CANONICAL TRANSCRIPT — MEMBRANE 002 (TNA STAC 8/203/38)

Corpus: TNA STAC 8/203/38 (record copy RC8368179) — catalogued *Lloyde v. Lewys*, Anglesey, June 1607; the surviving Star Chamber file behind *Floyd v. Barker*, 77 Eng. Rep. 1305 (1607)
Membrane: 002 of 010 — deposition of John Towneley, continued (double opening, two pages): the Montague retainer, the Bulkeley truth-vetting, "examinable in the Starre chamber," the drawing, three-week review, one-third cut, and subscription of the bill
Master image: 8368179_STAC_8_203_38_002.jpg · 5013×4110 px · sha256 3e81992d0e6e50c135bc4940aa101e6c15904b645e40304565fd05e6d402aa (verify: `shasum -a 256 -c FIXITY\_SHA256\_SOURCES.txt`)
Canonical tiles: crops/canon/crop_canon_m002_{La,Lb,Ra,Rb}_b1..b8, nat + eB (64 tiles) · manifest crops/canon/_manifest.jsonl · coverage proven full height, no gaps (./_coverage_check.py)
As-read record: crops/stac_p4d/crop_p4d002{La,Lb,Ra,Rb}_b1..b8[_eB] + the 2026-07-02 re-sweep bands — see WORKING_002_LINE_INDEX.md; the canon series is a deterministic re-derivation for citation, NOT the tiles-as-read (methodology §15.4)
Transcription level: strict diplomatic (methodology §6, §18.1); the Modernized layer is an editorial aid and is never quotable
Authority: the author's working transcription, first-hand method (methodology §2.1), quoted only with disclosure; professional verification transcription (2026-07-02 TNA-route ask closed by TNA 2026-07-15 — not a TNA service; independent professional commissioned via TNA's researchers list, engaged 2026-07-17) RETURNED IN FULL 2026-08-06 and conformed — CORRECTIONS_LOG #31–#32
Pass history: first sweep 2026-07-01 · line-by-line re-sweep 2026-07-02 · Phase 4D-2 line index + eB checks 2026-07-08 · this transcript assembled 2026-07-09 (assembly only — no new readings)
Status: professional return RECEIVED + CONFORMED (2026-08-06/07, CORRECTIONS_LOG #31–#32); letter-exact sites carry in-line VERDICT annotations; readings without a letter-exact verdict remain provisional (names above all, §1.7); physical-class residue awaits imaging (per ledger/log)

STATEMENT OF EDITORIAL METHOD

(a) This is the reader-facing edition of membrane 002, assembled from the corpus's adjudicated layers — the Phase 4D-2 line index (WORKING_002_LINE_INDEX.md, whose stitched composites are the line-grain authority), the baseline deposition transcription (WORKING_TOWNELEY_DEPOSITION_001-003L.md), and the ledger — with every flag preserved. It introduces no new readings. Where layers disagree, the disagreement is either shown in the text itself (true contests carry both readings) or resolved by the escalation ladder with the losing layer's reading cited in the note; regen-class resolutions are disclosed. This membrane carries an unusually live contested stratum (the Edward/Henry forename events and the instruments/instrucons crux): contested entries below carry their !/?/! flags in the text, and the Open Items section is the arbitration list.

(b) Conventions per methodology §6 (the renderer's legend page reprints them): [?] uncertain · [...] / [] supplied/illegible · ^{word} scribal interlineation · struck text is struck in the manuscript · «O R» in-line insertion · ~~████~~ an obliterated strike of estimated extent · !/?/! lean/contested · ✓eB survives enhancement. Scribal spelling preserved exactly. Declared aid-layer exception: the complainant's surname is normalized to **Lloyd** in the Modernized layer (the leaf spells Lloud/Lloude/Lloyd; each site's form is preserved in the diplomatic layer), and Serjeant Montague's forename is rendered **Henry** in the aid layer per the scribe's own repeated corrections (the correction stratum itself is the diplomatic record below).

(c) Labels are membrane.line: 002.L7 = left page line 7; 002.R28 = right page line 28; 002.m1-m4 = the examiner's four-line marginal note. Joint/range entries are the addressable unit. Tile references: this is a double opening, so each page has a line-starts strip and a line-ends strip — **L·b2** means crops/canon/crop_canon_m002_La_b2.jpg (starts) || crop_canon_m002_Lb_b2.jpg (ends); **R·b5** means ...Ra_b5 || ...Rb_b5 (add_eB for the enhanced render). A line's full width is the pair read together; the manifest row of any tile gives its exact source rectangle on the checksummed master.

(d) Authorization: quoting authorized on the author's authority with disclosure (2026-07-03); diplomatic layer only;  readings only with flags;  readings described, never quoted as readings. Names provisional until the TNA transcription returns.

Modernized (editorial aid — never quotable): And so thereupon the said Jevan Lloyd retained Serjeant [Henry] Montague to be of his counsel. And at the same time this examinant told Lloyd that the matters mentioned in the instructions concerned some of Sir Richard Bulkeley's kindred, and by reason thereof concerned Sir Richard Bulkeley more than Lloyd himself.

28 L34, L37; R-1...R-7), against the baseline's "≥4" — the fullest census yet of the scribe's
29 systematic forename confusion, caught mid-line most times and apparently missed at
30 both pages' FIRST mentions (L2 "Edw:", R3 "Edwad")  .

31 Physical: wide double opening (bifolium spread), gutter $x \approx 0.47$ – 0.53 ; graphite foliation
32 numeral top-right of the right page; round ink blot with tail in the left margin at L7; gutter
33 fold-line (text does not cross); repair/tape fragment at the top gutter edge; white
34 tape/repair strip crossing the gutter at the foot; parchment patch at the lower-left corner;
35 both feet torn.

36 OPEN ITEMS ON THIS MEMBRANE

- 37 1. **OPEN — the two FIRST-MENTION forename sites (L2 "Edw:", R3**
38 **"Edwad"):** apparently unstruck where every later mention is corrected to ^{henrie} —
39 stroke/tangle ambiguity at both;   TOP TNA. The scribe's target (Serjeant

- 1 HENRY Montague, Recorder of London 1603–16) is fixed by the correction
2 stratum itself.
- 3 2. **CONFLICT — L21 strike-vs-interline:** eB shows "Edw:" as the struck token; the
4 baseline read "Ew:" as the interline over an unread strike. TNA.
- 5 3. **CONFLICT — L29 insertion:** «or a[?]]» (P4D) vs *on a day* (baseline). TNA.
- 6 4. **OPEN — the examiner's marginal note m1/m2:** "E[x?] p 2[7?]: affirmed..." vs
7 "S[ir] R[ichard] [B.?] affirmed..."; "[s]launderous/[sub]stance in [par?]te of" vs
8 "[in]strucions in [some?] of" (with the struck quantifier) — the readings change
9 who/what the note references and how much Bulkeley affirmed; m3–m4 SECURE.
10   TOP TNA.
- 11 5. **CONFLICT — three wording sites:** R1 head ("tyme," vs "were true,"); R10
12 ("determ[in]ed" vs "seemed [fully satisfied]" — possibly both, in successive
13 clauses); R35 ("they" vs "then"). TNA.
- 14 6. **OPEN — the instruments/instrucions crux, per-site (8 sites: L6, L15, L17, L25,**
15 **L30, L37, R7, R19):** the baseline normalizes to "instrucions" throughout; the P4D
16 per-site letterform leans SPLIT (-nts at L6/L30, -cions at L25). Per methodology
17 §1.5 the split IS the finding; never silently resolve. TNA.
- 18 7. **VARIANT — baseline readings not independently re-confirmed (not**
19 **contradicted):** "further to p[er]use" (partial), "to bee ingrossed w[i]th some
20 [amendments]", "fully satisfied", "question of the truth of the matters". Strip
21 gaps/line slope; TNA sweep-up.
- 22 8. **OPEN — the foot fragments:** the date "Ju[l/n]ij"   (June coheres with 001;
23 July would be later) and "[?]ramo[?]t"   ("[iu?]ram[en]t[?]" candidate).
24 TNA.
- 25 9. **LEAN — R28 "he mi[s]liked":** eB vowel favors misliked over mistaken; the
26 struck name-form before it () unread. Professional confirm.
