## JUNCTION GEOMETRY — q-81v-a, f81v side (nat b1 pair, 2026-07-09) [GEOMETRY BEFORE PARSE — adjudicated in order]

### (1) Strike extent on 81v.1 — TWO separate strike zones, not one:

- **Zone A (line start, L-b1):** first ink of the line is a STRUCK cluster, ~5–7 letters, possibly two short tokens (strike runs continuously; letter-skeleton under strike not nat-legible — candidates include "~~were~~" one-word and a two-token "~~—~~o~~—~~re" parse). **eB QUEUED (eB-81v-1).** Line 1's first ink sits at leaf-x ≈ 0.31–0.33 — INDENTED relative to what lines below appear to use; measure text-block left edge against b2–b8 lines before assigning meaning *[[flag: indent-vs-strike-zone-A geometry]]*.
- **Zone B (mid-line, R-b1):** ONE word struck, ~5 letters, skeleton ⟨L⟩ewes-class — initial tall looped majuscule (L-class, cf. 81r.21 "Lewes"), then e-w-e-s minim/bowl run under a single horizontal strike.  names-class → **eB QUEUED (eB-81v-2)** regardless of confidence (wish-fulfilment guard: "Lewes" is the *expected* token from the survey hypothesis — letterforms only).

**(2) Interline anchor (R-b1):** «hugh ap» sits interlined ABOVE strike-zone B, its "hugh" beginning directly over the struck word; a small **caret Λ at baseline immediately after the struck word**, before "William". After "ap" a short diagonal stroke — virgule-like; could be the caret's lead-line or a separator *[[unresolved, eB-81v-2 to check]]*. Big descender loop below the strike zone = tail from strike-return or line-2 ascender interference, NOT part of the caret *[[lean]]*.

**(3) Parse (only now):** 81v.1 nat reading: ⟨??⟩ well knowne to ~~Lewes~~Λ«hugh ap» William⟨—⟩ ≠ — corrected sense "...well knowne to hugh ap William⟨—⟩". The mid-line repair = scribe wrote "Lewes", struck it, interlined «hugh ap», continued "William" — the **eye-skip limb of the working hypothesis is now**

**evidence-backed from strokes** (anticipation/repetition of "Lewes" from 81r.25's line-end "...names were Lewes"). Terminal of "William": long final stroke — whether **-m** + flourish or **-ms** (= "Williams", matching 81r.18 victim "hugh ap Williams" FIRM) is **eB QUEUED (eB-81v-3)** — names-class: victim styled with/without final s is a substantive delta. **Junction synthesis (provisional, NOT asserted)**: f81r foot **William** (STRUCK FIRM) + 81v.1 NOT beginning with "William" (begins with struck zone A + "well knowne to") = consistent with a **cancelled catchword**; the false-start limb ("**were**") lives or dies with zone A's eB. Final adjudication of q-81v-a after eB pass.

**SECOND BASELINE ON RECORD (Notes §2 f81v, ll. 35–42, quoted for delta):** matches companion nearly verbatim, incl. the UNSTRUCK "Lewes [interlined: Hugh ap] William[?]" (both baselines contradict my strike zone B — eB-81v-2 stakes doubled) and "~~were~~ dittography". Notes §2 differences from companion: "Upon these examinations" (companion "Uppon these examinacons"); Notes ll. 42 note asserts "**this instance clearly 'Marches'; the f. 81v commission instance reads 'Marshes' — the scribe uses both spellings**" = the claim my both-spellings census tests. **NEW AUDIT FLAG (#26):** Notes §3 table (l. 90) quotes "their saying in Welch" where its own §2 (l. 36) reads "their sayings in welsh" — third §3-internal-misquote instance (after "Loyd", "Aug. 1600").

f81v DELTA LOG — 4 parts, vs BOTH baselines (companion `READING\_COMPANION\_ff81r-83v.md` ll. 46–55 · Notes §2 `HLS\_MS149\_FLOYD\_SECOND\_ACCOUNT\_TRANSCRIPTION.md` ll. 35–42; quotes banked above) — 2026-07-09

#### A. FORM (orthography/letterform)

- CONVERGENCE** — **zone A were (.1)**: both baselines print the struck dittography; eB skeleton (single token, w + bowl–r–bowl) agrees. My two-token parse retired.
- VARIANT** — **vttered (.6)**: MS v-initial (nat ✓✓ + native); both baselines print "uttered". Form class only.
- UPGRADE** — **Engl̄ (.17)**: baselines print "Engl[ish]" as a supplied bracket; eyes-read = a real loop-back abbreviation curl on the l (native decisive). The bracket is vindicated as expansion of an MS abbreviation, not a repair of loss.
- CONFIRM** — **both-spellings census (.4/.27)**: Marthes (fh-ligature, tall crossed stroke) at the commission instance; Marches (low c-bowl) at the fine instance — the Notes §2 l.42 claim confirmed from strokes; skeletons categorically distinct.
- VARIANT** — **who (.25, lean)**: native shows no terminal e; BOTH baselines print "whoe". Dual {who|whoe} retained △.
- CONFIRM** — **Anglefey (.12)**: spelling matches the 81r margin word ✓✓.
- STRUCTURE** — **word-divisions on record**: con⁠trary (.7–.8) · de⁠polic⁠(i)ons (.18–.19); baselines silently join both.

#### B. SUBSTANCE

- NEW** — **struck majuscule-W false start at .10**: ~~W~~ before "ap John" — W-class letterform (matches the hand's William-W exemplars) crossed by two cancellation diagonals; BOTH baselines silent. Interpretation dual [[△△ wish-fulfilment-risk: "anticipated William" is the attractive limb — skeleton only asserted]].

2. **CONVERGENCE** — **the welsh clause (.7):** my nat ⟨wo⟩rd(e)s lead RETIRED; in welſh confirmed (eB + native + the .13 "words" discriminator sighting). Baselines vindicated: *vttered their depofic(o)ns in welſh but written in Engliſhe contrary to their ſayings in welſh*.
3. **UPGRADE** — **disavowal ¶ terminal (.19):** period-terminated (the side's ONLY non-virgule ¶ close) — structure fact neither baseline records.
4. **CONFIRM** — **clause architecture:** commission → language → indictment → denial → disavowal → bribery → packed jury → fined juror, exactly as both baselines.

### C. NAMES (arbitration/collation riders regardless of confidence)

1. **CONFLICT** — **△△ ARBITRATION #2: Lewes (.1 zone B) is STRUCK — five sightings (nat ×3, eB, native) — where BOTH baselines print "Lewes" UNSTRUCK.** With caret Λ + «hugh ap» interline the corrected sense is "well knowne to hugh ap William⟨—⟩" (eye-skip repair from 81r.25's "...names were Lewes"). Recorded, not asserted; conform-on-professional-return.
2. **LEAN** — **William⟨—⟩ terminal -m (.1):** no s-bowl across three sightings; vs 81r.18 victim "hugh ap Williams" FIRM → styling variance → #27.
3. **CONFIRM** — **Edward ap John (.9–.10, .21):** four sightings + both natives; "one Edward" in-line FIRM.
4. **VARIANT** — **ap rice minuscule-r (.22) vs 81r.24 ap Rice majuscule-R:** same surname, two cases within the MS → #27 collation row.
5. **CONFIRM** — **Howell Lewis (.24):** -is with dotted i, native-corroborated; categorically ≠ the sheriff token "Lewes" (81r.21) → #27 spelling-split row (presumably two persons).

### D. APPARATUS

1. **STRUCTURE** — **q-81v-a junction CLOSED (three limbs, all stroke-backed):** cancelled catchword (81r foot William STRUCK FIRM) + dittography were + eye-skip LewesΛ«hugh ap». Catchword system otherwise orderly.
2. **NEW** — **catchword census row: 81v foot-right A UNSTRUCK (✓✓✓ + native partial) → 82r.1 "A witnes";** isolates 81r's struck foot-word as the system's lone anomaly.
3. **STRUCTURE** — **¶ census FIRM: 8 ¶s, 7 virgule-terminated + 1 period-terminated (E disavowal).**
4. **OPEN** — **trailing line-end curls (.16 native-only, .23):** dual ⟨line-filler|e-curl⟩, same family as 81r.10's ⟨&|◆⟩ — atlas row.
5. **CONFLICT** — **#26 audit flags, Notes §3 internal misquotes now FOUR:** "Loyd" · "Aug. 1600" · "their saying in Welch" (§3 l.90 vs §2 l.36 "their sayings in welsh") · "prosecutor" (§3 l.92 vs §2 l.41 "prosecuter").
6. **OPEN** — **.19 long diagonal:** A-flourish (2 adjudicated + 2 ambiguous sightings, held) vs virgule minority limb.
7. **STRUCTURE** — **defect/allograph adds:** outer-margin ink blots near .1/.4 (no letterforms — not marginalia) · indi⟨c⟩ted c lean-yes △ (.10) · ⟨T⟩ongue E-like double-bowl allograph (.6) · closed-bowl majuscule-C instances (.3 firm w/ cross-finish stroke; .27 lean) — Ch<sup>r</sup> arbitration comparator set updated.
8. **CONFIRM** — **no marginalia on 81v:** outer margin blank save blots/show-through (vs 81r's two seated margin words).

- **eB-81v-4a CLOSED (.4 instance 1, native + L-b2\_eB): Marfh-es-lean ✓ eB.** The tall crossed stroke after "Mar" = the hand's **fh-ligature** (h lead-in cuts the f stem) — comparators in the same crop: "Engli<sup>h</sup>" (.6), "wel<sup>h</sup>" (.8), same crossing habit. ⟨ch|th⟩ limbs retired. Consistent with Notes' both-spellings claim (commission instance = "Marshes"-class).
- **eB-81v-6 CLOSED from native (L-b3\_eB to re-sight): .7 token 2 = wel<sup>h</sup> ✓ eB.** Skeleton shows TWO tall strokes mid-word (l + l) + h-descender tail = same skeleton as .8's CLEAN "wel<sup>h</sup>"; "words" (one ascender, no descender) excluded. **My nat ⟨wo⟩rd⟨e⟩s guess RETIRED; BOTH baselines' "in welsh" vindicated** (delta log: retraction-of-lead + convergence).
- Native also confirms: .2 "partially" ✓ · .3 closed-bowl C of "Co<sup>m</sup>fision" ✓✓ (the mid-bowl horizontal = the letter's own cross-finish, NOT a strike — atlas C-row enrichment) · .6 "vttered" v-initial ✓✓ (form-class delta vs baselines' "uttered" holds) · .6 ⟨T⟩ongue majuscule = E-like double-bowl allograph (atlas note; word lexically secure).
- **Defect note (both renders):** small compact ink-blot in outer margin left of .4 (+ a smaller one near .1) — blot/offset class, NO letterforms → defect census, not marginalia.

- **eB-81v-5 CLOSED (.10 line-initial form): a STRUCK majuscule-W-class false start, ⟨W—⟩ ✓ eB-lean.** Letterform = the hand's W (R-like lead-in loop + double-v, matching .1/.21 "William" exemplars); crossed by TWO long cancellation diagonals descending below baseline — strokes the W exemplars never carry → strike-lean, NOT flourish. NOT text: .9 ends "one Edward", .10 resumes "ap John". **BOTH baselines silent on this form → NEW.** Interpretation dual retained //△ wish-fulfilment guard: "anticipated William" reading is attractive (cf. cancelled catchword + .21–.22 William//ap rice pattern) — skeleton only asserted; dual ⟨W false start|flourish⟩ strike-lean//.
- **eB-81v-6 DOUBLE-CLOSED: L-b3\_eB re-sights in wel<sup>h</sup> ✓✓ eB; DISCRIMINATOR SIGHTING (crop\_L): .13's genuine "words" (w-o-r-d-s: ONE d-ascender, NO descender) is visibly distinct from .7/.8 "wel<sup>h</sup>" (two tall + h-descender) — atlas comparator pair (wel<sup>h</sup>-vs-words).**
- **Native corroborations (crop\_L, .7–.15):** .7 "in wel<sup>h</sup> but written in Engli<sup>h</sup>e con<sup>z</sup>" ✓ · .8 "trary to their fayings in wel<sup>h</sup> /" ✓ virgule visible · .9 "Vppon thefe exam<sup>i</sup>nac⟨o⟩ns one Edward" ✓ · .10 "Jreland" J-descender ✓✓ + "indi⟨c⟩ted" c-presence LEAN-yes (△ retained, note-only) · .11 "for the Murder and there apprehended" ✓ · .12 "and brought into Anglefey /" ✓ virgule visible · .13 "hee denyed the words

- **eB-81v-7 CLOSED (.22): ap rice MINUSCULE-r ✓eB** (small r joined to -ice; word-division narrow but present). **vs 81r.24 "ap Rice" majuscule-R FIRM** — same surname, two cases within the MS → names-class variance, #27 collation + delta.
- **eB-81v-8 CLOSED (.24): "Howell Lewis" ✓eB CONFIRMED** — terminal -is with dotted i, categorically ≠ sheriff token "Lewes" (-es); e-lean on the first vowel. Lewis-vs-Lewes spelling variance logged for #27.
- **eB-81v-4b CLOSED (.27 instance 2): Marches-class ✓eB** — low c-bowl mid-cluster, NO tall crossed stroke → skeleton categorically ≠ .4's fh-ligature. **BOTH-SPELLINGS CENSUS RESULT: .4 Marfhes + .27 Marches** — the scribe uses both; the Notes' l.42 claim CONFIRMED from strokes.
- Spares: .19 terminal = small dot after "pofic(i)ons"; the long diagonal connects toward .20's A lead-in — FLOURISH adjudication HOLDS (3rd sighting); period-lean △ kept; ¶ census stays 7 virgules *minority limb: virgule — dual noted* · catchword "A" THIRD sighting (eB), unstruck ✓✓✓ · .25 "profecuter /" ✓ re-sight (-er + virgule) · .26 "grand Jury was fyned" ✓ · .28 "verdict /" ✓✓ · .27 Councell initial reads closed-ish in eB — atlas C-row ambiguous-instance note (nat read open; △ allograph note only) · .20/.21/.23/.24 re-sights consistent ("kynne" nn-exemplar ✓).
