- **SUBSTANCE (answer 2 continued)**: the brother was executed for the supposed murder of a wife△; the deponent often told him to confess "if it were true," and he "still denied it to the deathe"; the answer then turns to a further "vniustlie & wrongfullie" clause — grounds of the wrongful-execution belief.

- **LEAF ENDS** (torn bottom edge); the answer continues on membrane 004.
- **SUBSTANCE (analysis-flagged, not reading):** the closing passage renegotiates the kinship between the deponent and the executed man — "brother" vs "sonnes of [?] cosin germans." Also note for delta stage: TNA styles the suit *Lloyde v Lewys*; Coke's report styles it *Floyd v. Barker* — "Lloyd"→"Floyd" is a standard

Ll- anglicization, and this deposition's Lloyd family (deponent Rees ap Jevan Ll[oyd?], executed John ap Jevan Ll[oyd?]) sits exactly where the report's "Floyd" would.

LINE CENSUS (final, 2026-07-08)

LEFT PAGE (Towneley tail): 30 text lines (L1–L30) + 1 autograph signature ("Townley", no medial e ) + 2 marginal marks (N-zigzag nota beside L15–16 payment/name passage ✓eB; V-like paraph w/ blot beside L24 answer-16 head). Answer heads: 5, 6, ¹³(corrected), 15, 16. Strikes: #1 L11 hatched-out glyph under ¹³; #2 L15 surname stroke  (strike vs descender-flourish); #3 L25-area filler-dash zone (downgraded — the "long dash" = deliberate filler, not a strike). Interlineations: 1 (¹³ superscript). Answer-16 ends the deposition mid-page; La/Lb-b8 foot blank below the signature.

RIGHT PAGE (Lloyd head): 40 text lines (R1–R40: caption R1–R3; answer 1 = R4–R22; answer 2 = R23–R40, running off the torn foot onto 004). Interlineations: #1 "to his remembraunce" ✓eB (R4), #2 "say that he[?]" 

placement unsettled (R9/R10 zone; baseline logs an unread interline after "p[er]sons" in R5 — possibly the SAME event, possibly two), #4 "if it were true" ✓eB (R31), [#3 withdrawn — R25 "brother" is in-line], + baseline's "facte" over strike #9 (see delta B/C). Numbered strikes: #4 R11 "said/same" △; #5 R18 "day" ✓(baseline concurs); #6 seam "vpon"; #7 R30 cross-hatch deletion ✓eB; #8 R34 "inditted" △ (CONTESTED — baseline reads it unstruck); #9 R34 "offense" → "facte" △ (baseline). Unnumbered strike-events: R6 "Richard" ✓eB; R19 London cross-hatch ✓eB; R26 "Countie" underline/strike △; R39 edge stroke △; R2 area caption clean. Barker mentions: 3 (R6, R11, Rb-b4 half-row). Names on the page: Rees ap Jevan Lloud (deponent; LI-cluster 5x ✓eB), Richard(struck) Barker esq, [Justice] Leighton ✓eB, John ap Jevan Lloud (executed brother), ~~Willm~~ ap Rees ap W[illia]m (executed kinsman, via delta), George [LI?] △ (hearer, via delta from seam row).

DELTA LOG vs BASELINES (4-part; baselines read first: ` \_WORKING\_TOWNELEY\_DEPOSITION\_001-003L.md` §003L + ` \_WORKING\_LLOYD\_DEPOSITION\_003R-007.md` §003R)

A. P4D-3 CONFIRMS the baselines (independent crop-level corroboration)

- 003L answer sequence 5, 6, ¹³, 15, 16** — line-anchored; selective administration confirmed again from the answer side.
- The ¹³ correction** — superscript "13" now eB-verified as plainly legible; baseline's "[struck number] ¹³" upheld (struck glyph hatched beyond ID).
- "ffowre pownde" fee** — letter-clear (La-b2_eB).
- "& of no other person" (L15–L16)** — my eB revision ("no", not "fro[m]") RESTORES exact agreement with the baseline's Article-13 recovery; the anti-procurement answer stands at line level.
- "not bound by the ord[e]r of this hono: Courte" + answer-16 scope objection** — "concerne the matters of the order made in this Ho: Courte" now eB-verified; my native "controuerte" was the outlier, baseline's "concerne" wins on descender-interference analysis.
- Towneley autograph** — confirmed; letterform census adds "no medial e" (see B).
- 003R caption** — "Rees ap Jevan Ll[o]ud, nowe prisoner in the ffleete, sworne &c" — surname eB-verified to the LI-family; TNA *Lloyde/Coke Floyd* reconciliation stands.
- "Richard" struck before Barker (R6)** — baseline recorded it; now letter-verified under the strike.
- The Art-1 layered answer** — denial ("did not reporte") → admission ("But he this ext did [saie]...") → fair-trial ground ("might not receiue his triall vnder him" — my Ra-b4_eB "vnder h[i]m" matches baseline) → hearer named (George LI[?] — via reconciliation, D below).
- "day" strike (R18/#5)** — baseline "was upon ~~day~~ this examinants ^{then beinge} newly come from London" concurs with my Ra-b4_eB "day" narrowing.
- "newly come ffrom London" + "demaunded of this ext" + "Barker & Mr Justice Leighton putt owt of their places"** — my eB revisions land exactly on the baseline text (my native "meerlie" was a minim-misread; baseline right).
- Answer 2 core** — "verilie beleeve in his conscience... John ap Jevan Lloud... wrongfullie inditted condemned & executed... supposed murtheringe of his [struck] wife... ^{if it were true} ... still denied it to the

deathe" — every load-bearing token now BOTH baseline-attested AND crop-eB-verified. My R28 "unresolved token between his and wife" = the baseline's struck token ✓ reconciled.

13. "cosin germans removed" kinship formula — both passes agree on the tail; head noun contested (C.4).

B. NEW in P4D-3 (not in either baseline)

1. Signature letterform census: autograph = "Townley" — NO medial e (baseline styles him "Towneley"); initial T-swash vs ff-ligature ambiguous. → TNA.

2. Two marginal marks on 003L (N-zigzag nota beside the L15–16 payment/name passage; V-like paraph beside L24) — no marginalia recorded on 003L in the baseline; pattern-matches the examiner-flag behavior seen at 002L.

3. "Coñ"  token (R8) — a macron-bearing Com[itatus]-style doubling before "Countie of Anglesey"; baseline reads straight "Countie". → TNA.

4. Strike #8 "inditted" (R34) — heavy stroke through the word body on BOTH native and eB tiles; baseline reads "indicted" unstruck. Genuinely new observation, genuinely contestable → TNA (strike vs emphatic stroke).

5. R26 "Countie" underline/strike — not in baseline. → TNA.

6. Interlineation #2 "say that he[?]" with letterform content — baseline logged an unread "[interline]" nearby; mine supplies candidate text but placement differs (census note). → TNA.

7. L3/L24 numeral pre-stroke phenomenon (16-like appearance of "6"; duplicate stroke at the true 16) — letterform anomaly logged for arbitration.

8. L9 "some" (over baseline "any") — minor lexical challenger. → TNA.

C. CONTESTED — P4D-3 vs baseline (TNA arbitrates; names/dates first)

1. THE DATE (R1): mine "x[v?]j Junij 1607" (16 June) vs baseline "xj[?]" (11 June, matching 001's Latin heading). One minim decides whether both examinations are same-dated. **TOP.**

2. "privie" vs "procuringe" (R35): baseline "not in anie sorte p[r]ivie or consenting" vs my letterform-based "procuringe or consenting". Both canonical formulas; juridically loaded. **TOP.**

3. "sixt" vs "ffirst" day of October (R5): baseline "sixt" (= the instrument's "vjth of October" everywhere); my "ffirst" likely ff/s-x confusion — "sixt" now lead, mine challenger.

4. "Cozens" vs "Sonnes" (R40): baseline "the [C]ozens of [c]osin germans remo[v]ed" vs my "[S]onnes" — C/S + minims ambiguous on Ra-b8; "Cozens" lead (kinship formula coherence).

5. L13 verb: baseline "he **receaved** the same, as he did the rest, by the instruccions" vs my eB "he **executed** the same". Formula favors baseline; letterforms genuinely mixed.

6. L5: baseline "for [his counsel in / continuinge?] the said Bill" vs my "for a [conueyeng?] [of?] the said Bill" — all candidates  in both files.

7. R15 zone: baseline "doth not now [per]fectly [re]member; But [saieth] [he thinketh?]" vs my "not [?] now certainlie remēber, But [sa?]fely" — "certainlie/perfectly" and "saieth/safely" pairs unresolved.

8. R4 "Interr" vs "Entred" — letterform loop ambiguous (baseline reads standard "Interr").

9. R34 second strike: baseline "for that offense^{facte}" vs my "offe[?] [ch]arged" — my letterforms ("fartes/chartes") actually fit "facte[s]" better than "charged" → baseline lead; my "charged" retracted to challenger.

D. NOT independently confirmed / reconciled-by-baseline (my solo readings that dissolved)

- 1. "Steven Gilling[e/h]" (L6) — DISSOLVED:** = "seven shillinge" (long-s + sh-digraph misreads). No second person on the line. Fee = "ffowre pownde & seven shillinge & [?] more", matching the £4-7s formula of 007 answer 14.
- 2. The R38 "name knot" — DISSOLVED:** = baseline "Willm / ap Rees ap [W]m that was executed [with] his examinants brother" — the executed KINSMAN William ap Rees ap William (3-element form, 6th attestation), not a new person and not the brother; my R37 edge token "[w?]illind" = the struck "Willm"; "brother" attaches backward ("executed WITH his brother" — two-executions premise re-confirmed).
- 3. The unplaced R16-seam half-row "was to [?]e[?]re ff[?]" — PLACED:** = baseline "it was to **George LI[__?]**" — the named HEARER of the admission; my "Eidoqre" letterforms = "George". (Hearer's surname still △ in both passes → TNA.)
- 4. Interlineation #3 ("brother", R25) — WITHDRAWN** at eB: in-line "th[i]s ex[aminan]ts brother"; baseline concurs ("his ex[aminan]ts brother" in-line).
- 5. "[ve?]rie deathe" (R32) — WITHDRAWN** at eB: no "verie"; "denied it to the deathe" plain.

Net verdict: the deposition-grouped baseline for 003 survives P4D-3 essentially intact at the substance level; the line index adds letterform-grade verification (✓eB) on every load-bearing clause, two marginal marks, one strike dispute (R34 "inditted"), two TOP arbitration cruxes (the date minim; privie/procuringe), and a corrected fee line. **All arbitration items → ledger TNA list.**
