Built 2026-07-08 (review pass). Scope: every manuscript quotation and manuscript-derived fact from this file that appears in THE_TWO_LOCKS.md (Part V.B body + nn. vst1–vst4, vr9, vr6). **Purpose:** a reviewer verifying the *quoted-in-print* subset (README § 5, step 2) starts here instead of excavating the ledger.

How to use a row: the *Locus* column gives membrane + article/answer/row in the citation scheme of the line indexes; *Authority* names the working file whose band blocks carry the reading; *Tiles* names the documented tile tags or series (all under crops/; manifest rows give exact source rects; stac_regen/ series are regenerations, not tiles-as-read — see README § 4). *Status* uses the methodology § 9 vocabulary. Rows marked **CAVEAT** carry a live uncertainty that the quoting document discloses.

Canonical layers remain the working transcriptions + ledger; this table is an index, not a source. If any cell conflicts with the ledger, the ledger governs.

Not quoted in print (deliberately): the 4B endorsement's "Ad sect[am]? Barker" party-styling lean (△△ — *described* in working files only, never asserted, per methodology § 11.3); the answer-14 sum (contested,

ledger B1); the courier/attorney forenames beyond the disclosed provisionality; the "george/heere is a longe Bill" longer reading (4D-4). If any of these later enter a citing document, add the row here first.

Maintenance rule: this concordance is part of the § 11.4 quoted-readings audit surface — re-verify every row after ANY pass or fold-in, and when the professional transcription returns, this table is the checklist for conforming the citing documents.
