]ferred his bill into this Ho[norable Court] against the fd M[r] [B]arker & others" — i.e. the STAR CHAMBER BILL is against "Mr Barker & others", and the pre-name token is "Mr", not "w[i]th". **This DISSOLVES my two-peak M-lean elegantly: the M = the M of "Mr" ("the fd Mr Barker"), my eye merging "Mr"+"Barker" → "Marker"**. Also supplies my R30 unread pre-bill verb: "[pre]ferred" (matches my "-red/-ted" sighting) and the bill-exhibitor = THIS EXAMINANT (not the plt — kills my "plt exhibited" interpretation-lean; the 6-october anchor stands via the fd-6-day clauses). Recorded as the LEADING structural explanation $\Delta\Delta$ — **max-caution rule UNCHANGED: no article use of "Barker" without professional TNA arbitration.**

Frame/parse variances (both passes partial; TNA arbitrates)

13. R2–R3 interline seating: baseline "twentie pownds in monie [told?], of this ext's owne, & good[s] & apparell worth about tenn pownd[s]" vs mine "twentie pownds «^{in monie}» & apparrell worth about tenn pownds told «of this ext» owne goode[s]" — the insertion-points of "^{in monie}" / "^{of this ext}" and the seat of "told" differ Δ .

14. Party-catalogue ladder: baseline's four-forum flow (bill vs Mr Barker & others → Common-Pleas conspiracie at Weftm[infer] vs Howell Lewis, Wm[?] Lewis & [] → ac[i]on vs John Lewis & Res ap Hugh in Kings Benche → acc[i]on vs Howell Lewis "^{fince that tyme}" profecuted on the behalfe of his Majesty) vs my R31–R42 ladder — substance CONVERGES (four forums, same parties); row-seating and the "^{hade /a /pleas}" carets vs baseline's "^{a suite}" / "^{fince that tyme}" interlines differ Δ . My R40 "<th>at <t>yne" tokens ≈ baseline's "^{fince that tyme}" interline — harmonizes.

15. L13 Bulkley-loan amount: baseline "[xx? — amount uncertain]" (roman-numeral-twenty candidate) joins my candidates (tenn/twoe/roman+li) — both passes agree the token exists and is unread $\Delta\Delta$; TNA.

16. L20 courier cluster: baseline "[W[illia]m ap] Rees [by?] Humfrey [Loadman?]" vs my "ffees[?]/Rees[?] + Humfrey ✓eB" — Humfrey AGREED ✓; the flanking tokens (Rees-before vs surname Loadman-after) unresolved on both passes $\Delta\Delta$; NB 007's courier "Anthonie[?] Leadman, the Warden of the ffleets Man" — Load-/Lead-man surname family; TNA.

- 17. L21 SUM (the standing delta-variance):** baseline "thirtie[?] pownds & some shill[ings]" (£30, itself flagged vs first-sweep £13) vs **my eB ff-ligature initial (ffortie/ffiftie/ffowertie candidates)** — AND 007's answer-14 sighting ALSO saw a double-f start ("ffiftene? ffowertene?"). **TWO independent ff-sightings now stand against "thirtie" — three candidate families across four passes (£13 / thirtie / ff—teen / ff—tie). TOP TNA + surface to user.**
- 18. Second-sum value (R23):** baseline "[som of ____] pownd & seaven [sh]illings" (blank) = my unread value; my NEW "[core[?]" candidate logged; frames agree △△; TNA. Baseline "Sixt day of october" AGREES with my R25 "fixt"-lean ✓.
- 19. County of ⟨A⟩[?]:** baseline's "[Anglesey]" is an editorial SUPPLY (not read); my A-initial-only is consistent; county remains UNREAD on all passes △△; TNA.
- 20. Tenement names:** baseline T#1 "Ty[ddyn?] [__?]" vs mine "⟨T⟩y⟨h⟩ir[?] ⟨ll⟩an⟨th⟩y[?]" (Tŷ-Hir hypothesis); baseline T#2 "Ty[dd]yn [K?]iew[?]" vs mine "⟨T⟩yddgyn[?]" — all △△; TNA (identification gold).
